

DIY - Do it yourself Gelmania Refill Kit

Instructions for re-filling your Gelmania Candle

Use at your own risk. We take no responsibility for any damage or injury caused due to careless handling of our product. Candle must be cool to touch to begin your refill.

1. Clean your candle. Lysol wipes may be used to clean glass part of your candle. Please do not use water.
2. Inspect your candle to ensure that the candle and votive are not damaged or cracked. If damaged, please discontinue using.
3. Scoop balance gel from the bottom of the middle votive (not from sides of the candle). Wipe votive clean and dry.
4. With a blunt flat tool tip or butter knife, pry the old wick pin out.
5. Peel sticker from new wick and stick the new wick in the middle of the votive.
6. Remove plastic lid from container.
7. Place gel container on a baking sheet and put in oven at a baking temp of 220F (104 C) or until gel is melted and is runny. (Due to varying oven temps, melting time will vary 30-45mins+). DO NOT Increase oven temps more than the recommended temps.
8. Handle HOT container with caution by using oven mitts.
9. Using caution, immediately pour the melted gel in your prepped candle.
10. Allow to cool then trim wick.
11. Follow usual instructions to burn, maintain and enjoy your refilled candle!
