

## Accessories Kit – 47 mm Stainless Steel Disc Filter Holders

The section has been created to identify the necessary accessory kits for complete assembly of 47 mm Stainless Steel Disc Filter Holders. The accessory kits have been divided into two categories which let customers choose their preferable accessories depending on needs.

*Figure 1: Exploded view of Stainless-Steel Disc Holder 47mm*

Figure 1 represents the exploded view of a 47 mm stainless-steel disc filter holder and identifies the mandatory accessories for a complete assembly of the product without any inlet or outlet connection.

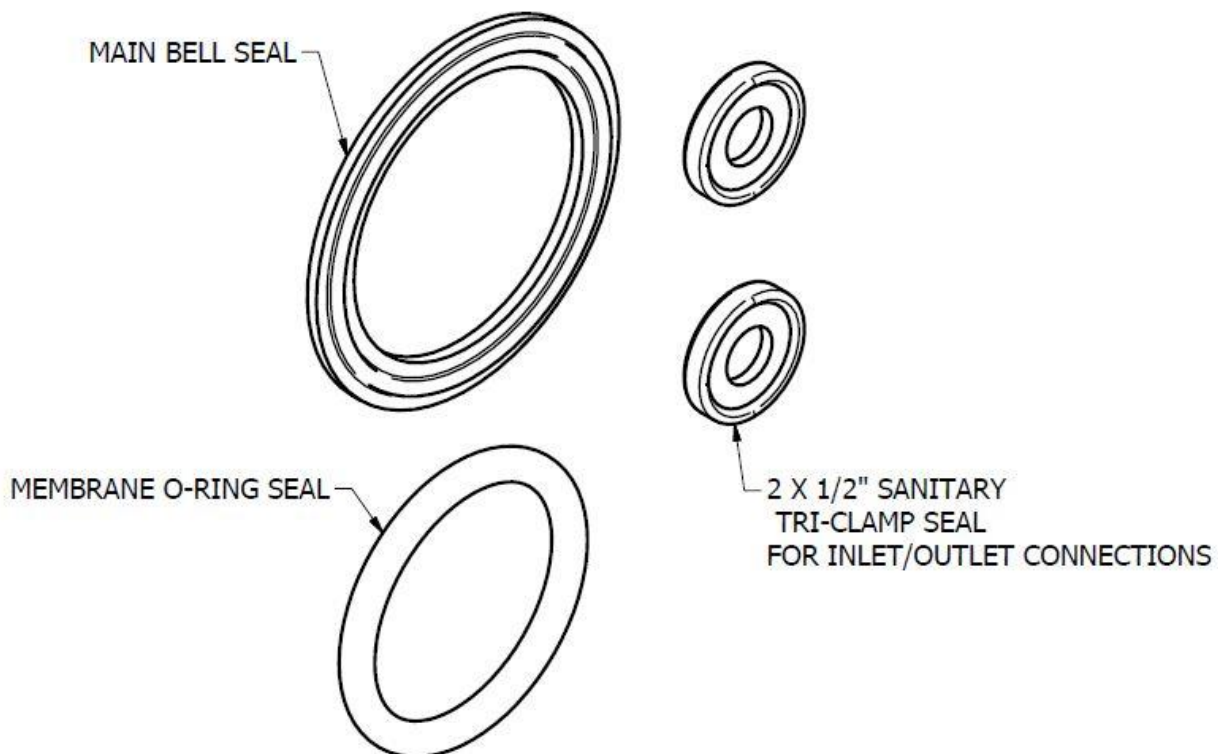

## Seal Kits - 47 mm Stainless Steel Disc Filter Holders

These seal kits provide you with Four (4) seals for the assembly and connection of the 47 mm disc holder. The seal kits are available in three different material (Silicone, EPDM, BUNA-N). The following table outlines the three different versions of the accessories kit. Figure 2 provides an illustration of the kits. Viton and PTFE are available upon request.

*Table 1: Seal Kit Part Numbers*

Seal Kits	
Part Number	Description
IFP-141-0004	SEALS, DISC HOLDER, 47MM, SILICONE, KIT
IFP-141-0005	SEALS, DISC HOLDER, 47MM, EPDM, KIT
IFP-141-0006	SEALS, DISC HOLDER, 47MM, BUNA, KIT

Refer to Figure 2 for the contents in a typical seal kit.

*Figure 2: Typical Seal Kit Content*

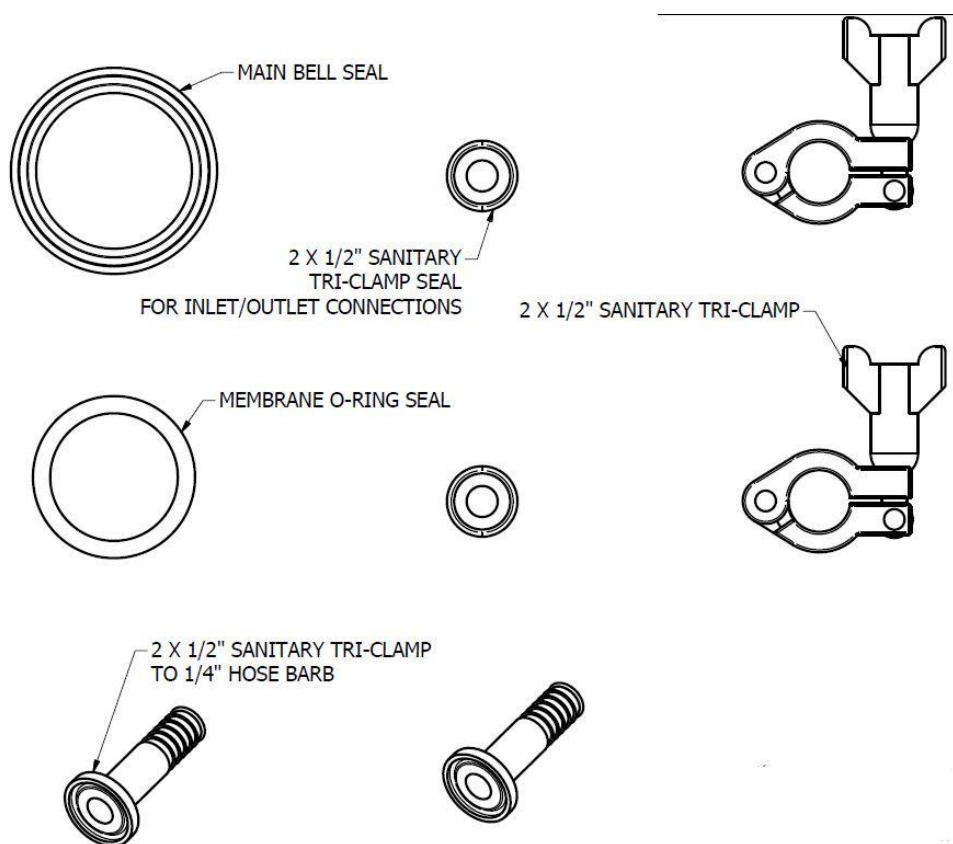

### Fitting-Clamp-Seal Kits - 47 mm Stainless Steel Disc Filter Holders

These fitting, clamp, & seal kits provide four (4) seals, two (2) tri-clamp and two fittings (2) for the assembly and connection of the 47 mm disc holder. Figure 3 illustrates the parts that are included in the kit package. The seals are available in three different material (Silicone, EPDM, BUNA-N). The material of the clamps and fittings is 304 stainless steel. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 2: Fitting-Clamp-Seal Kit Part Numbers*

