Finishes

Price group 1

Front and carcase

White, taupe,fango or anthracite matt silk lacquer

Panels

White, taupe,fango or anthracite matt silk lacquer

Concrete or rust-effect look

Price group 2

Front and carcase

White, taupe,fango or anthracite matt silk lacquer

Panels

Honey oak timber or natural knotty walnut

Planning information for display-unit rear panels in a contrast finish:

If display-unit rear panels are required in a different finish to the carcase, e.g. a different lacquer finish, concrete or rust-effect look, or veneer, they must be ordered and charged separately.

The colour and wood finishes have been specifically created for Gwinner products and can therefore not be found in any standard. The colour samples provide an approximate reproduction and serve only as a guide.

Product information

Felino has been awarded the DGM mark of quality by the German Furniture Quality Association

Country of manufacture: Germany

Materials used:

The fronts are made from 19-mm-thick MDF panels in all lacquer finishes. Sides, shelves, panels and rear panels are made from chipboard. Visible surfaces are lacquered. Veneered or lacquered panels are 33-mm thick, and rear panels are 5-mm thick.

The drawers are mounted on soft-close, cushioned partial-extension Quadro runners, and have been tested 40,000 times.

Doors and glass doors are mounted on nickel-plated, three-way adjusting, fast-assembly metal cup hinges, which have been tested 40,000 times. It is guaranteed that functionally compatible replacement parts will be available for all wear parts for at least five years.
Display-unit doors and panel shelves are made from parasol grey float glass, glass shelves are made from clear float glass.

Load-bearing capacity:

Base-elements drawers have a load-bearing capacity of 15 kg; all other drawers have a load-bearing capacity of 10 kg when loaded evenly.
Wooden shelves have a load-bearing capacity of 15 kg; glass shelves have a load-bearing capacity of 10 kg; additional information relating to load-bearing capacity can be found on the relevant elements.

Home hygiene:

Felino meets the requirements for a healthy home environment, it has been tested for harmful substances in accordance with the RAL-GZ 430/1-1 standard from the RAL Deutsches Institut für Gütesicherung und Kennzeichnung (RAL German Institute for Quality Assurance and Certification).

Care instructions:

Wipe with a dry duster or a slightly damp cloth. The lacquers used are highly resistant to abrasion in accordance with DIN 68861.

Electrics:

All lighting elements and connection cables are VDE-tested.

Energy usage:

The LED lights used correspond to the energy classes **A**++ to **A** on a scale of **A**++ (most efficient) to **E** (least efficient). The bulbs in the LED lights cannot be replaced.

Subject to errors, as well as design, colour and material modifications as part of technical progress.

Product information

Quality features:

All visible carcase parts are lacquered on the outside and inside.

The drawers are mounted on soft-close, partial-extension Quadro runners. Soft-close full-extension runners are available at a surcharge.

The all-metal clip-on hinges are adjustable in three directions. All doors are soft-closing as standard.

Veneer features:

Please note that every piece of precious veneer is unique and can vary widely from one veneer trunk to another by its very nature. Despite our veneer specialists taking the greatest care, variations from brochure illustrations and unit samples cannot be ruled out.

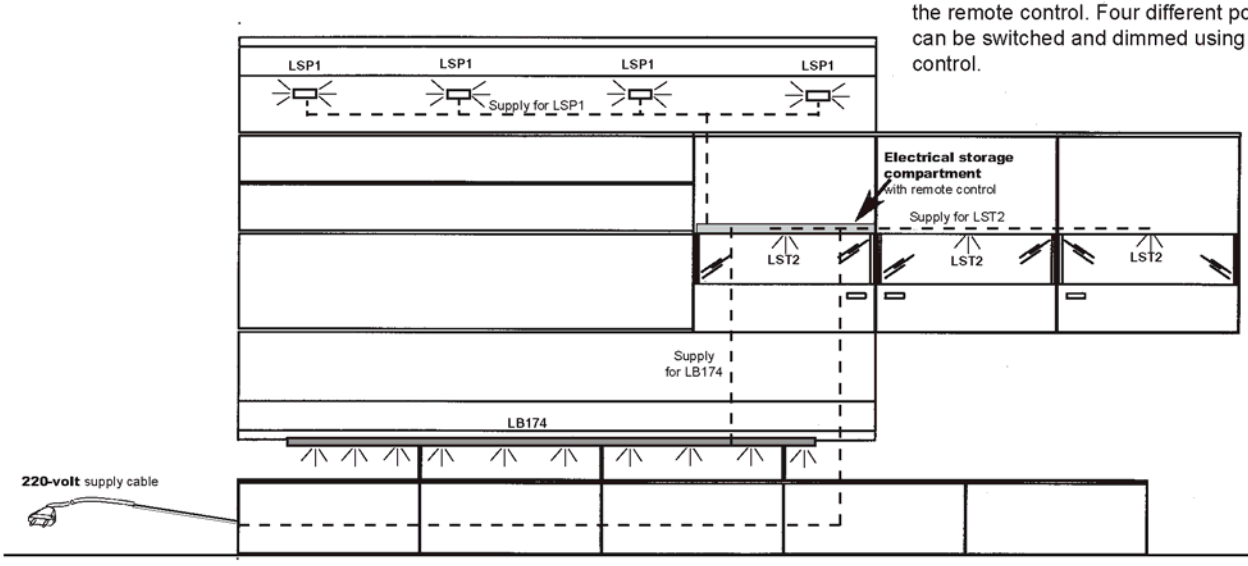
For oak timber and knotty walnut, veneers with cracks and knots are purposely chosen and filled to be darker. Only this time-consuming process gives the panels and display-unit rear panels their desired natural character. We would like to expressly state that these growth and processing characteristics are desired features on the Felino and they increase the value by being unique, and cannot therefore be seen as a quality defect.

