STONE BASIN MATT FINISH CARE INSTRUCTIONS

To maintain the matt finish of our products, we recommend regular cleaning with warm soapy water. Ideally, clean the product promptly after use, rinse it with water, and dry it with a soft cloth. Avoid coloured liquids to prevent staining.

Cleaning agents may be used, but please adhere to the instructions on your chosen cleaner's packaging. For persistent stains, consider using a cream cleaner like CIF or AJAX.

For a thorough monthly cleaning, we strongly advise using a Wet & Dry sandpaper pad, which effectively eliminates stubborn stains and fine scratches.

Apply the pad with ample warm soapy water. If you need a replacement sandpaper pad or have misplaced yours, these are readily available in most major DIY stores.

CAUTION

- Avoid using concentrated bleach.
- Refrain from using tar-based shampoo.

MATT PRODUCT REPAIR

To address surface scratches, you can polish them out using various grades of sandpaper, depending on the scratch depth. Once the imperfection is resolved, use the fine-grade sandpaper provided with your product to achieve a smooth finish.
