

Tailored Lessons & Flexible Schedule for Teams and Companies

Training Objective

To provide personalized, hands-on training for installation teams or companies that need a custom schedule, on-site instruction, or training focused on specific systems and project types.

This program delivers the same high-level CeilEx methodology and certification, adapted to your team's experience level and goals.

Who It's For

- Installation teams or dealer partners who want on-site training at their own shop or project location.
- Companies adding stretch-ceiling systems to their product line.
- Architects, contractors, or designers training multiple employees at once.
- Teams needing customized content, languages, or extended practice time.

Systems Covered

- Wall-to-wall stretch ceiling installation
- Linear light integration systems
- Cove lighting ceilings
- Tools, materials, and accessories overview
- On-site best practices and safety

Training Options

Each program is built around your team's needs. You can choose:

- 3-Day Professional Program (full certification with lighting systems)
- Advanced Specialty Workshops (luminous, star, acoustic, or printed ceilings)

Scheduling

- Fully flexible dates — weekdays or weekends.
- Available at your factory, warehouse, or job site, or at CeilEx training centers.
- Start times and session lengths adjusted to your production or team schedule.
