Triple vents aids gaseous exchange

Stackable for easy storage

- High quality & disposable, suitable for all bacteriological applications
- Robust dimensional accuracy of 90 mm, most automated systems-compatible
- Extremely high optical clarity for easy view on microscope
- Vented Dishes have elevated lid allowing superior gas exchange & evaporation
- Non-Vented Dishes have flat lid preventing evaporation, encouraging long incubation period and anaerobic application
- Shallow dish design allow for maximum use of incubator space
- Easy to stack.
- Petri Dishes retain their shape up to 55° C
- Aseptic Dishes are manufactured in clean room under controlled low bio-burden conditions for best performance in all applications
- Petri Dishes are also available in two & three compartment that enable parallel testing of single sample using different agar, solvents and reagents

- 高品质的一次性培养皿适用于所有细菌学应用
- 直径尺寸精确至90毫米，确保与大多数自动化系统兼容
- 极高的光学清晰度，便于在显微镜上观察
- 通风培养皿配有高的盖子，可以进行更好的气体交换和蒸发
- 无通风培养皿配有扁平的盖子，防止蒸发，从而延长培养期和厌氧应用。
- 浅盘设计允许最大限度地利用培养器皿空间
- 易于堆叠
- 培养皿的形状在55°C以下保持不变
- 无菌培养皿是在洁净室中，在控制低生物负荷的条件下制造的，在所有应用中性能最佳
- 培养皿也可分为两个和三个小室，可使用不同的琼脂、溶剂和试剂对单个样品进行平行测试