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0007	FITTING-CLAMP-SEALS, DISC HOLDER, 47MM, SILICONE, KIT
IFP-141-0008	FITTING-CLAMP-SEALS, DISC HOLDER, 47MM, EPDM, KIT
IFP-141-0009	FITTING-CLAMP-SEALS, DISC HOLDER, 47MM, BUNA, KIT

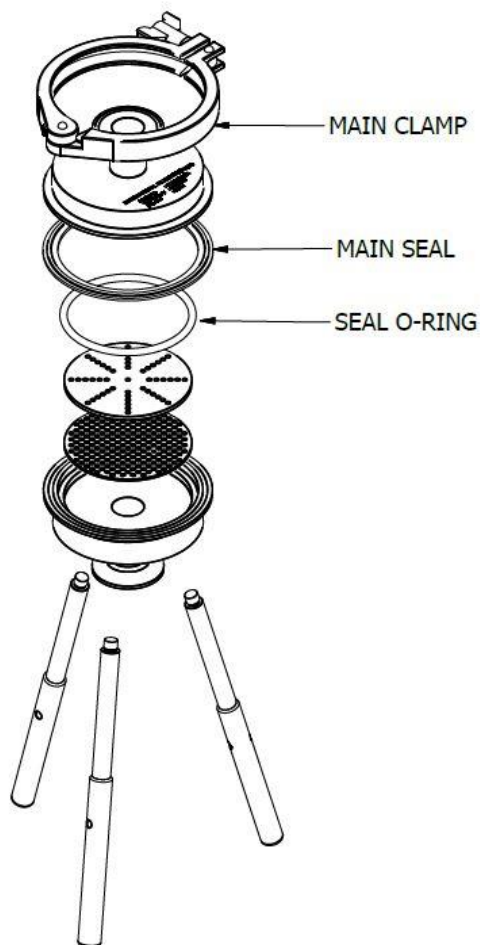

Refer to Figure 3 for the contents in a typical fitting-clamp-seal kit.

*Figure 3: Typical Fitting-Clamp-Seal Kit Content*

## Accessories Kit – 90 mm Stainless Steel Disc Filter Holders

This section has been created to identify the necessary accessory kits for complete assembly of 90 mm Stainless Steel Disc Filter Holder. The accessory kits have been divided into three categories which let customers select their preferred accessories depending on their requirements.

*Figure 4: Exploded view of Stainless-Steel Disc Holder 90mm*

Figure 4 represents the exploded view of a 90 mm stainless-steel disc filter holder and identifies the mandatory accessories for a complete assembly of the product without any inlet or outlet connection.

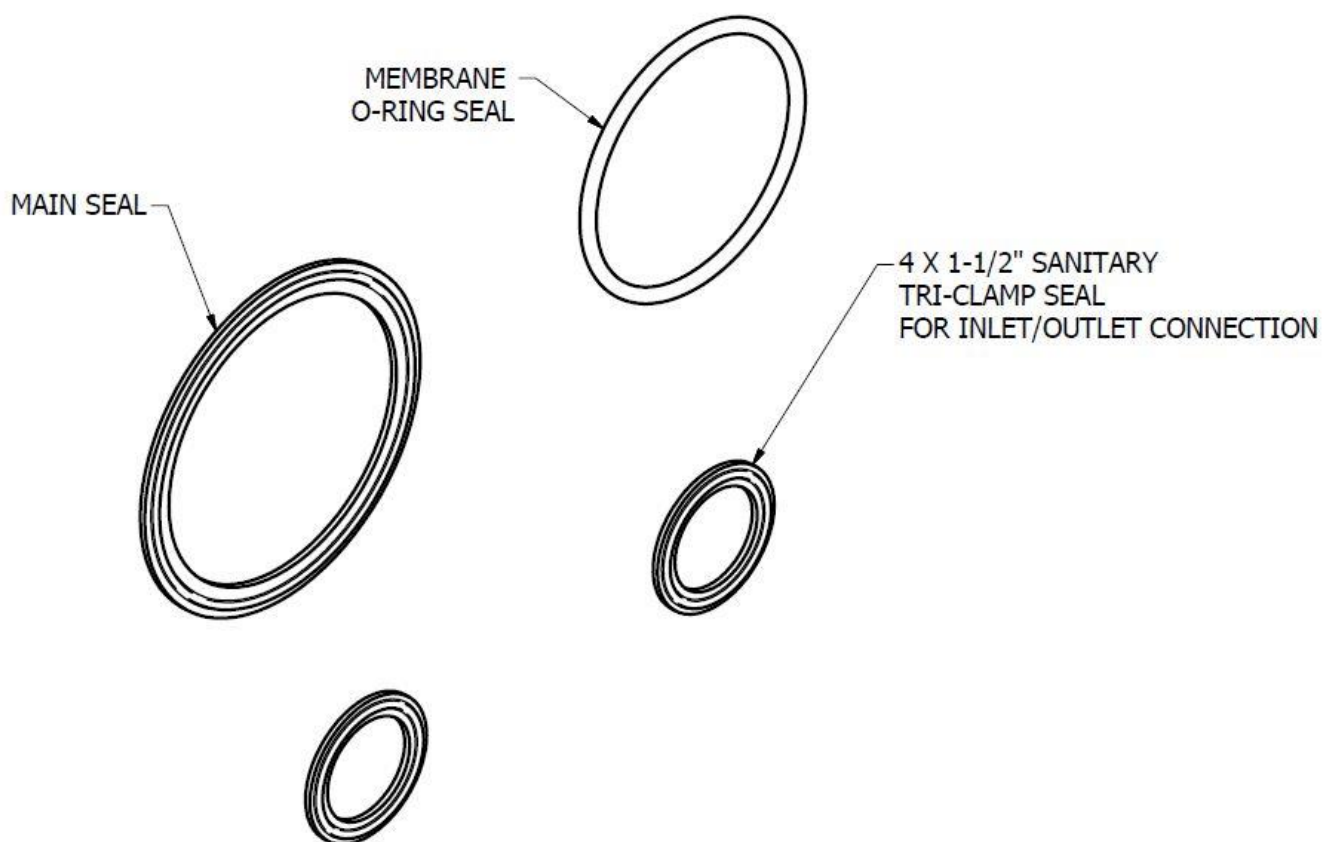

### Seal Kits - 90 mm Stainless Steel Disc Filter Holders

These seal kits are consisted of our (4) seals for the assembly and connection of the 90mm disc holder. The seal kits are available in three different material (Silicone, EPDM, BUNA). The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 3: Seal Kit Part Numbers*

Seal Kits	
Part Number	Description
IFP-141-0010	SEALS, DISC HOLDER, 90MM, SILICONE, KIT
IFP-141-0011	SEALS, DISC HOLDER, 90MM, EPDM, KIT
IFP-141-0012	SEALS, DISC HOLDER, 90MM, BUNA, KIT

Refer to Figure 5 for the contents in a typical seal kit.

*Figure 5: Typical Seal Kit Content*

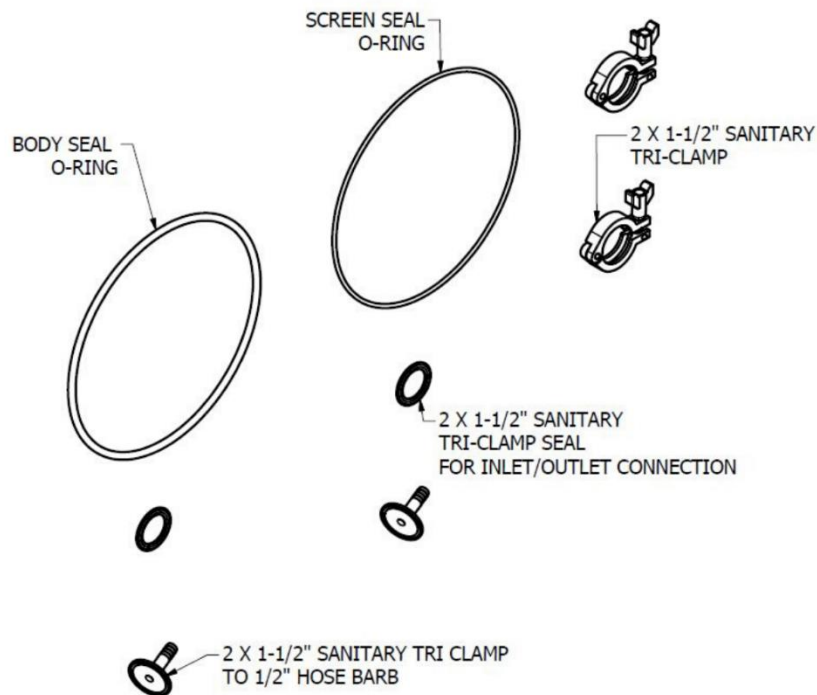

## Fitting-Clamp-Seal Kits - 90 mm Stainless Steel Disc Filter Holders

These fitting, clamp, & seal kits provide you with four (4) seals, two (2) tri-clamp and two fittings (2) for the assembly and connection of the 90 mm disc holder. The seals are available in three different material (Silicone, EPDM, BUNA). The material of the clamps and fittings is 304 stainless steel. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 4: Fitting-Clamp-Seal Kit Part Numbers*

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0013	FITTING-CLAMP-SEALS, DISC HOLDER, 90MM, SILICONE, KIT
IFP-141-0014	FITTING-CLAMP-SEALS, DISC HOLDER, 90MM, EPDM, KIT
IFP-141-0015	FITTING-CLAMP-SEALS, DISC HOLDER, 90MM, BUNA, KIT

Refer to Figure 6 for the contents in a typical fitting-clamp-seal kit.

*Figure 6: Typical Fitting-Clamp-Seal Kit Content*

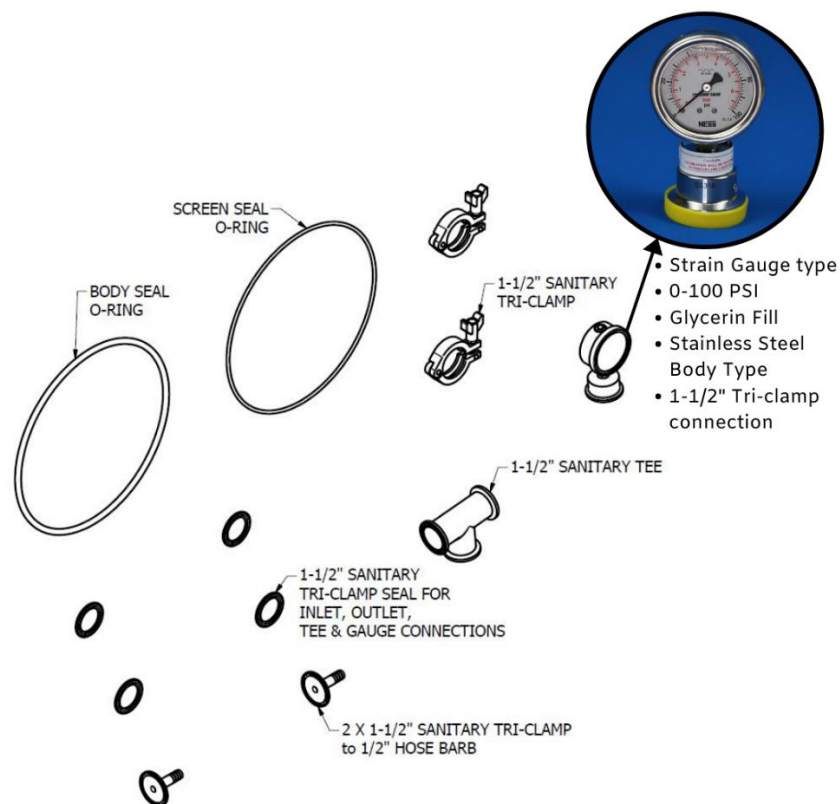

### Gauge-Fitting-Clamp-Seal Kits - 90 mm Stainless Steel Disc Filter Holders

These gauge, fitting, clamp, & seal kits provide you with six (6) seals, two (2) tri-clamp and two fittings (2) for the assembly and connection of the 90 mm disc holder. A pressure gauge can be connected through a tee connector to measure the fluid pressure into the system. The seals are available in three different material (Silicone, EPDM, BUNA). The material of the clamps, fittings and the tee connector are 304 stainless steel. The pressure gauge has 304 Stainless Steel Case with 316 Stainless Steel Connection and the pressure range is 0-100 psi. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 5: Fitting-Clamp-Seal Kit Part Numbers*

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0016	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 90MM, SILICONE, KIT
IFP-141-0017	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 90MM, EPDM, KIT
IFP-141-0018	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 90MM, BUNA, KIT

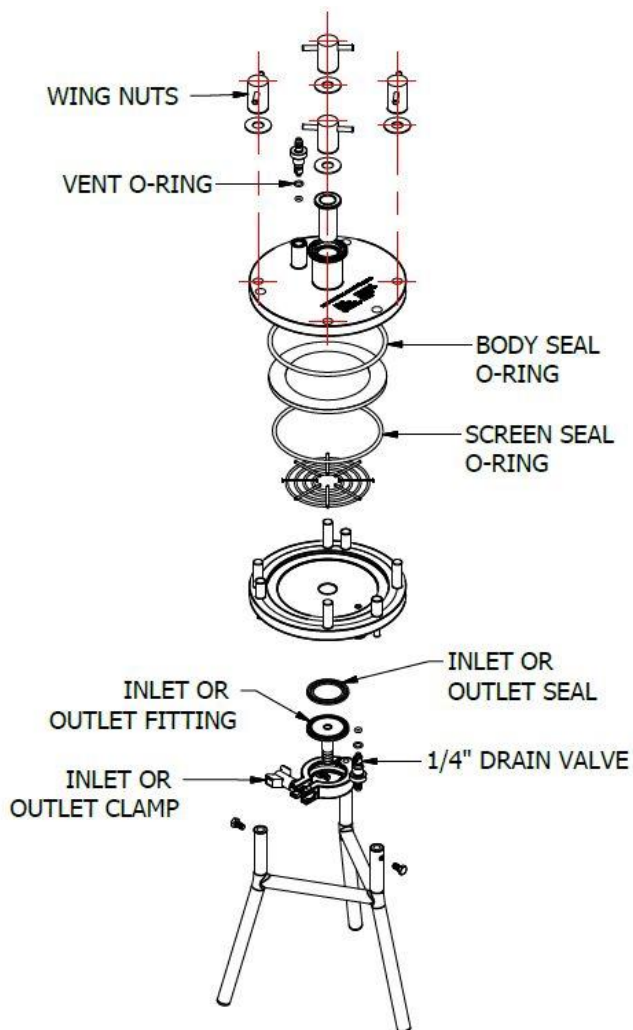

Refer to Figure 7 for the contents in a typical gauge-fitting-clamp-seal kit.

*Figure 7: Typical Gauge-Fitting-Clamp-Seal Kit Content*

## Accessories Kit – 142 mm Stainless Steel Disc Filter Holders

The section has been created to identify the necessary accessory kits for complete assembly of 142 mm Stainless Steel Disc Filter Holders. The accessory kits have been divided into four categories which let customers to choose their preferred kit accessories.

*Figure 8: Exploded view of Stainless-Steel Disc Holder 142mm*

Figure 8 represents the exploded view of a 142 mm stainless-steel disc filter holder and identifies the mandatory accessories for a complete assembly of the product without any inlet or outlet connection.

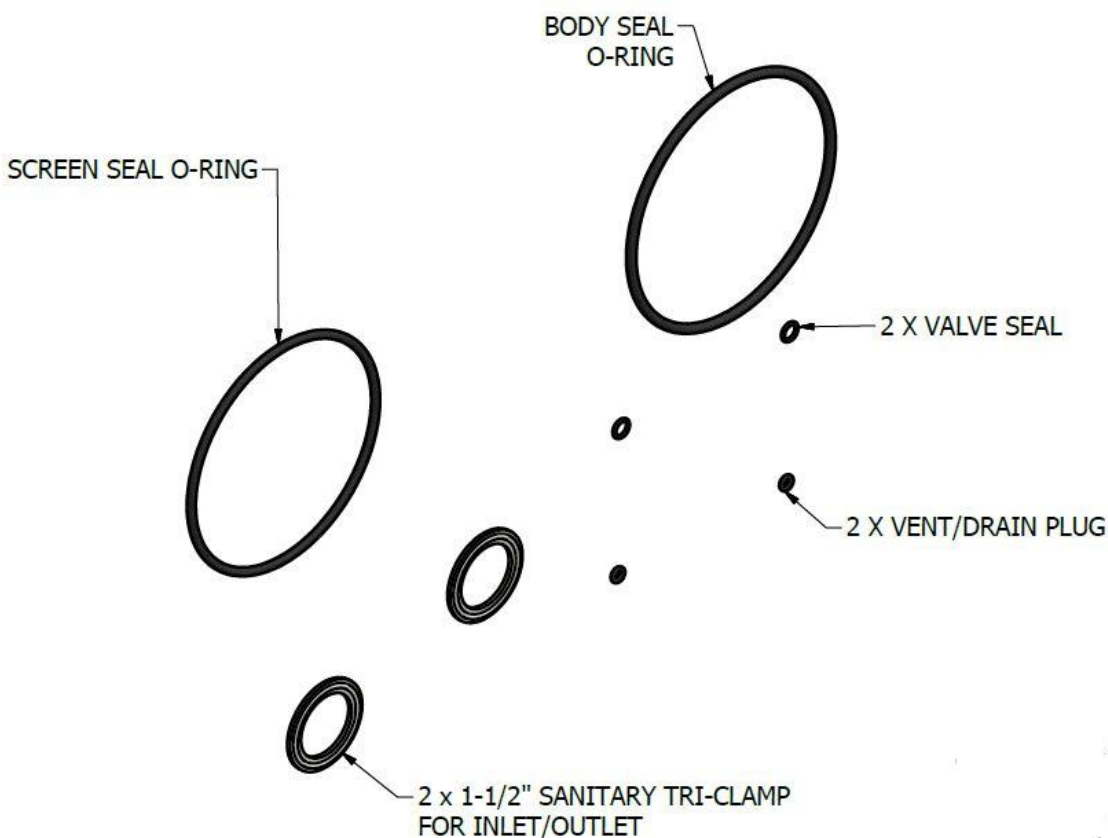

### Seal Kits - 142 mm Stainless Steel Disc Filter Holders

These seal kits provide you with Eight (8) seals for the assembly and connection of the 142mm disc holder. The vent/drain seals and vent plus are also included. The seal kits are available in three different material (Silicone, EPDM, BUNA). The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 6: Seal Kit Part Numbers*

Seal Kits	
Part Number	Description
IFP-141-0019	SEALS, DISC HOLDER, 142MM, SILICONE, KIT
IFP-141-0020	SEALS, DISC HOLDER, 142MM, EPDM, KIT
IFP-141-0021	SEALS, DISC HOLDER, 142MM, BUNA, KIT

Refer to Figure 9 for the contents in a typical seal kit.

*Figure 9: Typical Seal Kit Content*

### Fitting-Clamp-Seal Kits - 142 mm Stainless Steel Disc Filter Holders

These fitting, clamp, & seal kits provide you with Eight (8) seals, two (2) tri-clamp and two fittings (2) are for the assembly and connection of the 142 mm disc holder. The vent/drain seals and vent plus are also included. The seals are available in three different material (Silicone, EPDM, BUNA). The material of the clamps and fittings is 304 stainless steel. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 7: Fitting-Clamp-Seal Kit Part Numbers*

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0022	FITTING-CLAMP-SEALS, DISC HOLDER, 142MM, SILICONE, KIT
IFP-141-0023	FITTING-CLAMP-SEALS, DISC HOLDER, 142MM, EPDM, KIT
IFP-141-0024	FITTING-CLAMP-SEALS, DISC HOLDER, 142MM, BUNA, KIT

Refer to Figure 10 for the contents in a typical fitting-clamp-seal kit.

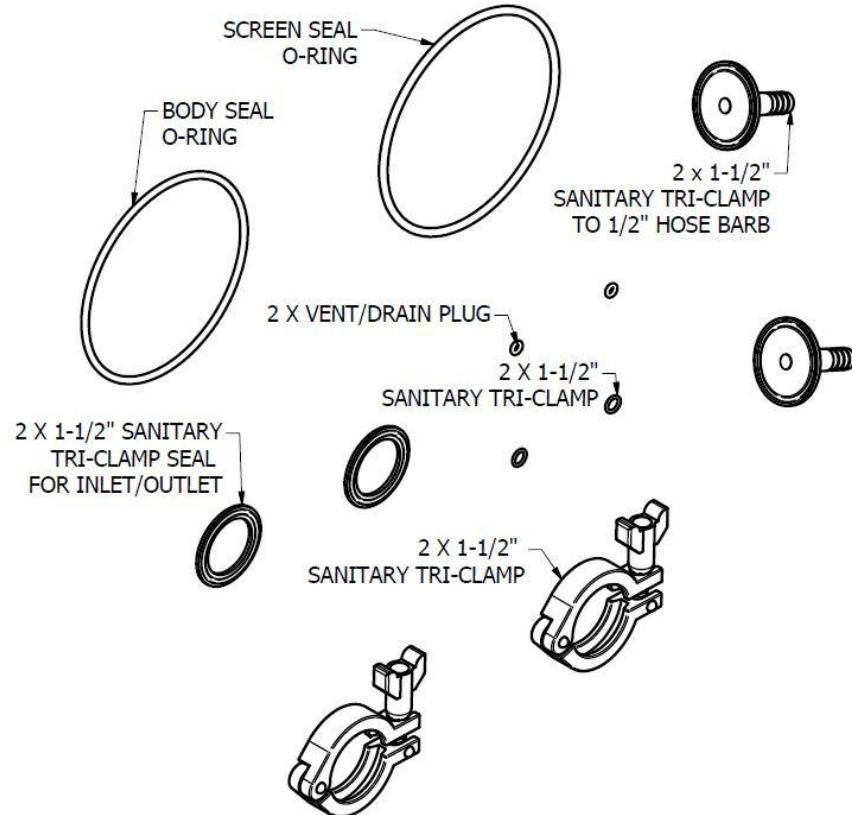

Figure 10: Typical Fitting-Clamp-Seal Kit Content

### Gauge-Fitting-Clamp-Seal Kits - 142 mm Stainless Steel Disc Filter Holders

These gauge, fitting, clamp, & seal kits provide you with Ten (10) seals, two (2) tri-clamp and two fittings (2) are required for the assembly and connection of the 142 mm disc holder. The vent/drain seals and vent plus are also included. A pressure gauge can be connected through a tee connector to measure the fluid pressure into the system. The seals are available in three different material (Silicone, EPDM, BUNA). The material of the clamps, fittings and the tee connector are 304 stainless steel. The pressure gauge has 304 Stainless Steel Case with 316 Stainless Steel Connection and the pressure range is 0-100 psi. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

Table 8: Fitting-Clamp-Seal Kit Part Numbers

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0025	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 142MM, SILICONE, KIT
IFP-141-0026	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 142MM, EPDM, KIT
IFP-141-0027	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 142MM, BUNA, KIT

Refer to Figure 11 for the contents in a typical gauge-fitting-clamp-seal kit.

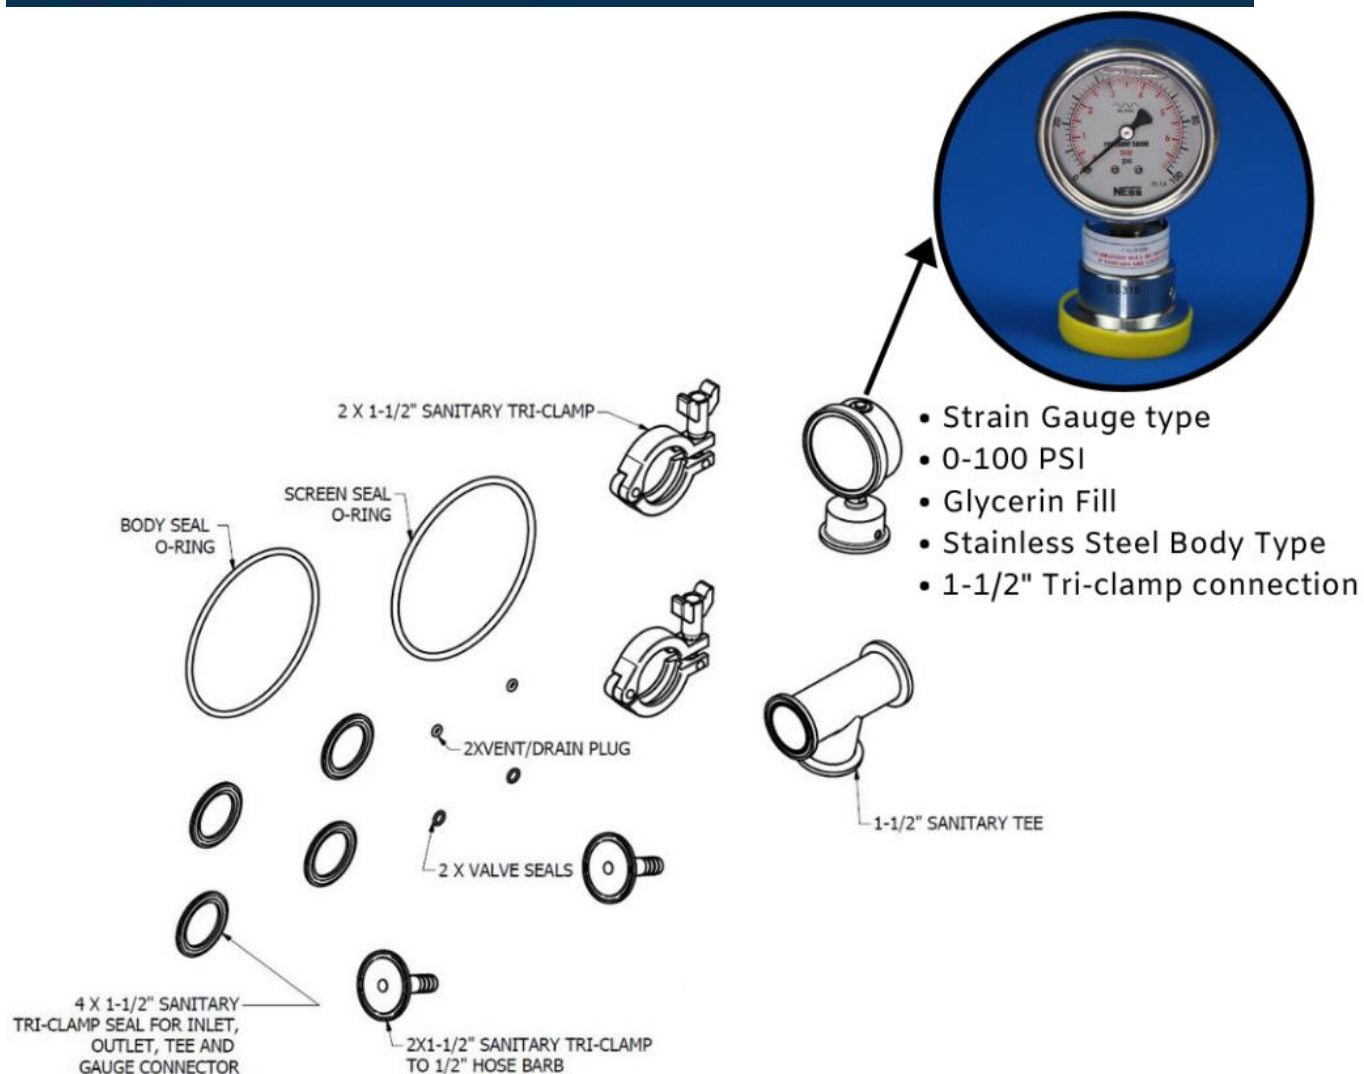

Figure 11: Typical Gauge-Fitting-Clamp-Seal Kit Content

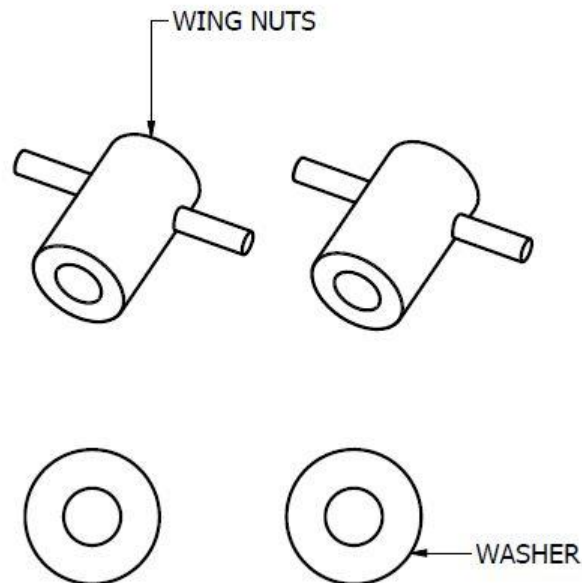

### Hardware Kits - 142 mm Stainless Steel Disc Filter Holders

Hardware kits are available for the 142 stainless steel disc holders. The product comes with four (4) wingnuts and four (4) washers. The spare hardware kit also comes in a package of two (2) wingnuts and two (2) washers. The material of the wingnuts is 304 stainless steel and the washer is 304 stainless steel. The following table outlines the accessories kit.

*Table 9: Hardware Kit Part Numbers*

Hardware Kits	
Part Number	Description
IFP-141-0028	HARDWARE, DISC HOLDER, 142MM

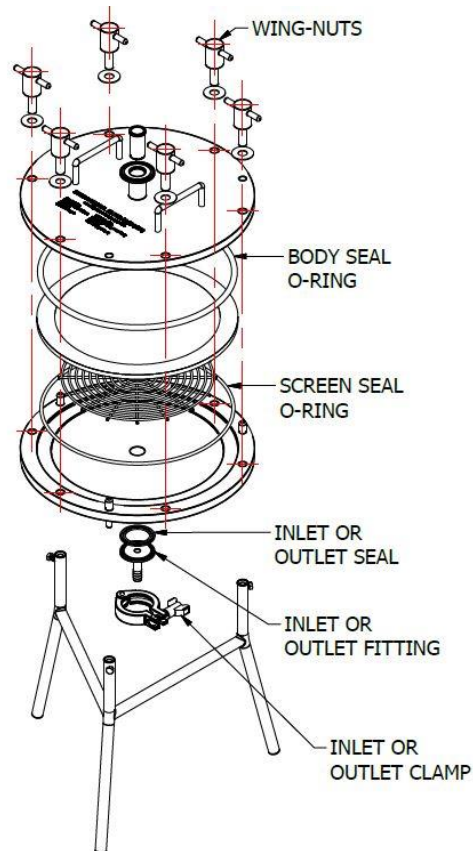

Refer to Figure 12 for the contents in a typical hardware kit.

*Figure 12: Typical Hardware Kit Content*

## Accessories Kit – 293 mm Stainless Steel Disc Filter Holders

The section has been created to identify the necessary accessory kits for complete assembly of 293 mm Stainless Steel Disc Filter Holders. The accessory kits have been divided into four categories which let customers to needed accessory kit.

*Figure 13: Exploded view of Stainless-Steel Disc Holder 142mm*

Figure 13 represents the exploded view of a 293 mm stainless-steel disc filter holder and identifies the mandatory accessories for a complete assembly of the product without any inlet or outlet connection.

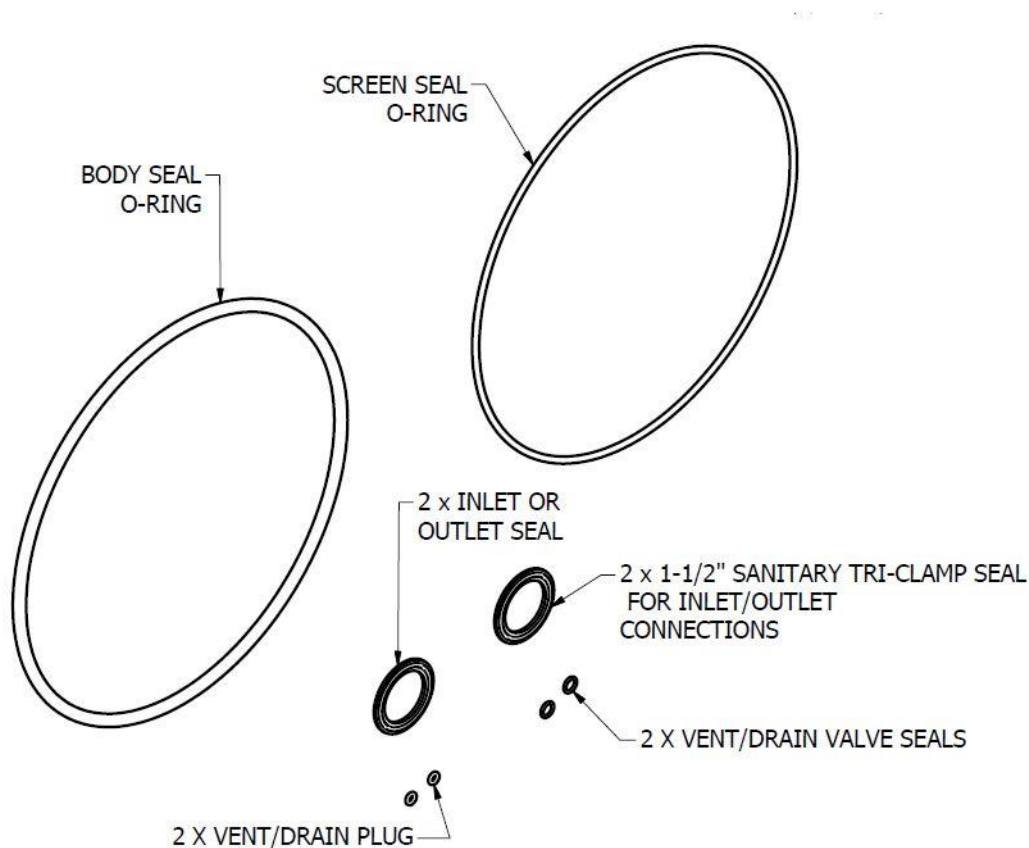

### Seal Kits - 293 mm Stainless Steel Disc Filter Holders

These seal kits provide you with Eight (8) seals are required for the assembly and connection of the 293mm disc holder. The vent/drain seals and vent plus are also included. The seal kits are available in three different material (Silicone, EPDM, BUNA). The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 10: Seal Kit Part Numbers*

Seal Kits	
Part Number	Description
IFP-141-0029	SEALS, DISC HOLDER, 293MM, SILICONE, KIT
IFP-141-0030	SEALS, DISC HOLDER, 293MM, EPDM, KIT
IFP-141-0031	SEALS, DISC HOLDER, 293MM, BUNA, KIT

Refer to Figure 14 for the contents in a typical seal kit.

*Figure 14: Typical Seal Kit Content*

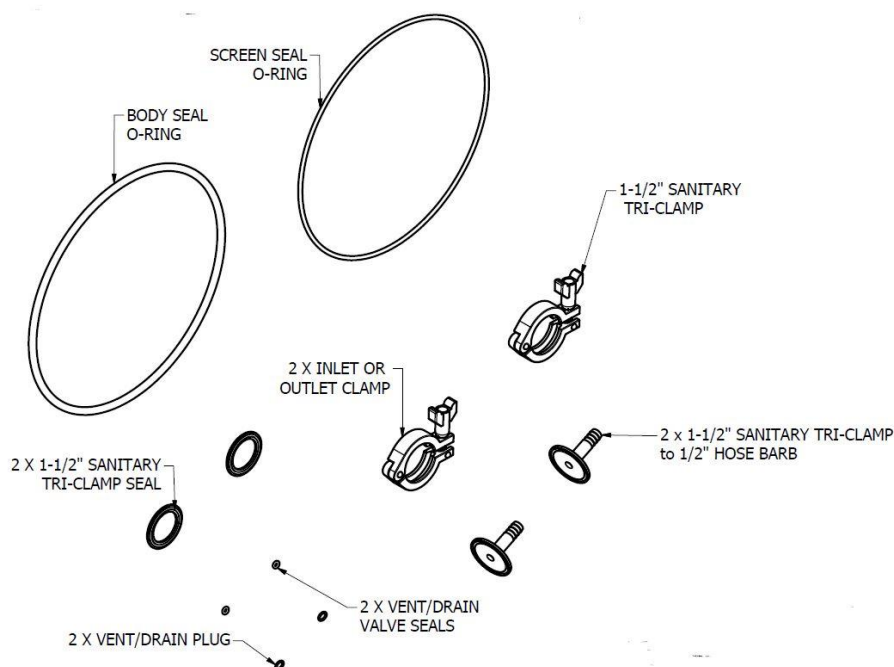

### Fitting-Clamp-Seal Kits - 293 mm Stainless Steel Disc Filter Holders

These fitting, clamp, & seal kits provide you with Eight (8) seals, two (2) clamps and two fittings (2) for the assembly and connection of the 293 mm disc holder. The vent/drain seals and vent plus are also included. The seals are available in three different material (Silicone, EPDM, BUNA). The material of the clamps and fittings is 304 stainless steel. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

*Table 11: Fitting-Clamp-Seal Kit Part Numbers*

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0032	FITTING-CLAMP-SEALS, DISC HOLDER, 293MM, SILICONE, KIT
IFP-141-0033	FITTING-CLAMP-SEALS, DISC HOLDER, 293MM, EPDM, KIT
IFP-141-0034	FITTING-CLAMP-SEALS, DISC HOLDER, 293MM, BUNA, KIT

Refer to Figure 15 for the contents in a typical fitting-clamp-seal kit.

*Figure 15: Typical Fitting-Clamp-Seal Kit Content*

### Gauge-Fitting-Clamp-Seal Kits - 293 mm Stainless Steel Disc Filter Holders

These gauge, fitting, clamp, & seal kits provide you with Ten (10) seals, two (2) tri-clamp and two fittings (2) for the assembly and connection of the 293 mm disc holder. The vent/drain seals and vent plus are also included. The pressure gauge can be connected through a tee connector to measure the membrane filter pressure. The seals are available in three different material (Silicone, EPDM, BUNA). The material of the clamps is 304 stainless steel, fittings and the tee connector are 316L stainless steel. The pressure gauge has 304 Stainless Steel Case with 316 Stainless Steel Connection and the pressure range is 0-100 psi. The following table outlines the three different versions of the accessories kit. Viton and PTFE are available upon request.

Table 12: Fitting-Clamp-Seal Kit Part Numbers

Fitting-Clamp-Seal Kits	
Part Number	Description
IFP-141-0035	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 293MM, SILICONE, KIT
IFP-141-0036	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 293MM, EPDM, KIT
IFP-141-0037	GAUGE-FITTING-CLAMP-SEALS, DISC HOLDER, 293MM, BUNA, KIT

Refer to Figure 16 for the contents in a typical fitting-clamp-seal kit.

