Contents

1. Safety Instructions

This user manual includes important safety information. Please read below instructions carefully. It may be dangerous or illegal if you do not follow these instructions.

Pay attention to Traffic Safety

Obey local traffic laws and do not use the phone while driving. Using a cell phone while driving is dangerous and it is illegal in some areas. Radio frequency (RF) signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (antilock) braking systems, electronic speed control systems, and air bag systems. For more information, check with the manufacturer of your vehicle for any equipment that has been added. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area.

Pacemaker Interference

Pacemaker manufacturers recommend that a minimum separation of 15.3 centimeters (6 inches) be maintained between a wireless phone and a pacemaker in order to avoid potential interference with the pacemaker.

⚕️ Turn Off Your Cell Phone in Medical and Health Care Facilities.

Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

✈️ Switch Off on Airplanes

Using your device while flying in aircraft is prohibited. Switch off your device before boarding an aircraft. The use of wireless devices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

🔋 Accessories and Batteries

Use only the approved accessories and batteries. Please do not try to use with any product that was not manufactured for use with this phone. Please be sure the phone has been switched off before taking out the battery. Please dispose of scrap batteries properly according to the local regulations.

Cell Phone Should Be Turned Off Near Sites of Explosion.

Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refueling points such as near gas pumps at service stations and in any area with a potentially explosive atmosphere and obey all signs and instructions. Observe restrictions on the use of radio equipment in fuel depots, storage, chemical plants or where blasting operations are in progress.

Using the Phone Correctly

Please use this phone in its normal intended position. Do not let children use the phone without supervision. Your phone contains small parts such as SIM card, which can be accidentally swallowed by a child.

Your Phone is Not Waterproof

This phone is not waterproof. Please do not expose your phone to wet weather or environment (such as rain, snow, seawater, etc.).
Remove the Back Cover

Open the battery cover carefully by prising open from the bottom left corner where you will find a small notch.

Install the SIM card and battery

For availability and information about using SIM card services, contact your SIM card vendor. This may be the service provider, network operator, or other vendor.

Note: The SIM card and its contacts are easily damaged by scratches or bending, so please be careful when handling, inserting, or removing the card.

Note: Keep all SIM cards out of the reach of small children.

1. Ensure the phone is switched off and the charger is disconnected before removing the battery.

2. With the back cover removed, install the SIM card by sliding it into its nest (SIM) and under the metal holding plate. Ensure the angled corner is on the lower right hand side. (To remove the SIM card, gently press on it and slide it out of its nest.) Please note you can only use a standard SIM card not a Micro or Nano SIM. You can also install a microSD memory card into the slot above the SIM slot.

Micro SD

SIM
3. Install the battery into the battery slot, ensuring that the three metallic stripes on the battery align with the three metallic prongs in the battery slot.
4. Put on the battery cover. Ensure the cover is completely closed and the matching sound (click) could be heard.
5. Plug the phone in to charge it fully. You can also use the included dock charger to charge the phone easily.

Turning the Phone On

To turn the phone on, press and hold the 📞 red key until the screen lights up. If you switch on the mobile phone before inserting the SIM card, it prompts you to insert the SIM card. The mobile phone checks whether the SIM card is valid automatically after it is inserted.

The following prompts appear on the screen in sequence when the mobile phone is just switching on:
- **Input phone password** - If the password of the phone has been set.
- **Input PIN** - If the password of the SIM card has been set.
- **Searching** - The mobile phone is searching for available network.
- **Language settings** - Defaults to English so just press the ▭ right soft key to confirm.
- **Set Date** - Type in the date here MM.DD.YYYY and press the ▭ left soft key.
- **Set Time** - Type in the time here in 24 hour style and press the left soft key then press the up or down key to set date.

Turning the Phone Off

To turn the phone off, press and hold the 📞 red key until the screen turns blank.

Charging the Battery

The battery can be charged when the phone is either

on or off. Please ensure the battery is inserted into the phone before charging. The charging time is three hours.
To connect the charger:
1. Insert the cord into its port on the right hand side of the phone
2. Plug the charger into a 240V electrical outlet.
To disconnect the charger:
1. Unplug the wall charger.
2. Remove the cord from the phone.

Charging Using the Docking Charger

You can also use the included docking charger for easy charging.
1. Simply plug the charger into the back of the dock
2. Place the phone into the dock to start charging.
3. Remove the phone when charging is complete.

Battery Level Indication

EMPTY   FULL

Low Battery Alert

The phone will sound an alert when the battery is low and display a message of low battery on the screen.

In the standby state press the ▬ left soft key to access the main menu.

Exit a menu: press the ▬ right soft key to return to the previous menu.

Enter the standby state: press the 📞 red key.

How to set Date and Time

As soon as your phone is charged, we recommend you set the date and time so you can retrieve voice messages and texts more easily.

1. Press the ▬ left soft key to enter the menu.
2. Press the 🔘 up or down key until "Settings" appears.
3. Press the ▬ left soft key.
4. Press the ▬ down key until "Phone Settings" appears.
5. Press the ▬ left soft key.
6. Press the ▬ down key until "Date & Time" appears. Press the ▬ left soft key.
7. Press the ▬ down key to select "Set time or Date". Press the ▬ left soft key.
8. Enter the time using the 24 hour clock.
9. Use the ▬ down key.
10. Enter the date In the format DD.MM.YYYY.
11. Press the ▬ left soft key to save.

12. To exit the settings, press the ▬ right soft key 4 times.

1. Press the 📞 green call key, this will take you to all your recently dialed call list.
2. Press the 📞 green call button again to call the number highlighted.

Making International Calls

1. Press the ✳ star key twice quickly until a "+" character appears on the screen.
2. Enter the country code, area code and phone number as instructed by your long distance network service carrier.
3. Press the 📞 green call key to complete the call.

Changing the Volume during a Call

To change the volume during a call:
• Press 🔋 up or down key.
• Press the ▬ right soft key to select "H-free" this will give you the loudest volume which is handy for those that are hard of hearing.

Storing, Searching and Deleting Numbers in the Phone Book

Phone numbers can be stored on the phone or the SIM card. The phone symbol indicates that the contact is saved in the phone. The SIM card symbol indicates that the contact is saved on the SIM card.

You can store up to 200 entries in the phone memory.

To Add a New Contact to the Phone Book

1. Press the ▭ left soft key to access the menu.
2. Press ▯ up or down key until "Contacts" appears.
3. Select the option "Contacts" by pressing the ▭ left soft key.
4. Press the ▭ left soft key to select "Options".
5. Press the ▭ left soft key to select "New contact".
6. Here you can select where you would like to save the number. You can choose either on the Sim card or to the phone. To select press the ▭ left soft key.
7. Enter the name of the new contact by using the number keypad. Press a key 1 to 4 times to enter the correct letter. Press "0" for space.
8. Scroll down then enter the number then press the ▭ left soft key then select save.

To Search for an Existing Contact

1. Press the ▭ left soft key to access the menu.

2. Press the ⬛ up or down key until "Contacts" appears.
3. Select the option "Contacts" by pressing the ▬ left soft key.
4. Scroll ⬛ up or down to search for the contact.
5. Press the 📞 green key to make a call .

To Delete an Existing Contact

1. Press the ▬ left soft key to access the menu.
2. Press the ⬛ up or down key until "Contacts" appears.
3. Select the option "Contacts" by pressing the ▬ left soft key.
4. Press the ⬛ up or down key to find the contact that you want to delete.
5. Select the contact by pressing the ▬ left soft key.
6. Press ⬛ up or down key until "Delete" displays.
7. Press the ▬ left soft key twice until the contact list displays.

To Edit Phone Numbers for Your Speed Dial

You can set up to 9 numbers for the speed dial using the number key from 2 to 9, and the M1 M1 key, M2 M2 key and M3 M3 key.

1. Press the ▬ left soft key to access the menu.
2. Press the ⬛ up or down key "SOS" appears.
3. Select option "SOS" by pressing the ▬ left soft key.
4. Press ⬛ up or down key until "Speed Dial" appears.
5. Press the ▬ left soft key. "set numbers" appears.
6. Press the ▬ left soft key.

7. Scroll ⬛ up and down to choose the correct key and press the ▬ left soft key to edit.
8. Choose a contact from the phone book.
9. Press the ▬ left soft key to save.
10. Press the ▬ right soft key four times to exit.

Please Note: Ensure the status is set to ON in order for this speed dial function to work. Repeat the same using M1 / M2 / M3 menu to set these keys.

To call a Speed Dial Number

Select the speed dial number you want to call by pressing and holding the desired speed dial number - 2 through 9, **M1** M1 key, **M2** M2 key or **M3** M3 key.

7. SOS Emergency Button

Important Notice: Wireless phones, including this device, operate using radio signals, wireless networks, landline networks, and user-programmed functions. Because of this, connections in all conditions and/or locations cannot be guaranteed. You should never rely solely on any wireless device for medical emergency communication. You can set the emergency numbers in the phone book according to your requirements; you can set a total of up to five emergency numbers. In case of an emergency, when the ▬ SOS button is pushed down the phone will automatically send a text message to the

emergency numbers set up on the phone. The mobile phone will then make the emergency call. If the first call fails, the phone will proceed to dialling the second emergency number. In this manner the phone will circulate the emergency contact numbers three times in order to receive an answer. The phone will also sound an alarm when an emergency call or message is sent.

