

NWT

 **MADE IN GERMANY** 

COMPANY PHILOSOPHY

Innovation and quality - our daily commitment

NWT GmbH was founded 15 years ago and is an innovative manufacturer of mobile dental treatment units, podiatry and pedicure devices and nail design devices. Over the years we have used our experience to constantly renew and expand our product range. NWT GmbH has earned a high reputation among users and distributors in more than 52 countries as a leading and reliable partner.

All our products are developed and manufactured exclusively at our location in Germany according to the standards for medical devices. For more than 10 years, NWT GmbH has been certified according to DIN EN ISO 13485, which guarantees the quality and performance of our products.

With the **NWT** brand, the user has a strong partner at his side for the requirements in daily practice. The continuous further development of our products, supported by the international network of customers and distributors as well as the customer service of NWT, ensures innovative technology with progressive design at an excellent price-performance ratio. We pay great attention to the sustainability of our products. It is our aim to create value, exceed expectations and be an indispensable partner for all of our customers. With the support of users and partners, we are working together on solutions for the health care of the future and we are proud of that.

MOBILE FOOT CARE

master MOBILE SPRAY

Easy to use everywhere

Lightweight and compact housing.

All the features of a processing unit.

Quick set-up and storage. A weight of only 2.7 kg makes the Master-Mobile light and flexible. Its compact size is ideal for daily mobile use.

Modern, high-quality components contribute to its small size and minimal weight, without restricting the level of functionality and requirements.

For comfortable home visits and more pleasant care at the client's home.

The **revolutionary design** of the MasterMobile Spray makes it compact, elegant, robust, easy to handle, transport and clean.

The MasterMobile Spray has a **precision handpiece** based on dental technology, which allows cleaning, disinfection and autoclaving of the handpiece.

The MasterMobile Spray has a **capacitive and intuitive touch screen**. The touch screen can be easily cleaned and disinfected with a disinfectant wipe, ensuring a perfect and hygienic working environment.

Thanks to its **ingenious tunnel system**, the motor cable can be easily stored for transport and pulled out when in use. During treatment, the handpiece can simply be placed in the holder.

The fluid bag is **easily accessible** and replaceable at the back of the unit.

The MasterMobile Spray has an **external plug-in power supply** and a speed control pedal, which allows the user to control the speed of the handpiece with their foot.

Quick installation and storage

Thanks to the new design, assembly and disassembly are easy, in less than a minute, light, comfortable and ergonomic.

master MOBILE vacuum

Easy to use everywhere

For comfortable home visits with a high level of care.

The MasterMobile Vacuum combines the functionality of a treatment centre in a compact device with a versatile handpiece. Its light and compact size makes it easy to carry and can be used anywhere, anytime.

Lightweight and compact housing.

Quick assembly and disassembly.

The revolutionary design of the MasterMobile Vacuum makes it **compact**, elegant, robust, easy to use, transport and clean.

The MasterMobile Vacuum has a **precision handpiece** based on dental technology to clean, disinfect and autoclave the handpiece.

The MasterMobile Vacuum is equipped with a **capacitive and intuitive touch screen**. The touch screen can be easily cleaned and disinfected with a disinfectant wipe, ensuring a perfect and hygienic working environment.

Thanks to its **ingenious tunnel system**, the suction hose can be easily stored for transport and taken out when in use. During treatment, the handpiece can be easily placed in the holder.

The dust bag is **easily accessible** and interchangeable on the front of the unit.

The MasterMobile vacuum has an **external power supply** and a speed control pedal, which allows the user to control the speed of the handpiece with their foot.

Quick installation and storage

Thanks to its innovative design, it is easy to assemble and store in less than a minute, lightweight, comfortable and ergonomic.

MasterSpray TOUCH

Helps you work.
Everywhere.

The MasterSpray touch is an efficient, compact and portable spraying device for professional users. This highly professional foot care device is equipped with precise, high-quality motors and handpieces based on dental technology.

The intuitive touch screen is very easy to clean, for a perfect and hygienic working environment. All functions of the MasterSpray Touch are electronically controlled, including the spray.

The MasterSpray touch is equipped with an **autoclavable handpiece** with or without light. All our motors and handpieces are based on dental technology.

The handpiece can be easily placed on the **holder** on the side of the unit at any time without the risk of falling.

The MasterSpray touch is equipped with a **capacitive touch screen**. This makes it easy and intuitive to use. Thanks to its smooth surface, it is very easy to clean and disinfect with a disinfectant wipe. This contributes to a perfectly hygienic working environment.

