

GP APEX® The Peak of Graphic Performance

GP APEX is the most recent addition to the high-performance foam board portfolio, featuring an extremely flat, rigid and consistent plastic-faced foam board that delivers striking digital print results. Improved process controls have led to a superior board in terms of overall consistency and fabrication capabilities. The smooth, plastic facers allow for more vibrant colors and vivid images, making this high performance foam board an excellent solution for digital printing applications. The high-impact facers resist warping, are moisture-resistant, and are ideal for applying vinyl graphics. GP APEX is comprised of extruded polystyrene foam laminated using an advanced adhesive between two layers of polystyrene facers.

APPLICATIONS & FEATURES

- Comprised of extruded polystyrene foam laminated between two layers of polystyrene facers
- Bright white, smooth surfaces provide excellent direct print results
- Flexible facers enable enhanced fabrication capabilities
- Can be V-cut and folded for dimensional displays
- Advanced adhesive for clean cutting & routing
- Very good moisture & warp resistance
- Lightweight with good dimensional stability
- Plastic surfaces are ideal for applying vinyl graphics
- Short lead times on RTS/CTS orders and custom projects
- POP Displays
- Exhibits & Kiosk
- Interior Signage & Displays
- Dimensional Letters

SPECS

MODEL	GP APEX
GAUGES	3/16", 1/2", 3/4", 1", 2"
FACERS	White & Black
CORE	White & Black
SHEET SIZES	48" x 96", 60" x 120",
