08-00736 - Rechargeable Dual Light Tripod User manual

Supplied with: Tripod light, and AC charger.

Charging the floodlight

Charging Socket
Insert plug into socket and tighten hand wheel.

Battery Charging and Status Indicators

The light can be used continuously when plugged into AC mains but it will only operate on medium mode.

Setting up the Tripod:

1. Slide button and lift leg to unlock each leg.

3. Unlock extending clamp and extend both poles to desired height and lock clamps.

4. Pull out the light heads from the top handle and rotate swivel to desired angle.

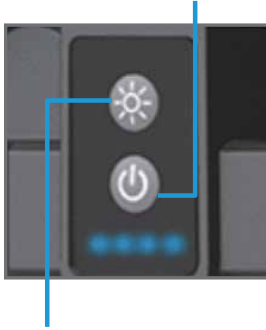

2. Unfold each leg out into position.

Setting up the Tripod T1 Continued...

1. Press  button to turn the light ON/OFF again to change light modes:
Low \rightarrow Medium \rightarrow High \rightarrow Off
8hrs 4hrs 2hrs

2. Use this button to change light beam from Cool white to Warm white

Built-in cable and charger wrapping system for tidy storage.

Reversible ground spikes:

The Tripod T1 comes with ground spikes, ideal for using on uneven ground. To release these unscrew using a screw driver, pull out the spike and rotate and push back into hole to secure into place.
