

# Contents

<b>Introduction and Acknowledgements</b> .....	iv
<b>Discrete probability distributions</b> .....	1
Exercise A: Discrete probability distributions .....	3
<b>Expected value applications</b> .....	5
Exercise B: Expected value applications .....	6
Exercise C: Expectation algebra .....	8
<b>Combinations of random variables</b> .....	10
Exercise D: Combinations of random variables .....	11
<b>Binomial distribution</b> .....	13
Exercise E: Binomial distribution .....	15
<b>Poisson distribution</b> .....	18
Exercise F: Poisson distribution .....	19
Exercise G: Inverse Poisson problems .....	23
<b>Continuous probability distributions</b> .....	25
<b>Normal distribution</b> .....	25
Exercise H: Normal distribution .....	27
Exercise I: Continuity corrections .....	35
Exercise J: Inverse normal problems .....	38
<b>Uniform (or rectangular) distribution</b> .....	42
Exercise K: Uniform (or rectangular) distribution .....	42
<b>Triangular distribution</b> .....	44
Exercise L: Triangular distribution .....	45
<b>Probability distribution problems requiring multiple skills</b> .....	51
Exercise M: Probability distribution problems requiring multiple skills .....	53
<b>Selecting a probability model</b> .....	56
Exercise N: Selecting a probability model .....	58
<b>Estimating probabilities using simulations</b> .....	64
Exercise O: Simulations .....	67
<b>Practice assessment task</b> .....	71
<b>Answers</b> .....	75
<b>Index</b> .....	83
<b>Formulae and tables</b> .....	85
