Report #15-134  
Page 5 of 5

The removal/reduction of contaminants or other substances that maybe present in your water supply may vary depending on its content. The contaminants or other substances removed or reduced are not necessarily present in all users' water. Some contaminants maybe more easily filtered than others. Percentage of reductions will vary from approximately 50% to 95% over the life of the filter based on the level of contaminant(s) found in your water supply. Testing was performed under standard laboratory conditions. Actual performance may vary.