Thanks to the transparent door, the water tank is visible from the outside and the fill level can be checked at any time. **The water tank can be easily removed for filling or cleaning**

We offer a **robust bag** dedicated to the MasterSpray touch, which makes it easy to carry and store all the accessories of the device.

The MasterSpray touch is equipped with a **speed control pedal**, which allows the user to control the speed of the handpiece with his foot. This way of working means comfort and safety for the user.

MasterSpray TOUCH

185 x 285 x 207 mm

3,1 Kg

MAIN CHARACTERISTICS

- Choice of 5 powerful micromotors from dental technology.
- Speed range from 5,000 to 40,000 rpm.
- Left / right rotation.
- Light for optimal lighting of the treatment area.
- Separate activation/deactivation of the spraying function.
- Individual spray adjustment.
- Handpiece holder on the side of the unit.
- Optional: Classic on/off foot switch or speed control pedal.
- 250 ml capacity spray tank.

MasterVac

Silence, hygiene and performance

The **MasterVac** offers very high performance in a compact and lightweight unit. It is very easy to use and gives you peace of mind. The unit has a handpiece with high suction power, but is extremely quiet. The precision suction handpieces are based on our experience in dental technology.

The smooth control panel with integrated digital display is easy to clean and disinfect, ensuring a hygienic working environment. All functions of the MasterVac are electronically controlled. The motor speed can also be controlled by a foot pedal.

The MasterVac can be equipped with **two types of suction handpieces, disinfectable and autoclavable**, or simply disinfectable. All our suction handpieces are based on technology from the dental industry.

The handpiece can be easily placed in its **holder** on the side of the unit at any time without the risk of falling.

The MasterVac is equipped with a **numeric display keyboard**. This allows for simple and intuitive operation and the smooth surface of the display is very easy to clean with a disinfectant wipe, for a perfect and hygienic working environment.

The dust bag is **easily accessible** and interchangeable at the front of the unit.

Transporting the MasterVac is made easy with this shoulder bag, which allows the **transport and storage** of all the accessories of the device.

The MasterVac is equipped with a **speed control pedal** that allows the user to control the speed of the handpiece with his foot. This way of working means comfort and safety for the user.

MasterVac

TREATMENT CABINETS

MASTERCAB

Smart, powerful and compact

The Master Cab has been developed for users who only use spray technology.

The Master Cab offers a high-speed turbine, a 3-function syringe (spray, water, air) and a spray handpiece motor. All in a compact and hygienic cabinet. Installation is very easy, just plug it in and go!

The MasterCab is equipped with a **3-function syringe** (air, water, spray), a high-speed turbine and a micromotor with a lightweight handpiece. All these instruments are based on dental technology.

The cabinet has an integrated **silent compressor** and a **water tank**. No special installation is required for the MasterCab. All you need is a power outlet to work with the most modern and innovative technology.

Foot pedal for speed control to keep your hands free for processing.

This high-quality furniture is made **entirely of metal** and is resistant to disinfectants and cleaning agents. The elegant design and smooth surfaces make it easy to clean. The cabinet has a drawer with a push/pull opening mechanism. The integrated compressor is located in the lower part of the cabinet.

The cabinet is equipped with large lockable wheels, making it easy to move.

A **built-in 230 volt socket** allows an external device such as a magnifying glass to be connected.

The MasterCab can be equipped with an **LED magnifying lamp** that reflects daylight. The power of the magnifying glass provides an excellent view of the treatment area.

With its **large colour touch screen**, the MasterCab is easy to use and clean.

MINIPOD **CAB**

Simple and powerful.
All working techniques
in one unit.

Equipped with a spray handpiece, a 3-function syringe (spray, water, air) and a suction handpiece, the Millenium Cab gives the user the possibility to choose his technology according to his needs.

A maximum of functions and an ultra-simplified installation.

MILLENIUM **CAB**

The MinipodCab is equipped with a **3-function syringe** (air, water, spray), a suction handpiece and a micromotor with a light spray handpiece. All these instruments are based on dental technology.

The cabinet is equipped with a **silent compressor** and a **silent suction motor** for the handpieces and the 3-function syringe. A 1 litre water tank is easily accessible.

Foot pedal for speed control to free your hands.

This **high-quality furniture** is made **entirely of metal** with a coating that is resistant to disinfectants and cleaning products. The elegant design with its smooth surfaces makes it easy to clean. The unit has 5 drawers with a push/pull opening mechanism.

