

Our 'gifts that grow' have been lovingly developed to offer a range of novel and delightful award-winning gifts that will bring joy as they bloom and grow.

Oliver Tyler

GREENS & GREETINGS™

Award-winning Greens & Greetings are the clever little zero waste gift that grows on-trend, tasty microgreens.

It is the perfect solution for the customer who is looking for something a little different, when a card alone just won't cut it. It is a card, gift, experience and snack in one.

Each Greens & Greetings is a watertight pouch that becomes a plant pot, filled with everything needed to grow delicious frilly pea shoots in just 10-12 days.

The front features an attractive design and there's room on the reverse for the sender to write a message. They come with a high quality white envelope, and can be posted UK-wide with a large letter stamp.

It is so easy to use. Simply add water to the enclosed coir soil, sprinkle the pea seeds on top, and pop the pouch on a windowsill to grow for about 2 weeks. Pea shoots are an attractive and nutritious garnish for just about any meal.

Our environmentally-friendly and vegan product is packaged in a fully recyclable paper pouch with a thin layer of recyclable polypropylene (PP). This allows the pouch to be recycled along with your paper.

The non-GMO and untreated seeds inside are sourced from a UK supplier and packaged in a biodegradable glassine envelope. The expanding soil blocks, made from coconut husks, are an eco-friendly alternative to peat pellets. The wooden stirrer is made of FSC-certified timber.

GIFT IT

GROW IT

EAT IT

“ A fun alternative to a greeting card - gratefully received and highly recommended. ”

WILDFLOWER WISHES

A whimsical gift of self growth!

Write your wishes, hopes or dreams on a wildflower 'wish paper' and watch your wishes bloom and grow in to beautiful UK Wildflowers.

Planting wildflowers adds natural beauty to windowsills or gardens and these nectar-rich plants help support dwindling populations of native pollinators such as butterflies, moths and bees.

Each Wildflower Wishes contains:

- 3 pretty 'wish papers' embedded with native UK wildflower seeds.
- 'Wish dust' containing chamomile, corn cockle, cornflower, marigold and poppy seeds and biodegradable glitter.
- A wooden plant marker.
- Planting instructions.
- A wildflower identification guide.

Sustainability

Concern for the environment and promoting sustainability are an integral part of our business. At Shroot we aim to make sure our products and processes have as little impact on our planet as possible. This includes ensuring all our materials are recyclable and packed in the UK.

In recognition of our targets for continual improvement we have been awarded a sustainability certificate.

Compliance

Shroot Ltd are licenced by DEFRA to undertake seed marketing operations: (Licence no. 7766), and authorised to issue Plant Passports (Registration Number: GB145302).
