TECHNICAL DATA SHEET

GLOBAL SYNT 15W50

GLOBAL SYNT 15W50 is a lubricant specially formulated to prevent excessive or premature engine deterioration due to its advanced technology.

Properties & performance:

GLOBAL SYNT 15W50 contains an exclusive antiwear additive which offers a resistance of the film superior by far to conventional oils. This characteristic is especially useful to ensure a lubrication without deterioration in critical situations of overworking and temperature. It maintains its viscosity in a wide range of temperatures. Its physical characteristics remain unchanged all along its span life, which gives a correct lubrication at any environmental conditions.

Its high detergent-dispersant capacity prevents the formation of sludge, dirt, dust and dross deposits in the cooling areas of the motor. Due to its high antioxidant capacity, **GLOBAL SYNT 15W50** maintains its initial properties.

Physical-chemical characteristics:

Density at 15 °C	0,880 g/ml
Viscosity at 40°C	150 cSt
Viscosity at 100°C	18 cSt
Index of viscosity	150
Pour point	-30°C
Flash point	225°C

In accordance with the standards:
