Making the earth better

Rocky Point- ActivGrow® Healthy Yield Organic Soil Improver

Environmentally friendly, fuss-free and perfect for improving the health of tired soil, ActivGrow is a proven and simple solution any gardener can use to make the earth they cultivate, and live on, better for this and future generations.

Available in 30 L & 50 L bags

ActivGrow® Organic Soil Improver

Enriched with 16 active ingredients to improve soil health and yield

Available in 30 L & 50 L bags

Better Earth Selection System

Soil Improver

ActivGrow is enriched with 16 active ingredients to improve soil health and yield. Containing a blend of composted chicken manure, composted cow manure, rich organic compost, clinker, zeolite, gypsum, calcium, seaweed, molasses, silica, soft rock phosphate, sulphate of potash, meat meal, bone meal, carbon and active microbes.

ActivGrow healthy yield organic soil improver is a professional agriculture grade blend and a better earth product suitable for all garden types, but most popular for preparing vegetable gardens.

Certifications

Features & Benefits

- Creates a balanced, nutrient rich growing environment that ensures spectacular growth
- Ideal for planting raised garden beds, planter boxes, herb gardens & large containers
- ActivGrow can be used on all garden types, but is best suited for vegetable gardens
- Designed to absorb and retain water
- Ideal in the preparation of planting fruit trees and building up garden beds

How to use

The fully composted enriched formula can be added into in-ground garden beds, raised garden beds and planter boxes.

1. After removing weeds, apply a 50 – 100 mm layer of ActivGrow over the top of your soil.
2. Dig in well to a depth of at least 150 mm.
