Material information

Solid wood furniture

Real wood furniture is durable and keeps its value. The surface is always unique, giving each piece of furniture an individual charm. The solid wood we use comes from controlled forestry operations in the EU and North America. In our European oak, small and large knots and knot cracks are natural characteristics of solid wood and do not represent a quality defect. Open knots (except for hairline cracks) are filled with wood colour on the door fronts. Knots on the back of the doors remain natural and untreated.

Colour

Furniture with colour finish has an evenly attractive, hard-wearing surface. The surfaces are coated with very high-quality, easy-care furniture decor foil.

Load-bearing capacity

The load limits for all furniture and extras can be found in the load table at: <https://qrco.de/rauch-belastungstabelle>

Raw materials from nature

In the production of the wood-based materials for our furniture, we rely exclusively on uncontaminated, fresh weak and storm wood from local, sustainable forestry operations. Strict tests by neutral institutes continuously confirm the safety of materials and processes.
