

How to use your HighChi Energy Diffuser

Congratulations on choosing your HighChi Energy Diffuser!

Important: Make sure the turntable is moving in a clockwise position at all times. To turn it in the other direction simply hold down the turntable and release it, and it will change directions.

Note: The diffusers are also solar powered so if you use only solar rather than the battery provided it will turn more slowly than with the battery which is also fine. You may need to use the battery if you are using a HighChi Crystal on the turntable because the weight will demand more energy to turn it. To turn the unit off remove the battery.

We recommend keeping the diffuser on at all times as it will create the resonance in your environment of whatever energy you have chosen. ie: if you choose the energy of money magic, your environment will resonate at Money Magic. The law of resonance is that when two resonant frequencies come together one lifts, the other lowers, so they meet somewhere in the middle. So you will come into resonance with Money Magic and attract that to you. Similarly with Grounding, Healing, Power and Success, etc.

What we resonate at is what we create.
