

# Are you still harming your tresses with chemicals?

March 8, 2016

11:15 AM MST

Are you still frying your locks and harming your health with chemical hair dyes? Researchers have been studying a possible link between hair dyes and **cancer**, especially blood cancer, for many years.

If you're looking to change your hair color and want a healthier and safer option, you might try **henna** hair color. Brands like **Surya Brasil's Henna Creams** and Powders use safe botanical ingredients, while protecting your scalp and simultaneously conditioning and strengthening your hair.

Every shade of these 100% vegan semi-permanent natural colors are enriched with vegetable extracts, including herbs and fruits from Brazil and India, which offer simultaneous coloration and deep conditioning treatment for hair, as well as intense treatment for the scalp. Infuse hair with lush vibrant color while nourishing with sustainably harvested botanicals. Safe to use on chemically treated hair, color-treated hair and highlights.

Surya Brasil **Henna Cream**: \$16.49

Surya Brasil **Henna Powder**: \$7.99

Surya Brasil's Henna formulations do not contain ammonia, PPD, parabens, propylene glycol, peroxide, resorcinol, metallic salts, artificial fragrance, mineral oils or GMO's. Surya Brasil Henna Creams are formulated with a very small percentage of mild, non-skin sensitizing color, which

are considering safe by Skin Deep (Environmental Working Group) standards. Surya Henna hair colors are hypoallergenic and dermatologically tested.

Surya Brasil natural, organic and vegan products are available at Whole Foods and other health food stores, pharmacies and beauty supply outlets all over Los Angeles. Check out their other products [here](#). Always use a great [deep conditioner](#) when using henna or any other hair dye.