Please note: If one of the emergency numbers has a voicemail system, the phone will assume that the call has been answered and will no longer call any more of the emergency numbers.

Attention!

The Emergency ▬ SOS button will only make calls if:
1.   A SIM card is in the mobile.
2.   There is at least one SOS numbers programmed.
3.   There is a SOS text message saved.

To Deactivate SOS Sound Alarm

1.   Press the ▬ left soft key to access the menu.
2.   Press the ▯ up or down key until "SOS" appears.
3.   Press the ▬ left soft key.
4.   Press the ▯ up or down key to select "SOS Alert"
5.   Press the ▬ left soft key.
6.   Select OFF by pressing the ▬ left soft key

To Add the Emergency Contact Numbers to the Phone Book

1. Press the ▭ left soft key to access the menu.
2. Press the ▯ up or down key until "SOS" appears.
3. Press the ▭ left soft key.
4. Press the ▯ up or down key to select "SOS Numbers".
5. Press the ▭ left soft key.
6. Choose "Contact input" to choose from your list of saved contacts or "Manual input" if you would like to type in the number.
7. Press the ▭ left soft key to save.
8. Repeat process to add 4 other emergency contacts.

Please Note: Ensure the ▬ SOS BUTTON is set to ON in order for this SOS function to work

Edit the SOS Message

1. Press the ▭ left soft key to access the menu.
2. Press the ▯ up or down key until "SOS" appears.
3. Press the ▭ left soft key.
4. Press the ▯ up or down key to select "Emergency SMS".
5. Press the ▭ left soft key.
6. Edit the text of the message
7. Press the ▭ left soft key to save.

Writing and Sending a Message

1. Press the ▬ UP key to shortcut to messages or press the ▭ left soft key to access the menu.
2. Press the ▬ up or down key until "Messages" appears.
3. Select the option "Messages" by pressing the ▭ left soft key.
4. Press the ▬ up or down key until "Write message" option displays.
5. Press the ▭ left soft key and type the message you want to send the text to.
6. Press the ▭ left soft key twice to send your message.

You can also access a stored message in your inbox and reply to it by selecting the option "Inbox" instead of "New Message" and following the same commands.

Receiving/Reply to a Message

When you receive a new text message, your phone will display an envelope icon and "New Message" notification. The envelope notification light will flash.

1. Press the ▭ left soft key to read the message.
2. Press the ▭ left soft key again to see a list of available commands such as "View", "Delete", etc.

Texting Actions	Description
View	To view the message
Reply	To reply the message
Call sender	To call the sender
Forward	To forward the message
Delete	To delete the message
Delete All	To delete all messages
Save to phonebook	To save messages to phone book

Letters and Numbers Input

Text Message Letters

English letters are set on number keys from "2" to "9".
You can input numbers, upper or lower case letters and
punctuation symbols. Pressing the ▓# key while typing lets
you switch between the different types of input modes.
Each number key is set for three or four letters. Press the
number key one time to display the first letter, two times
to display the second letter, etc.

Text Message Punctuation

The punctuation available includes: . , ? ! ' " ( ) @ \ / : - ; + - *
and more.

To enter punctuation:
1. Press the ▓* key to display the list of punctuation
   symbols
2. Use the 🮐 up or down keys to scroll through the list.
3. Press the ▭ left soft key to select.

4. Text Message Numbers

To enter a number instead of a letter:
1. Press the ⚏# key to switch input mode from letter to numerical and then use number keys from 1 to 0 to enter numbers.
2. Keep pressing the ⚏# key untill 123 is highlighted.
3. Change it back by repeating the process and this time choose Abc.

9. Accessing Your Voicemail

Your voice mail access number has to be provided by your network carrier using your SIM card. To dial your voice mailbox, press and hold "1" on the key pad. If pressing the "1" button on your phone will not take you to your voicemail, we suggest you call your carrier and ask for your voicemail number which you can store as a fast dial on your keypad afterwards.

8. Press the ▭ left soft key to save.

Call Settings

These features require the support of your network provider based on the calling package you select when you purchase your phone.

• Call divert - to divert call to another number
• Call waiting - to switch on/off call waiting option
• Call baring - to stop calls from a particular number (you can also use Blacklist option in the phone for this)
• Auto redial - Not show your number when calling
• Call time reminder - Activate flight mode which will switch off all phone signal
• Answer mode - Choose to answer the phone by opening the flip cover or by pressing any key.

To access:
1. Press the ▭ left soft key to access the menu.
2. Press the ▯ up or down key until "Settings" appears.
3. Press the ▭ left soft key.
4. Press the ▯ up or down key to select "Call Settings".
5. Press the ▭ left soft key.
6. Press ▭ Left soft key to view "Advance Setting."
7. Then use this menu to update your desired settings.

