

**The safety and wellbeing of our clients, visitors, team and the wider community is a real priority for us.**

We are actively monitoring the coronavirus (COVID-19) situation and taking advice from the experts and putting additional steps in place to look after you.

**I wanted to let you know some of the measures we have in place to look after you at BarberShopCo!**

- We have **ALWAYS** practiced exceptional **HYGIENE**
- As you know all our stores have hand basins between the chairs- this is because we always clean and dry our hands before we shake your hand, cape you up and touch your hair
- We have jars full of Barbicide Blue- hospital grade disinfectant to sanitise our combs, scissors and Clippercide to sanitise our tools
- We clean the hair off the floor and chairs after every service so the space is clean for you
- We change our razors after every shave or line up and replace the blade in front of you- so you can see your own fresh blade being loaded
- We take your details at the point of sale so if we ever need to make contact we know how to reach you

**We are taking it to the next level - you'll see our barbers**

- Cleaning chairs (arm and head rests), eftpos terminals and screens with Barbicide between clients
- Requesting clients who are unwell for any reason to refrain from using our services until they are back to health
- Implementing specific training they have completed to ensure they have current and up to date knowledge from the experts, and have passed quality assurance tests

Not up to a visit- please check out our online services for all your favourite grooming supplies delivered straight to your door

Short on some cleaning products for your home or office? You can purchase Barbicide wipes/spray a hospital grade disinfectant suitable for most surfaces- great for common areas like toilets, benches, door handles etc.

The BarberShop you can trust.
