

Installation guide - 47SP2W-S

Please read through before installation. Please read safety guidelines leaflet.

Connect the solar panel lead to the **12v battery/solar panel** connection on the base of the energiser (red - positive, black- negative)

Push the bracket tab into the top of the energiser ensuring a tight fit

To make the most of the sun, position the panel facing south. An angle of approx. 60 degrees is best during the summer months, 35 degrees in spring and 15 degrees in winter.
