We have been Bitten by the design bug, and are designing objects that will bring a smile to your face. If you buy the items for your shop or your friends we want it to bring some joy to everybody's life. Our inspiration is found in the world around us, at the dinner table, on walks in the woods, with friends and on the city streets.

Life can be amazing, lets all enjoy it in 2024

XOXO the Bitten team

## STORM GLASS COLLECTION

Weather predicting instruments.

Use the storm glass to predict the weather, as Admiral Fitzroy did on his classic voyage with Charles Darwin, aboard the HMS Beagle. Whether on the high seas, the captain's table or at your home, the liquid inside the storm glass will crystallise to indicate what the weather has in store. This reworking of a classic device will add some atmosphere to your day.
