

# ClearGrip™ FlexChannel® Clip-In Ticket Molding

## Implement a Ticket Molding Program with Fewer Parts

The FlexChannel® ticket molding is an innovative shelf edge label holder that can fit in a wider range of price channels than typical plastic moldings. The **specially formulated, flexed back leg** allows the ticket molding to fit securely in a range of price channel heights for different fixture types and manufacturers. Having one molding that fits a range of price channels makes **store measurement faster, installation easier and streamlines procurement and replenishment.**

Use the built-in grip to hold cardstock signs or ShelfTalkers™

## FlexChannel® Advantages

The ClearGrip™ FlexChannel® Clip-In Ticket Molding helps retailers reduce SKUs and manage a shelf edge ticket molding program in several ways:

- One ticket molding **fits up to 80% of the fixtures in your store**, making it easier for store-level staff to identify and re-order supplies.
- FlexChannel® moldings can be easily cut with scissors so **you only need one length** in your program.
- Purchase **colored ticket moldings** or use clear moldings with 1.50"H price channel strips to add color to specific areas or departments in the store.
- FlexChannel® moldings can be used in **coolers and freezers.**
- Couple with **FlexKlip® shelf adapters** to outfit an entire store.

## Key Features & Benefits

- 1 Flexible back leg fits **1.16"H-1.23"H** price channel to eliminate the need for additional ticket moldings with different back leg sizes.
- 2 Molding is **hinged** for easy installation, product access and restocking.
- 3 **Built-in sign grip** on window securely holds 8-12pt cardstock paper or kostklip® ShelfTalkers™, even in coolers and freezers.
- 4 Insert **paper price tags** into the flexible window to keep them **protected** and **aligned** with the planogram.
- 5 **Boot** helps with thumb placement to open window.
- 6 Insert **1.50"H CPG branding, planogram or color strips** into the channel behind the window.