Bluetooth

The mobile phone supports Bluetooth function. You can use Bluetooth wireless technology to set wireless connection with other compatible devices, including mobile phones, computers, headsets, in-car accessories etc. With Bluetooth function, you can send photos, video segments, audio segments, personal business card and memos. You can also establish wireless connection with a compatible PC to transmit files. Try to keep the two devices you are connecting through Bluetooth close together while they are in use. Most Bluetooth headsets have a range of 10 meters. If possible, try to keep your phone on a chair beside you or nearby while talking on your headset to ensure the best connection. When using your computer, try putting your phone on the desk beside your monitor to ensure the best connection possible.

Pair Bluetooth Devices

Have one of the devices "search for new devices" to find the other. Typically you want a phone to search for your headset or audio speaker rather than the other way around. The Search function is located within the Bluetooth menu in the connection settings option in your phone.

1. Press the ▬ left soft key to enter the menu.
2. Press the ▬ down key until "Settings" appears.
3. Press the ▬ left soft key.

4. Press the ▤ down key until "connections" appears.
5. Press the ▭ left soft key.
6. Press the ▤ down key until "Bluetooth" appears.
7. Go to "My device" and locate your other device.
8. Once your phone finds the other device enter the "pairing code" for the device to link the two together. The pairing code is typically located on a sticker on the back of a headset or in the instruction book for a device.

Note: Ensure the power is set to ON in the Bluetooth menu

13. Troubleshooting

Problems	Solutions
Phone does not turn on	1. Ensure you have held the power button down for more than 5 seconds. 2. Re-insert the battery and retry turning on the phone. 3. Plug charger into the phone and ensure the battery is charged.
Cannot connect to a network	1. Signal strength may be weak, try moving your location and try again. 2. It may be possible that you are using the phone beyond the network service coverage area. 3. Check that your SIM card is correctly installed and is valid. (Contact your network provider)
No information displays when the phone is on	1. Check that your SIM card is correctly installed. 3. You may have permanently locked your phone by entering the PIN code incorrectly 3 times. Obtain your PIN code from your network provider. 4. Increase the screen brightness in "Settings".
Phone call quality is poor	1. Increase the call volume using the up and down keys while on a call. 2. It may be that the network reception is poor in your location. Try moving to another area to obtain a better connection.

Shorter standby time	1. Standby time is related to system settings. In areas of poor reception, the phone will use more battery power to try to find a base station. Reduce the standby time to save battery power. 2. It could also be the case that the battery of the phone has become worn out. You may need to replace the battery.
SIM card Error	1. Reinstall the SIM card in the phone. Ensure the metal contacts are clean - wipe gently with a clean cloth before inserting into the phone. 2. The SIM card may not be correctly installed. 3. If the SIM card is damaged contact your service provider.
Some features do not operate or cannot be set	1. This could be due to an operation error on the phone. Switch the mobile phone off and restart after 30 seconds. 2. The network provider may not support the feature you are trying to use and this may prevent its use.

Cannot receive incoming calls	1. Ensure your mobile phone is switched on and connected to a network. 2. Ensure your SIM card is correctly installed. 3. Call restrictions may be prohibiting incoming phone calls, so these settings must be checked. 4. Poor areas of network coverage can prevent incoming calls so check the network status of your phone.
Phone not charging	1. Bad connections can hinder the phone charging; ensure all contacts are correctly connected. 2. Check to see whether the phone battery charging slot or the charger itself is damaged. If so, discontinue use. Replace battery or charger. 3. The phone cannot be charged in temperatures below 10°C or above 55°C.
Does not dial numbers	1. Confirm that once the number is entered using the keypad that the green call button is pressed to dial the phone number. 2. Check the phone number entered is correct. 3. Check reception coverage status of your mobile phone. 4. Ensure the call restriction settings are correct in order for you to dial outgoing calls.

14. Radio Frequency (RF) Exposure and SAR

This device meets international guidelines for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed and manufactured not to exceed the limits for exposure to radio frequency (RF) radiation recommended by international guidelines (ICNIRP). These limits are part of the comprehensive guidelines and establish the permitted levels of RF energy for the general population. The guidelines were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.

The exposure standard for mobile devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. Although the SAR is determined at the highest certified power level, the actual SAR of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a base station, the lower the power output of the device.

SAR values may vary depending on national reporting and testing requirements and the network band. Use of device accessories and enhancements may result in different SAR values.

The SAR limit for mobile devices used by the public is 2.0 w/kg (watts per kilogram) averaged over 10 grams of body tissue. The guidelines incorporate a substantial margin of safety to give additional protection for the public and to account for any variations in measurements. The highest SAR Value - 0.721 w/kg.
