

MULTISPRAY PTFE

Multifunctional lubricant

Multifunctional lubricant with special base and polytetrafluoroethylene (PTFE) formulated based on oils, solvents and additives that give it great lubrication, seep and protection power.

It has highly lubricating properties, achieving an optimum result in the lubrication of all types of mechanical joints, reducing friction and eliminating noises.

Excellent product against moisture displacement. Reaches the most inaccessible places, lubricating and protecting against corrosion.

Protects and extends the use of all types of mechanisms and metal parts.

PROPERTIES

- ❖ Lubricant for small moving parts.
- ❖ Protector against corrosion, even of metallic parts exposed to the elements.
- ❖ Eliminates noises and softens all kinds of joints.
- ❖ Facilitates the assembly of bolts, nuts and seized parts.
- ❖ Moisture displacement.
- ❖ Does not damage plastic, rubber and ceramic components.

INSTRUCTIONS FOR USE

- ⇒ Before the first application, clean and degrease the surfaces to be treated.
- ⇒ Shake vigorously before use.
- ⇒ Keep the bottle in vertical position, both during storage and use.

PACKAGES: 500 ml
