

Pull Down Kitchen Faucet Installation

INSTALLATION MANUAL Tools You Will Need:

Adjustable Wrench

Allen Key

Philips Screwdriver

Teflon Tape

Before the Installation

1. Check the package and confirm all parts are included. If any part is missing or damaged, please contact us.
2. Do not disassemble the main body, as it has been installed & commissioned correctly & precisely before leaving the factory.
3. Shut off the main water supply prior to beginning installation.
4. Do flush the water supply lines to remove any dirt and debris before installation (**IMPORTANT**).
5. Make sure to connect the hot/cold inlet pipe correctly. If standing in front, connect hot water pipe to the left and cold water pipe to the right.
6. After the installation, check for leaks and make sure every joint is safely sealed.

Cleaning and Maintenance

1. Rinse with clean water and dry with a soft cloth.
2. Do not use any detergent, acid, polisher, abrasives, or harsh cleaners.
3. Do not use cloth with a coarse surface.

1. Remove the mounting nut (A), rubber washers (B), and base plate (C) from the threaded pipe (D).

2. Fit the rubber washer (B) into the groove of the base plate (C), and then put the base plate (C) onto the bottom of faucet body (E). Screw waterlines (F) into the corresponding screw-hole of the faucet body (E).

3. Insert waterlines (F) and threaded pipe (D) into the hole of the countertop. (**Note:** For 3-hole installation, replace the base plate (C) with escutcheon.)

4. Install rubber washer (B) and mounting nut (A) back to the threaded pipe (D). Then, adjust the faucet body (E) correctly and tighten the mounting nut (A).

5. Connect waterlines (F) to angle stops. Turn on the angle stops and check for leaks (**DO NOT TURN FAUCET ON**).

6. Remove spray head (G) and turn faucet on for 1 minute to flush any debris.
