DESIGN GUIDELINES FOR CUSTOM CANOPY PRINTING

1. Use the Provided Template

Place your artwork on this template to ensure proper alignment during printing.

2. Focus on Visibility Hotspots

Position your main logo and key text inside the marked hotspot areas for maximum visibility from typical viewing angles.

3.Keep Important Elements Inside Safe Zones

All critical design elements (logos, text, etc.) should remain within the safe zones to avoid trimming or seam overlap.

4.Use High-Resolution Artwork

Submit vector files (AI, EPS, PDF) or raster images at 300 DPI at full size.

5.Don't Flatten the Template

Keep layers intact for accurate print alignment.

6. Please email completed file to:

care@crownshadesusa.com
