PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

sample Abracadabra Rare D10 2g Disposable

Sample ID SD220629-094 (49388) Tested for Mile High Cure Matrix Concentrate (Inhalable Cannabis Good)

Sampled - Received Jun 29, 2022

Reported Jun 30, 2022

Analyses executed CAN20

Laboratory note: The estimated concentration of the unknown peak in the sample is 8.3% J Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)88-THC or d9-THC. At this time there are no reference standards available for (+)88-THC. (+)48-THC is a different compound from the main (-)48-THC cannabinoid and, therefore, these two compounds may have different refficacies. Using the most advanced instruments and techniques available, the separation of (+)48-THC and 9-THC is produced instruments and techniques available, the separation of (+)48-THC and 9-THC is rotationed and the separation of (+)48-THC and 9-THC is produced instruments and techniques available, the separation of (+)48-THC and 9-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available, the separation of (+)48-THC and 49-THC is produced instruments and techniques available techniques available. This report shall not be reproduced except in full, without the written approval of the lab. This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.
