# IN THE EAR MONITOR

# EAR IMPRESSION

These in-ear monitors combine meticulously handcrafted custom ear moulds by Fischer Amps with the transducer of Sennheiser's top-of-the-range IE 500 PRO. Featuring Sennheiser's TrueResponse technology, the in-ears open up a completely natural, clear and spacious sound stage, enabling musicians and engineers to fully focus and critically monitor their sound.

STARTING  
FROM **AED 350/-**

# Custom AirPods Pro Plug

## Fidelity ear tips bring a custom fit to AirPods Pro

AirPods plugs provide a personalized and comfortable listening experience, improved sound quality, enhanced noise isolation, and greater stability during movement.

STARTING  
FROM **AED 450/-**

## EAR IMPRESSION ONLY

An ear impression is a crucial step in the creation of custom-fitted ear products designed to enhance comfort, improve hearing, and protect the ears. It provides a precise mold of the individual's ear anatomy, facilitating the production of high-quality, personalized ear solutions tailored to specific needs and preferences.

PRICE **AED 250/-**

## EAR IMPRESSION 3D FILE

Ear impression 3D file serves as the digital blueprint for creating custom-fitted ear products tailored to the unique anatomy of an individual's ears. It enables manufacturers to produce high-quality, comfortable, and effective ear solutions that meet the specific needs of each user.

PRICE **AED 100/-**

## HARD & SOFT MOULD

The choice between hard and soft ear molds depends on the specific requirements of the application and the individual's preferences for comfort and durability. Hard molds are suitable for applications where rigidity and stability are important, while soft molds offer superior comfort and flexibility for everyday use.

PRICE **AED 450/-**
