

CORAL & TUSK

Coral & Tusk's creative process is a special alchemy of illustration, machine embroidery and hand-finishing. Beginning with a story, the designs are first created as pencil drawings, then redrawn stitch by stitch. Embroidered in India and finished by hand in Brooklyn NY, every machine-embroidered item retains the spirit and hand-drawn allure of the illustration.

With this collection we are so excited to have broadened our product offering to expand into every room of your home. Always informed by travel, natural beauty, landscape and animal activities, it has been a complete joy to translate these themes into larger scale products and further develop the way we use embroidery.

We remain in love with adornment as expressed through the craft, creativity and incredible resourcefulness of native cultures everywhere. We're so inspired by everyday objects that have been touched with beauty - a painted tree trunk, a garment woven with shells - nothing thrills more than the careful consideration taken to add embellishment where before there was none. Coral & Tusk strives to recreate these moments on every product.

We hope you love and appreciate the care we take with the stories we tell and the quality with which we express them. Fine but not precious, Coral & Tusk products are intended to entertain daily and provide enjoyment for generations.
