

## Introduction

The Equalizer (a solid bronze 2" to 1¼" adapter) is designed to help you minimize telescope balancing when interchanging heavy 2" eyepieces with lighter 1¼" eyepieces. The equalizer weighs 12 oz. (0.75 lb) compared to our standard aluminum model weighing less than 4 oz. (0.2 lb).

The tapered shape on the base is designed to reflect incoming light harmlessly off to the side, instead of toward the optical path, avoiding the need for special blackening.

For your reference, following is a table of approximate weights in pounds of Tele Vue eyepieces:

Plössl	Weight	DeLite	Weight	Panoptic	Weight	Delos	Weight	Nagler	Weight	Ethos	Weight
55	1.1	18.2	0.5	41	2.1	17.3	0.9	31N5	2.2	21	2.3
40	0.4	15	0.5	35	1.6	14	0.9	22N4	1.5	17	1.6
32	0.4	13	0.5	27	1.0	12	0.9	17N4	1.6	13	1.3
25	0.3	11	0.4	24	0.5	10	0.9	16N5	0.4	10	1.1
20	0.2	9	0.5	19	0.4	8	1.0	13N6	0.4	8	1.0
15	0.2	7	0.5			6	1.0	12N4	1.0	6	1.0
11	0.1	5	0.5			4.5	1.1	11N6	0.4	4.7SX	1.3
8	0.1	4	0.5			3.5	1.1	9N6	0.4	3.7SX	1.1
		3	0.5					7N6	0.5		
								5N6	0.5		
								3.5N6	0.5		
								2.5N6	0.5		
								Nagler Zoom	Weight		
								3-6	0.3
