

## **Furniture Cover Care & Advice**

### Installation:

- Make sure the cover and furniture are clean and dry before applying cover
- Before covering furniture it is recommended to cover any sharp objects or corners with a soft pad to prevent abrasions or tearing of the fabric
- It is important to use a water-shedding accessory (where applicable) underneath the cover, placed in the centre where possible
- Water accumulation can weaken the cover finish which could lead to splitting of the fabric and/or the loss of its waterproof ability
- Firmly secure the cover by using the added features
- Ensure the airflow vent (where applicable) is open. This will provide ventilation to reduce mould growth and mildew build-up
- To avoid any mould growth & mildew remove any furniture cushions before applying cover
- Ensure that any appliances with heat have completely cooled down before applying cover (where applicable)
- Please keep cover away from open flame and other sources of ignition

### Care:

- Do not use soap or detergent to clean the cover. To clean use water and a damp cloth and wipe gently
- Do not iron the cover
- Before you store the cover back into the bag, make sure the cover is dry both inside and outside
