

LET US **STEEL** YOUR HEART

1telluria

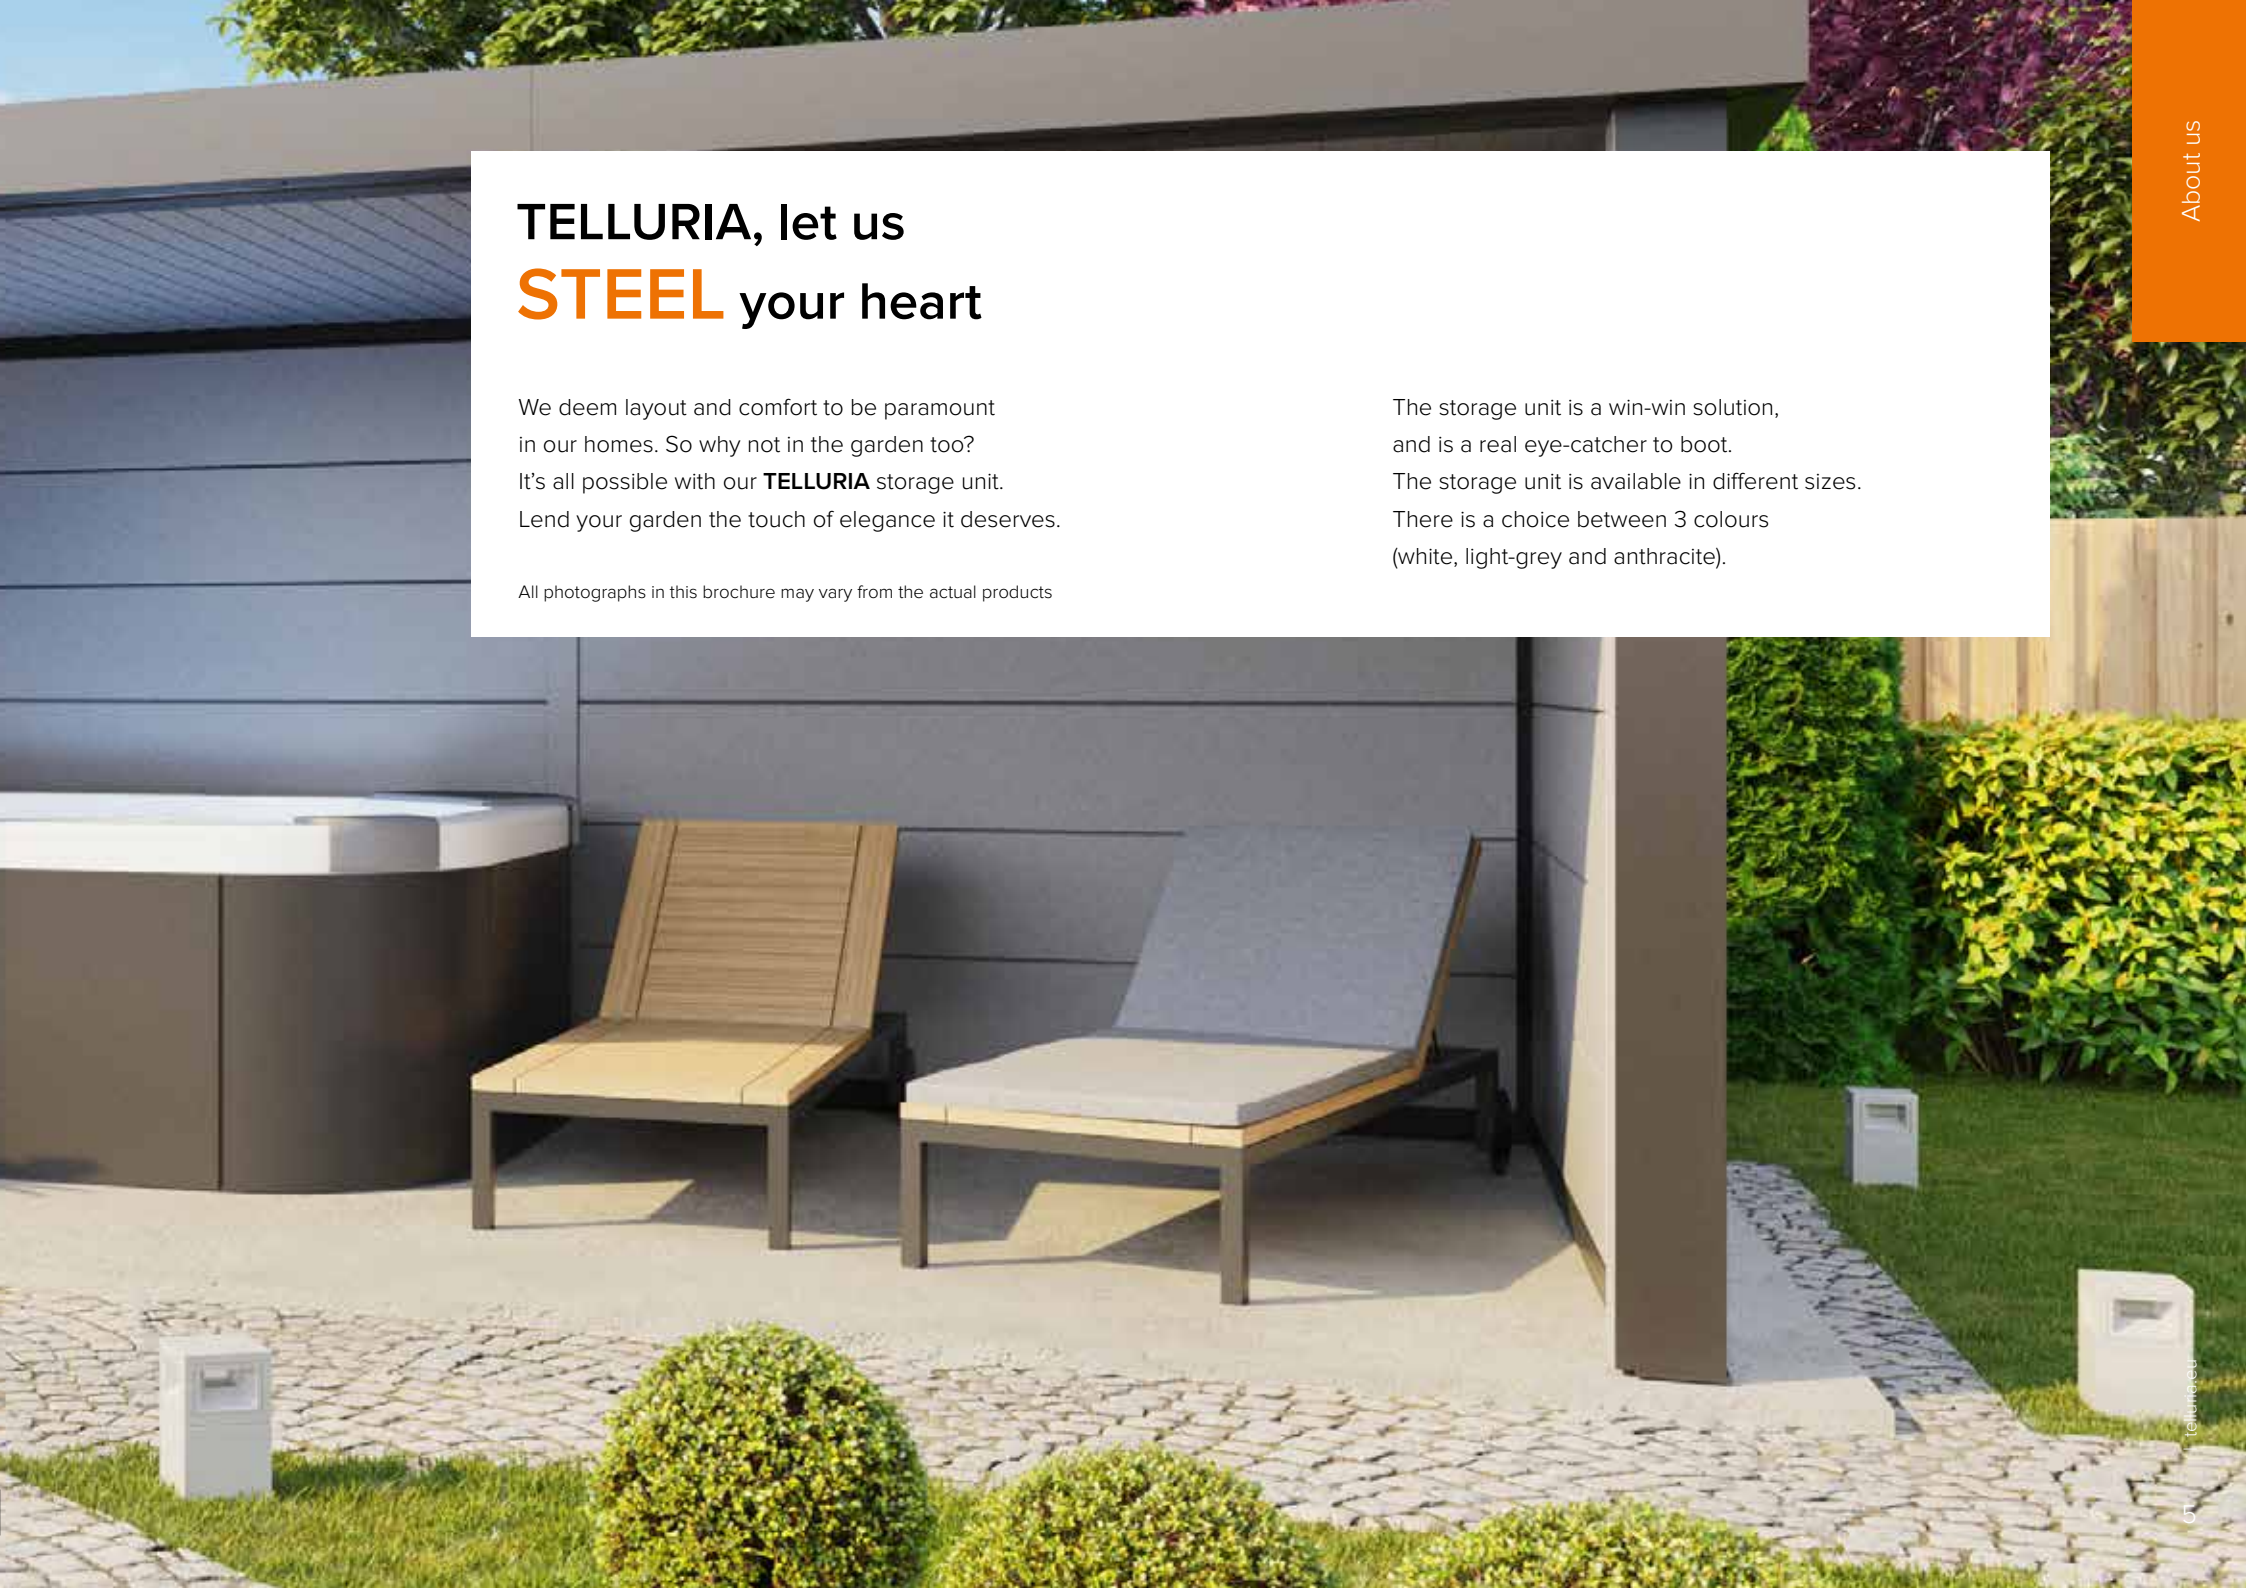

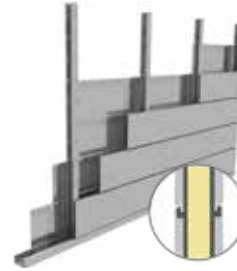

TELLURIA, let us **STEEL** your heart

We deem layout and comfort to be paramount in our homes. So why not in the garden too? It's all possible with our **TELLURIA** storage unit. Lend your garden the touch of elegance it deserves.

