SEED CRACKERS

Celebrations are an integral part of human civilisation. Celebrations are usually time for feasts, sweets, lights, sound, gifts, decorations and gatherings.

But when we lose context of celebrations and it becomes ritualistic, it leads to more evil than good. Today, we see the exploitation that marginalised communities and the environment has to suffer as a result of use of crackers, fireworks and gifts made from highly toxic and non-degradable materials.

Seed Crackers is a series of eco-friendly, exploitation-free and meaningful alternatives to the current means of celebrations that are socially and ecologically exploitative without conscious thought into it.

Let us be more conscious and responsible in ways we celebrate.

Exclusive Handcrafted, Eco-friendly Seed Crackers - Look alike Crackers that Grow with a Wall Mounting Golden Metallic T-light Candle Holder and Ceramic T-light Candle Holders

Firecracker alternatives made from recyclable material, in a non-exploitative environment & embedded with living seeds. Just sow, water and see these crackers hatch into beautiful plants that can be consumed after nurturing.

Instead of affecting birds & animals by causing sound, light and air pollution, these are nature-friendly & habitat-rejuvenating.

The intricately carved golden t-light candle holder when lit, the soft glow illuminates the surrounding and looks charming.
