BIRTH OF FREERIDER

You will not find a scooter manufacturer more passionate about mobility than we are here at FreeRider. Our very first scooter to hit the market, way back in 1995, was born out of love, and we have applied the same love and passion to every single scooter to leave the FreeRider fold since.

FreeRider is a family business, founded by Arthur Wang and his wife, Juyu. A childhood sufferer of Polio, Juyu has always had difficulty walking. A condition that most people may class as a disability has given Juyu the drive and determination to succeed and she has always been aware that to overcome perceptions, she had to work harder than most.

Arthur's love for Juyu makes him as passionate about mobility as she is, and drives him to constantly push forward to achieve ultimate, perfect mobility vehicles. Not only for Juyu but also for you.

DON'T TAKE *OUR* WORD FOR IT...

Naturally, we love our products and we think you will too. But don't take our word for it, here's what customers and professional mobility retailers are saying about our scooters.

"Classic look and style, reliable, what more could one ask?"

"Excellent back-up from FreeRider & spare parts readily available. 10/10"

"I love my Luggie. Bottom line better than a horse & buggy old Freerider's magic Luggie."

"I can't say enough how well this scooter is put together and how excited I am to use it, I use it for my job, I use it going to the grocery store I don't know where it's been all my life."

Please be aware, our policy is one of continual improvement. We reserve the right to alter, without notice, any weights, measurements or other technical data shown in this brochure. All pictures are for illustration purposes. Colors may vary. All figures are given for informational purposes only.

LUGGIE CLASSIC II

LIGHTWEIGHT, COMPACT, EASY FOLDING & TRAVEL FRIENDLY

The Luggie Classic II is a medically coded folding mobility scooter. Its compact size and light weight make the Classic II effortlessly manageable and maneuverable.

SMALL BUT VERSATILE

Classic II is suitable for indoor and outdoor use: in your home shopping malls, on dry, smooth level surfaces and climbs slopes safely up to 6 degrees.

RENEWED INDEPENDENCE

Luggie Classic II can be easily folded without the use of tools, making traveling a breeze. Enjoy the convenience of the Classic II scooter with the affordability of a lead acid battery.

SPECIFICATIONS

CAPACITY - Up To 320lbs
FRONT TIRES - 6"
REAR TIRES - 7"
TURNING RADIUS - 40"

freerider[®]USA

Freedom, it's an important concept. To be able to act without constraint. To be able to do what we want to do, when we want to do it. A human right due to all of us in equal measure.

For over 25 years Freerider has been designing and building mobility vehicles with the sole aim of providing freedom. Freedom to venture off to shops. Freedom to roam the country. Freedom to spend a day downtown. Freedom to travel.

Our chairman, Arthur, has a personal motive for making our mobility scooters the best they can be and continues to this day to push the boundaries of mobility forward. Always striving for the perfect scooter for his wife, Juyu, and for all our customers worldwide.

Till the end, we will never compromise. We won't seek cheaper, lower quality parts. We won't farm production of our scooters to a third party. We won't put profit before practicality. Your freedom is too precious to compromise.

Where will your Freerider take you?