Electrical installation:

The following drawing offers a schematic view of the electrical installation positions and routing. The illustrations of the wiring, lighting and electrical storage compartment are only symbolic and are not to scale. Except for the cable duct, the wiring shown is on the rear of the elements.

A white, paintable cable duct is supplied to optimise the cable routing between the base element and wall units or angled shelf. The cable duct can be glued or screwed to the wall. Depending on the cable cross-section, one to three cables can be laid in the duct.

The wireless receiver, distributors, connecting cable and transformers are located in the electrical storage compartment. Operation is via the remote control. Four different power circuits can be switched and dimmed using the remote control.



Planning and ordering information

Felino can be configured in any way using the planning programme

furnplan

Only the current type list applies for price, dimensions and design information.

Have you included everything in your plan?

The following information is required for the Felino:

- **The lacquer colour for front and carcase**
- **The finish for the panels and display-unit rear panels**
- **Positioning sequence or sketch for freely designed configurations**
- **Accessories and lighting, if required**

- **Send orders via e-mail to: auftrag@gwinner.de**

! When including lighting, we recommend using the electrical storage compartment with radio remote control. As a result, all transformers, connectors and distributors are neatly stored away but are still easily accessible; all lighting can be operated using the remote control.

Please note that the delivery time may be extended if an order is unclear or incomplete. Please ensure you provide all details when placing your order to enable us to process your order quickly and correctly.

Options for varying wall combinations

- Wall combinations can be extended by incorporating additional elements. The order in which elements are positioned can be changed or reversed at no extra cost.
- For a **single** modification charge of any number of parts from a wall combination can be exchanged with parts from the type list.
- If the price of the new type/types is higher, the difference in element price must be added to the modification charge. Lower prices will not be refunded.

When ordering, please specify the order number of the wall combination on which your order is based. This number enables us to process the requested modifications.

Wall combinations with low base elements (1.5 increments) Prices excluding lighting and accessories

Accessories

Article	Order no.		Description
Lighting and switches			
Flush-mounted LED spotlight	LST2		 For display units. 12 volt/2.6 watt, concealed cable duct, length: 4 metres. Only available with LED transformer.
LED light for panels	LSP1		 Cable length: approx. 4 metres. Transformer required. 12 volt/1 watt.
LED lighting for 130-cm-wide panels	LB114		1 LED light, length: 114 cm, cable length: approx. 4 metres. Transformer required. 12 volt/3.3 watt.
LED lighting for 195-cm- and 227.5-cm-wide panels	LB174		1 LED light, length: 174 cm, cable length: approx. 4 metres. Transformer required. 12 volt/5.1 watt. Diese Produkte enthalten Lichtquellen der Energieeffizienzklasse **<F>** auf einer Skala von **A** (höchste Effizienz) bis **G** (geringste Effizienz). Die Lichtquellen in den LED-Beleuchtungen sind nicht tauschbar.
LED transformer 15 watt	LEVG15		 12 volt/15 watt, suitable for max. 6 connections. Cable length: approx. 5 metres, switch on the supply cable.
LED transformer 30 watt	LEVG30		 12 volt/30 watt, suitable for max. 10 connections. Cable length: approx. 5 metres, switch on the supply cable.
Radio remote control for LED lighting	FKS4		 A maximum of four power circuits can be switched and dimmed using the remote control. Six light fixtures can be included in each power circuit. Normally, a 15-watt **LEVG15** transformer is sufficient, but if the connected light fixtures require more than 15 watt in total, please use the **LEVG30** transformer with 30 watt.
Electrical storage compartment with radio remote control Fitted behind 65-cm-wide doors for carcase depths of 41.2 cm 48.8-cm-wide doors for carcase depths of 41.2 cm 65-cm-wide doors for carcase depths of 49.2 cm	LES65F LES49F LES65KF		 Please specify the element in which the electrical storage compartment should be fitted. The integrated radio remote control has four connections. A maximum of four power circuits can be switched and dimmed. As the top cover is a removable wooden shelf, the full cabinet depth can therefore be used.
Wooden shelves			
Wooden shelf for 65-cm-wide types at depths of 41.2 cm	FA65		Additional wooden shelf behind doors, 61.1 x 33 x 1.9 cm
Wooden shelf for 48.8-cm-wide types at depths of 41.2 cm	FA49		Additional wooden shelf behind doors, 44.9 x 33 x 1.9 cm
Wooden shelf for 65-cm-wide types at depths of 49.2 cm	FAK65		Additional wooden shelf behind doors, 61.1 x 41 x 1.9 cm

Accessories

Article	Order no.		Description
