

## FEATURES of OUR LIVING HINGE BOXES

All packaging cases are designed for positive closure against the elements. A flexible hinge of plastic is molded as one piece with the rest of the case, connecting the sturdy top and bottom sections. The result is a hinge with excellent flexibility and superb flex life. Some can be further equipped with an optional weather-resistant gasket, and feature a molded-in ring to accommodate a tamper-evident seal. Many models with handles are wall-mountable. Cases can be manufactured in white, clear or custom colors.

# Packaging Solutions for EVERY INDUSTRY
