

UGANDA MEDICAL MISSION

KAPCHORWA

DISTRICT – JULY 2022

Thank you so much for your generosity in supporting my friend Stephen and I on our mission trip to Uganda. We left the region with much more than we were able to offer, but I know we made a big impact on the community and we hope to continue what we started. Special thanks to Trinity Center for World Mission for the invaluable support

KASEREM CHRISTIAN MEDICAL CLINIC

YOUR SUPPORT MADE A DIFFERENCE

- Outreach clinic with Ugandan clinicians – including 2 dentists, an optometrist and several midwives and womens health experts – we treated around 600 people with life-saving medications purchased with your donations .
- Updated durable medical equipment – new laboratory testing supplies that will aid in the diagnostic and decision making capabilities of the clinic team
- Medical training – we were able to share lectures from subject matter experts on neonatal resuscitation and provide hands on training to prevent new-born mortality. We trained on trauma management and using an ultrasound as well
- Protocol development – spending time in the clinic allowed for shared development of treatment algorithms and care protocols to improve the quality and standard of care and to reduce the already heavy burden placed on the providers there
- Structural updates – your donations went towards improving the road to access the clinic, replacing broken windows, updating the interior to enhance patient privacy and work-flow and more!
- Visualizing future fundraising efforts through web development and social media, and grant-writing opportunities
- Preventative medicine education on the local radio
- In-depth site-survey of future clinic needs

WHAT'S NEXT?

The path has been paved for future trips in conjunction with our Ugandan counterparts at the clinic and at the district hospital. The medical need in Uganda is great and nothing short of a challenge. The opportunity for learning and personal growth is right here. This is a beautiful part of the world with kind people and we hope to

grow from this promising mission opportunity.

We are already planning for 2023!
