## WE APPRECIATE YOUR PURCHASE OF OUR PRODUCT!

PLEASE READ CAREFULLY AND SAVE FOR FUTURE USE!

Manufacturer: EKJU / AMATA, Cecīļu iela 12, Ieriķi, Amatas novads, LV-4139, Latvia

**Our products are produced from durable Northern pine and spruce. If well maintained, our product can serve you the time which takes new tree to grow.**

All products, when necessary, comes with part assembly kit and simple step-by-step assembly instruction.

### SAFETY

This product is intended for domestic use only.

Ensure that assembling and using takes place on a stable and level surface.

Regularly inspect the structural integrity of this product.

Check furniture fittings at least once a year - the screws may require tightening.

This product must be assembled by a competent adult.

Ensure the products are securely anchored to the ground or base surface to safeguard them against strong winds and unforeseen storms.

Avoid sitting or standing on the product or any part of it during assembly.

### ASSEMBLY

Follow the provided product instructions meticulously during assembly.

**While assembling, loosely tighten all screws, bolts, and nuts. Securely tighten them only at the completion of assembly, once all parts are in place.**

### THINGS TO KNOW

Impregnated and stained products may exhibit smearing initially, which typically dissipates after a short period. Natural variations in colour may occur among boards of pressure-treated products, resulting in shades that are lighter or darker than those depicted in labels or photos; this is a normal characteristic of wood. Additionally, discoloration from impregnant salt or occasional mould may accumulate on the product.

Vacuum impregnated products

Treated wood containing a biocidal product

Celcure® C65 preserved wood is protected against wood destroying insects and wood rotting fungi.

Active Ingredients: Basic Copper Carbonate, DDACl chloride and DDACarbonate.

Stained products

PROTIM AQUATAN ES5 is a coloured, water-based concentrate which is diluted with water. It is a decorative finish which colours the wood. Protim Aquatan ES5 treated wood is not protected against wood destroying insects or wood decaying fungi. Preservative treatment is required to protect against these organisms.

Active Ingredients: 3-iodo-2-propynyl butylcarbamate, propiconazole.

### WARRANTY

The warranty period for the durability of the product design is 24 months. In the event of any warranty-related concerns, kindly reach out at [info@amatamoments.com](mailto:info@amatamoments.com) with proof of purchase.

**The following conditions are not deemed as defects and are not eligible for warranty claims:**

Natural variations in colour and grain are inherent to wood, enhancing its natural beauty, with increased prominence in pressure-treated products. Additionally, natural wood characteristics include wear and greying over time. Please note a potential range of 5-8% variance in thickness and dimensions of the components. Any damage resulting from incorrect product installation is not covered under warranty.

The warranty does not cover products or parts that customers have processed or modified in any way. It also excludes damage incurred by customers during transportation and movement, changes in tone and wood structure over time, general depreciation of the product, the occurrence of knots that do not contribute to overall strength, as well as bending and twisting of wooden parts if such deviations do not compromise the stability of the product.

Additionally, any damage not directly linked to the quality of the production process is not covered. Mold appearance on untreated (natural) products, even after home treatment, is also excluded from warranty coverage.
