Instructions

IMPORTANT! Please Read:

- 1 Ensure all contents are present
- 2 Do not push piece out of wooden template until needed
- 3 The numbers on the below pieces match the numbers on the assembly guide (flip over)
- 4 Complete all steps in order
- 5 Use glue to strengthen pieces together when instructed
- 6 Ensure an adult is present when handling batteries

Contents

1 Glue G2, G3 and G4 together.

Be careful of the sharp ends of the stick!

Cut off excess parts of the sticks from both ends. Use the provided sandpaper to even out the surface. A gear will be constructed.

2 Use glue on D2 and D3 to secure it against A1, B1, and C1

3 Pay attention to the direction of E1 when securing the motor and D1

Insert axle into hole in motor

4

Axle goes through the gear constructed in step 1. Pay attention to the direction of the motor.

5

6

7 Use glue to secure G5 along the guidelines found on B2. Wait until glue is set.

11

Peel sticker

If using indoors, connect wire of motor to the wire connector of the battery pack.

If using solar power, connect the wires from the solar panel to the wire of the motor. Solar power will require strong direct sunlight.

12

Align each level of the circle (F1) to each notch of G1.

Load the ramp with steel marbles.

Once the source of energy is connected, gently pull the power tab (F6) outwards to turn the device on.
