innovate | inspire

## FEATURES

All in one with compact size, built-in printer and customer display

Three Screen sizes with zero-bezel projected capacitive touch screens

Android 4.2 OS based for free license or Windows Based

Low power consumption for high reliability

Waterproof structure design for spill proof

Tools free for easy maintenance

Capacitive touch screen POS with Android platform. POS100 is an all-in-one compact terminal with built-in thermal printer and customer display. It largely saves space and makes the machine easy to manage. Based on Android 4.2 OS, with its open platform which is easy for software developers. The POS100 has an artistic design with aluminium housing and bezel. It is an ideally cost effective terminal for various industrial applications and traditional Point Of Sale.
