

**BECCA FEEKEN GARDEN SHUTTERS
A2 CARD BASE ASSEMBLY**

Supplies

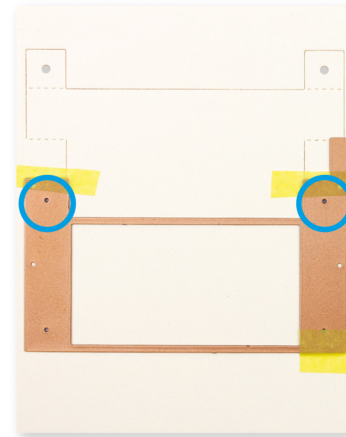

- DIES: Daisy Delight Garden Shutters A2 Card Base S5-479
- CARDSTOCK: Color Essentials Cardstock, 100lb Heavyweight
- ADHESIVES: Best Ever Craft Tape SCS-123, Extra strength double sided tape
- FINISHED SIZE: 4.25" X 5.5"

1. Die cut chosen cardstock with A2 die, three times.

2. On first piece of cardstock, align the kinetic layer die top guide to the top edge of the cardstock and center it so it is even on both sides; tape down and die cut.

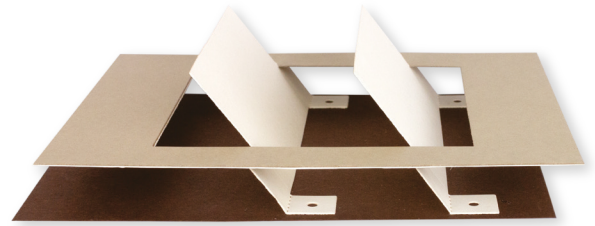

3. Realign the kinetic layer die again, using the circles on the dies (circled) as a guide to align with the holes cut out the first time; there will be 2 sets of die cuts.

**BECCA FEEKEN GARDEN SHUTTERS
A2 CARD BASE ASSEMBLY**

V = Valley Fold (V) M = Mountain Fold (Λ)

4. Fold the die cut kinetic layer as noted. It will create what looks like “feet”. Flatten out and add glue or adhesive to the bottom of the “feet” (shown in yellow) and adhere to the A2 base that you already cut out. Let dry. The top of the card will be with flaps facing up (but it can also be created with the flaps facing down).

5. Create a frame for the top of the card with the third piece of A2 cardstock by centering window die cut using notch guides inside of the die. Add glue or adhesive to the top of kinetic layer only where noted in yellow and attach frame to top. Add pull tab to the back of the bottom frame piece (or if having the flaps facing down, tab goes to the top of the card).

6. Decorate the frame and kinetic layer flaps, but make sure that the decorative pieces do not go beyond the sides and bottom of the flap pieces or the card will not open and close properly.
