

TEMPT
POWERBANK
SAFETY
GUIDELINES

SAFETY GUIDELINES

Health and safety information; Read before use to reduce the risk of personal injury, discomfort, property damage, including damage to your Tempt Power bank or any connected devices, and other potential hazards.

HANDLING

Handle your Tempt Power bank with care. Before using the Power bank for the first time, please fully charge it once. You may damage it if you disassemble, drop, bend, burn, crush, or puncture it. Do not use the Power bank with a damaged enclosure, damaged or bent plugins, or other form of physical damage. Only use the included or approved charging cable to charge your Power bank. Using an incorrect cable may damage your device or cause a fire. Using a damaged Power bank may cause overheating or injury. Do not expose your Power bank to liquids, which can cause overheating and may ruin the product. Stop using your Power bank if it gets wet. Do not attempt to dry it using an external heat source. Do not use the Power bank outside or in wet locations, such as near a sink, bathtub, or shower stall. Do not expose the Power bank to extreme temperatures, such as direct sunlight, or near sources of heat, such as radiators or ovens. This may cause the battery to malfunction or leak. Never touch the charger with wet hands. The Power bank is designed to work best in ambient temperatures between 32° to 104° F (0° to 40°C) and should be stored between ambient temperatures of -22° and 158°F (-30° and 70°C). Do not expose your Power bank to temperatures above 113°F (45°C), such as on a car dashboard or near a heating vent, as this may damage the Power bank, overheat the battery, or pose a risk of fire. If your device becomes too hot, disconnect it from its power source if it's plugged in, move it to a cooler place, and do not use it until it has cooled. Using damaged cables and chargers and charging when moisture is present, can cause fire, electric shock, injury, or damage to your device.

PROLONGED HEAT EXPOSURE

The Power bank generates heat during normal operation and complies with applicable surface temperature standards and limits. Avoid prolonged, direct or indirect skin contact when the device is in use or charging because exposing skin to hot surfaces for a long period of time may cause discomfort or burns. Do not sleep on or with your Power bank or a device it is charging or cover them with a blanket or pillow. Be aware of this issue if you have a physical condition that affects your ability to detect heat against your skin

CHILD SAFETY

Keep the Power bank out of reach of children and do not allow them to play with it and its accessories. They could hurt themselves or others or could accidentally damage the Power bank. Consult a physician immediately if small parts are swallowed.

DISPOSAL, TRANSPORTATION & RECYCLING

Dispose of your Power bank in accordance with government regulations. Do not dispose of it in normal household waste. Improper disposal may lead to fire, explosion, and/or other hazards.

ENVIRONMENTAL RESTRICTIONS

Do not use your Power bank where flammables or explosives are stored (e.g., in gas stations, fuel depots, or chemical plants). Do not use it where blasting operations are in progress, or in potentially explosive atmospheres such as in areas where the air contains high level of flammable chemicals, vapors, or particles. Observe all notices and signs where these hazards might exist.