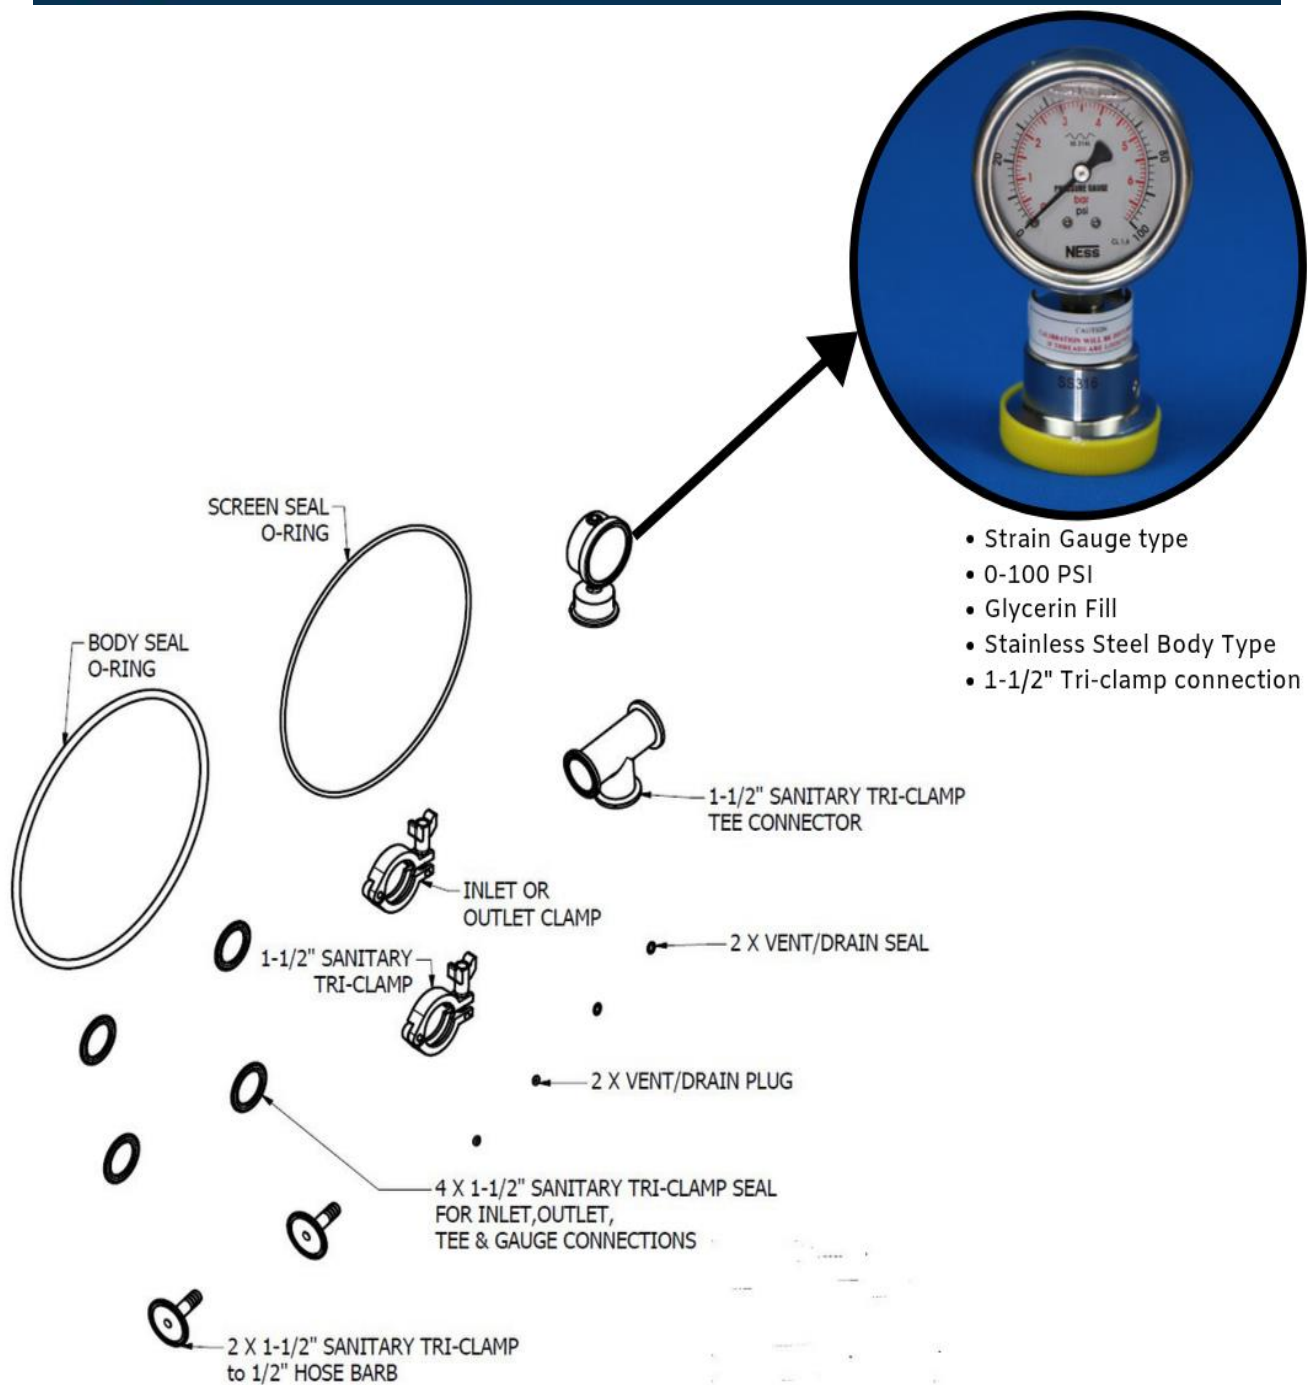

Figure 16: Typical Gauge-Fitting-Clamp-Seal Kit Content

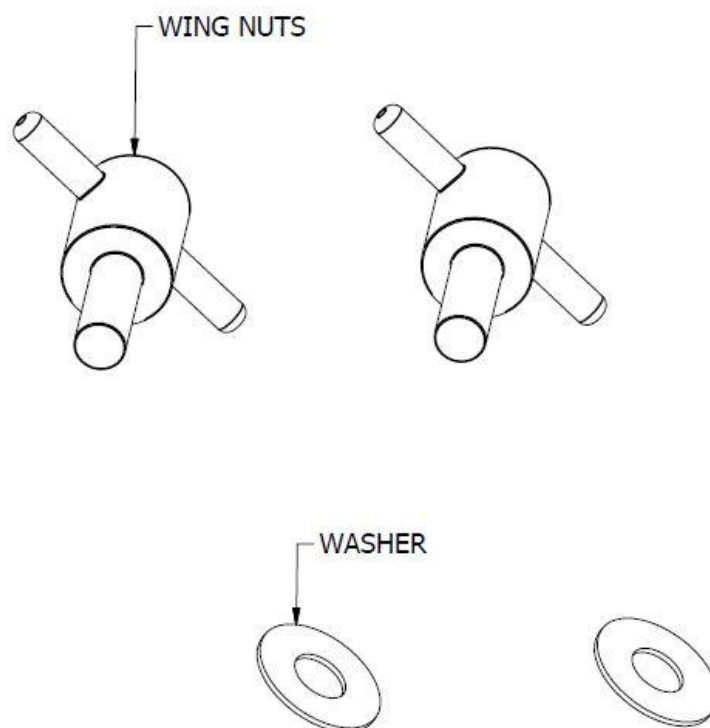

## Hardware Kits - 293 mm Stainless Steel Disc Filter Holders

Hardware kits are available for the 293 stainless steel disc holders. The product comes with Two (6) wingnuts and six (6) washers. The spare hardware kit also comes in a package of two (2) wingnuts and two (2) washers. The material of the wingnuts is 304 stainless steel and the washer is 304 stainless steel. The following table outlines the accessories kit.

*Table 13: Hardware Kit Part Numbers*

Hardware Kits	
Part Number	Description
IFP-141-0038	HARDWARE, DISC HOLDER, 293MM

Refer to Figure 17 for the contents in a typical hardware kit.

*Figure 17: Typical Hardware Kit Content*