All photographs in this brochure may vary from the actual products

The storage unit is a win-win solution, and is a real eye-catcher to boot. The storage unit is available in different sizes. There is a choice between 3 colours (white, light-grey and anthracite).

With the free space in between the inner and outer wall, insulation and utilities can be easily integrated!

STRONG AND DURABLE

The galvanised supporting structure guarantees longevity. Steel is the **material of the future**.

QUICK AND EASY ASSEMBLY

The system is made up of prefabricated components that are **easy to assemble**. Brief instruction or a concise manual is all that is needed for quick assembly.

NO MAINTENANCE

Do it the easy way with an Eleganto garden building. A steel construction requires **less maintenance than a timber one**. Touching up the paintwork is superfluous as the garden building always looks as good as new.

SECURE

Using steel means safer construction, less maintenance, fewer foundation issues and **no need for heavy construction** equipment.

CONTEMPORARY LOOK&FEEL

TELLURIA offers a range of finish options **for a contemporary, functional look&feel** that dovetails effortlessly with most building styles and settings.

ECOLOGICAL FOOTPRINT

The constructions are **100% recyclable and can be re-used**. Being lightweight in construction, Telluria can be transported very efficiently. The constructions are supplied in kit format. Accordingly, there is no waste or surplus consumption of energy, water or other resources.

Standard features:

- Door with plexi opaque glass (clear)
- Cylinder door lock
- The eaves and the door are in anthracite
- The corners are in anthracite or white
- The eaves are 10cm/15 wide
- The external sheets are made of hot-dipped galvanised steel (0.9mm)
- Roof pitch: 2°
- The roof is made up of insulated sandwich panels (4cm)
The underside of the roof is always white
- Integrated gutter with outlet
- Ventilated

Colours:

WHITE

Similar to RAL 9003

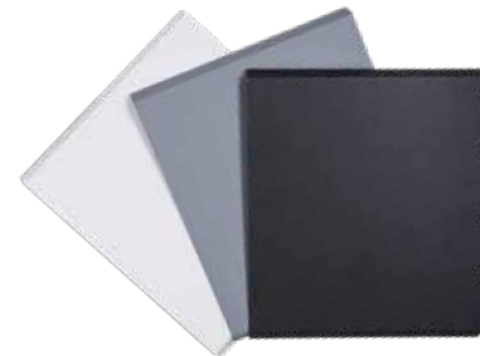

Corners also available
in white

ANTHRACITE

Similar to RAL 7043

LIGHT-GREY

Similar to RAL 7001

ELEGANTO

Steel is a sustainable construction material

All profiles are made of galvanised (hot-dipped) steel. The steel plates have a 275g/m² zinc layer, ensuring an Eleganto garden building never rusts.

TELLURIA only uses high-grade steel delivered by European suppliers.

These suppliers produce steel using state-of-the-art, efficient processes, from raw material to the finished product. This means we can guarantee you optimum product procurement for in your garden.

Revolutionary STEEL construction system

STEEL OF LIFE

TELLURIA is an easy to install steel construction system. The countless benefits of steel mean this system will play a vital role in the future; with its flexibility the system inspires the realisation of people's dream constructions.

ON-SITE PRODUCTION

All TELLURIA components are of European origin, produced at our site in Belgium. Our fully standardised and automated production process is continuously monitored, resulting in premium products. The components and constructions are comprehensively and stringently tested, using only high-grade materials. As a result they can cope with extreme conditions (they are fire-resistant, can withstand high winds ...).
