NUTRITION AND SCIENCE

- Marketed as VitaminRED™ the complex combination of anthocyanins and hydroxycinnamic acids in blood oranges are a potent health promoting complex.
- Redbelly has extensively researched the health benefits of blood oranges including co-authoring with a registered dietitian an extensive health report together with a well populated database of scientific papers which demonstrate the health benefits and other aspects of blood oranges.
- Redbelly committed to a pipeline of health products that may be co-marketed with the fresh produce.
- Currently working on freeze dried powder, tablets and gummy/chewable formulations.
