

# RING SIZING

## Step 1

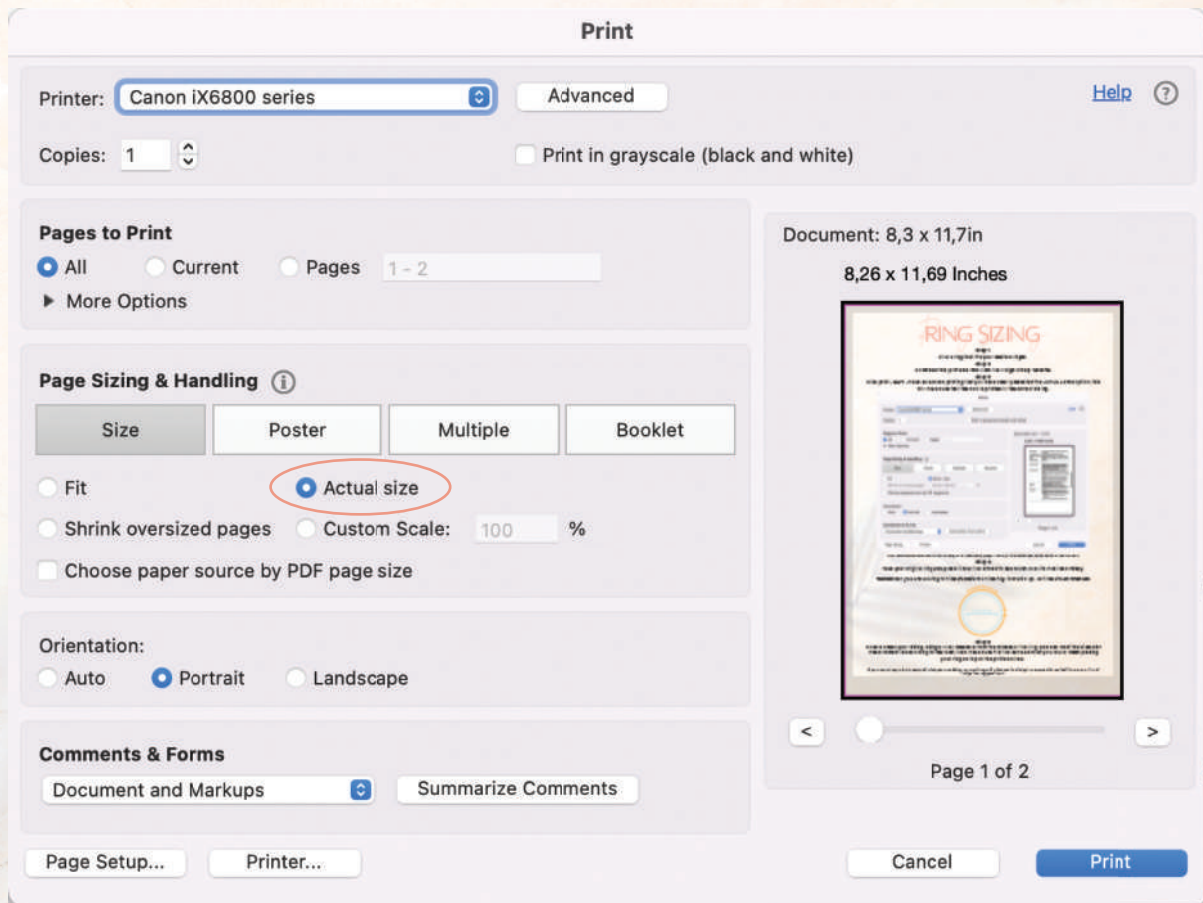

Find a ring that fits your desired finger.

## Step 2

Download this printable PDF from the Indigo Finery website.

## Step 3

Click print - **BUT** - make sure when printing that you have clearly selected the *ACTUAL SIZE* option, this will make sure that the PDF is printed in the correct sizing.

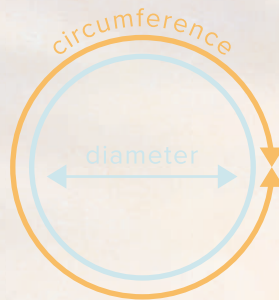

*\*This screenshot was taken from a MAC's printing options, your printing page setup might differ to this one, but the outcome is still the same.*

## Step 4

Take your original ring and place it over the circles to see which one fits most accurately.

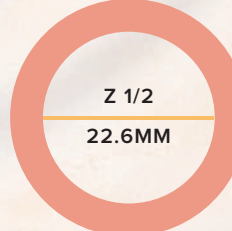

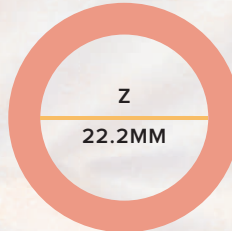

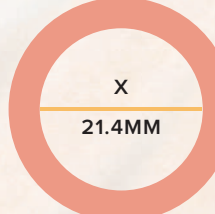

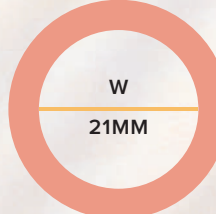

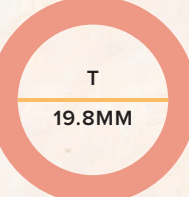

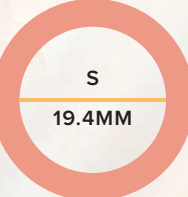

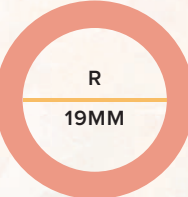

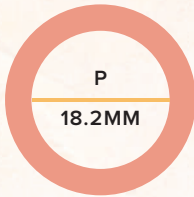

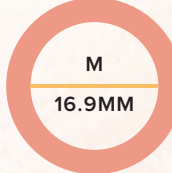

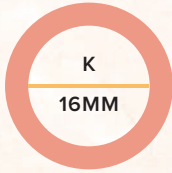

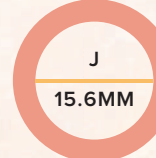

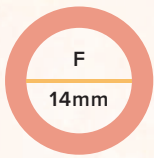

*\*Remember, you are looking for the diameters of the ring to match up, not the circumferences.*

## Step 5

Double check your sizing, using a ruler, measure from the middle of the ring, and see what the *diameter* measurement is according to the ruler, then make sure it is the same as what you found when placing your ring on top of the printed circle.

*If you are at any point unsure of what you are doing, or aren't sure if what you're doing is correct, please feel free to email me!  
indigofinery@gmail.com*

For reference, this line should be 275mm long on your ruler