The dust bag is easily accessible and replaceable (detail of the MileniumCab version)

LED magnifying lamp with daylight. Dental lamp, with daylight for spot lighting.

With its **large colour touch screen**, the MinipodCab is easy to use and clean.

HANDPIECES
SPRAY OR VACUUM

AUTOCLAVABLE HANDPIECES

Instruments for professionals

Until now, the complete hygienic preparation of all handpieces, including sterilisation, was not possible. Disinfection of handpieces is not always sufficient. Handpieces that are not properly prepared and maintained can be damaged and transmit infections to the user or client. Every instrument used in the field of pedicure and podiatry must be prepared and maintained hygienically in accordance with the rules. NWT is aware of these requirements in daily practice and has found a simple and effective solution after many years of research.

Today, this problem has been solved. Thanks to a sophisticated and patented technology, NWT handpieces can be completely detached from the motor by a simple click. This new technology finally allows the handpiece to be optimally cleaned, disinfected and self-cleaned, both inside and out, to ensure greater safety for you and your customers.

During their daily use, handpieces are exposed to contamination by abrasion, dirt, dust and various pathogens. Both externally and internally, with suction handpieces, the dirt is sucked into the handpiece. In the case of spray handpieces, it is drawn into the handpiece by a physical process. A removable handpiece that can be cleaned, disinfected, autoclaved and resistant to chemicals and the high temperature of the autoclave is essential for hygienic preparation. The new NWT handpieces offer exactly this possibility without technical restrictions and without loss of performance.

The internal and external cleaning of instruments is an essential point in the choice of working tools.

IT'S FINALLY POSSIBLE

THE NEW VACUUM OR SPRAY HANDPIECES PDV40PLUS & G65L CAN BE CLEANED, DISINFECTED AND AUTOCLAVED.

NEW CUTTER CLAMPING SYSTEM Simple and powerful

NWT's new handpieces allow for a better clamping of the drill for a secure hold and more peace of mind. **A simple rotation opens or closes the clamping system** and ensures that the drill is secure. Even after years of use, the clamping system retains its holding power.

PDV40^{PLUS}

MAIN CHARACTERISTICS

- Removable handpiece for optimal cleaning, disinfection, sterilisation processes and maintenance.
- Low vibration, smooth rotation of the integrated clamping system.
- Strong and stable torque over the entire speed range.
- Ergonomic design of the handpiece for greater precision.
- The lightweight and compact handpiece reduces hand fatigue and improves balance.
- Hermetically sealed micromotors with low vibration and noise levels
- An increased clamping force of approximately 30% allows for a greater choice of cutters.
- Unique mechanics for longer life.
- Engine speeds from 4,000 to 40,000 rpm with a powerful torque of 3.4 Ncm.

G65L

MAIN CHARACTERISTICS

- Removable handpiece for optimal cleaning, disinfection, sterilisation processes and maintenance.
- Low vibration, smooth rotation of the integrated clamping system.
- Strong and stable torque over the entire speed range.
- Ergonomic design of the handpiece for greater precision.
- The lightweight and compact handpiece reduces hand fatigue and improves balance.
- Hermetically sealed micromotors with low vibration and noise levels.
- An increased clamping force of approximately 30% allows for a greater choice of cutters.
- Unique mechanics for longer life
- Engine speeds from 4,000 to 40,000 rpm with a powerful torque of 3.4 Ncm
- 32,000 LUX LED lighting, natural daylight for a better view (applies to the spray handpiece only).

PATENTED

HANDPIECES

Pododent 1

NSK's Pododent1 handpiece is a classic among spray handpieces, and has proven itself in daily use by thousands of professionals around the world for years.

MAIN CHARACTERISTICS

- Compact design
- Automatic clamping system
- Clean head system
- Single spray
- Unique NSK nozzle for optimised fine atomisation
- Direct drive 1:1
- Maximum speed of 40,000 rpm
- Quiet and powerful micromotor
- For milling cutters (Ø 2.35)

134 mm

Ø 26,6

OMNICUT HANDPIECES

Omnicut is a special patented tool head for the fast and safe removal of calloused tissue on the sole of the foot and heel. Omnicut is an ideal complement to the NWT handpiece motors (E-Type).

Omnicut + NT100

The special Omnicut treatment head is equipped with two rotating blades. This means that even thick, stubborn layers of the cornea can be removed layer by layer within seconds after appropriate pre-treatment. Omnicut is simply attached to the micromotor instead of the handpiece.

The treatment head can be removed for cleaning and blade replacement.

Omnicut and blades can be disinfected and autoclaved.
