PACKAGING THAT PUTS THE PLANET FIRST

Packaging Made From Plants

Responsibly Sourced & Manufactured

Certified Compostable

100% Carbon Neutral

Fast Delivery

We create compostable packaging solutions for a circular economy where there is no waste. It starts with responsibly sourced materials, continues with environmentally certified manufacturing processes, and ends with disposal options that see resources reused or regenerated.

GO CIRCULAR

The traditional economic model is linear and can be simplified as having three basic stages: take, make and waste. BioPak has a commitment to disrupt this outdated model and to invest in a waste-free future – where innovative design and corporate responsibility intersect to create a circular, and regenerative economy.

Plant-Based Raw Materials

Our plant-based products are designed to minimise the impact on our environment at each stage of their life cycle, by using materials that are both sustainably sourced and rapidly renewable. The footprint of these renewable materials is significantly smaller than that of traditional plastics derived from fossil resources – Ingeo™ bioplastic, for instance, has a footprint up to 80% lower.

Sugarcane Fibre

Sustainably Sourced Paper

PLA Bioplastic

The End is Just the Beginning

Our products are designed to turn into compost – a new, valuable and locally produced resource at the end of their useful life. A thin layer of compost can mitigate climate change by improving the soil's ability to stabilise carbon and by increasing plant growth, which pulls more carbon dioxide out of the atmosphere.

Responsible Supply Chain

BioPak products hold many certifications to ensure our products are made with people and the planet in mind first. Our certifications hold our manufacturers accountable and set a standard in the packaging industry to make sure people are treated and paid fairly, our products are safe for consumers and our planet is protected and even benefits from our product stewardship activities.

Industrial and Home Compost Certification

Carbon Neutral Certification

FSC™ and PEFC™ Certification

Profit for Purpose Business

Compostable Solutions

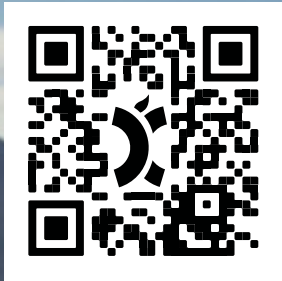

Did you know that the methane gas emitted from food in landfill is the third largest contributor to climate change?

Compostable packaging can help divert food scraps from landfill, avoiding harmful greenhouse gas emissions. Both food waste and compostable packaging can go in the same bin to be turned into nutrient-rich compost. There are a growing number of residential compost collections across Australia and New Zealand.

Find your local composter at Compost Connect today at compostconnect.org

Carbon Neutral

All BioPak products and business operations are carbon neutral. This means we offset all the unavoidable carbon emissions associated with the raw material, products, transportation and disposal of our products.

Chef Nic Watt

Leave Nothing to Waste

We can help you cut the rubbish. We're a nonprofit that connects businesses and people to compost services.

GIVE BACK FUND

\$ 3,363,945

As a profit for purpose business, we are driven to preserve and protect the environment and give back to the communities we live in. We started the BioPak Give Back Fund in 2012 and since have dedicated our time, energy and a total of \$3,363,945.

91,394 Tonnes of Carbon Offset

We offset all the unavoidable carbon emissions associated with the raw material, products, transportation and disposal of our products. In 21/22 we offset 91,394 tonnes of carbon emissions.

21,211 Tonnes of Plastic Avoided

At BioPak, we champion the transition to a circular economy with industry-leading products, made from plants. Our product range is made from renewable materials and certified compostable. In 21/22, we avoided 21,211 tonnes of plastic together with our customers.

34,041 Trees Planted

We are passionate about forest protection and restoration, and donate 1% of profits as part of this fund to support Rainforest Rescue in Australia and Green Fleet in New Zealand. In 21/22, we planted 34,041 trees.

Greenfleet

Greenfleet is a leading not-for-profit organisation committed to protecting our climate by restoring forests in New Zealand and Australia by capturing carbon emissions and restoring biodiversity.

We are donating 1% of our profits to GreenFleet for their New Zealand projects, such as Atiu Creek or Te Muri.

Product Stewardship

BioPak's new product stewardship scheme for organic waste and compostable packaging, Compost Connect, was awarded a national grant to reduce waste going to landfills, lift recycling rates and help foodservice businesses and consumers make a practical, positive difference for the environment.

CUP LIDS & ACCESSORIES

Our cup lids are designed specifically for BioCups, providing a leak-free secure fit every time.

BioCup Lids

We offer home compostable sugarcane lids, commercially compostable bioplastic PLA lids and recyclable plastic PS lids.

BioCup Trays

2 & 4-cup trays, made from 100% post-consumer recycled paper.

BioCup Sleeves

Paper sleeves made from sustainably sourced FSC™-certified paper.

Stirrers & Teaspoons

Available in traditional plastic alternatives such as PLA and FSC™-certified birchwood.

COLD CUPS & STRAWS

Clear bioplastic and paper BioCups are certified to AS4736 industrial compost standards

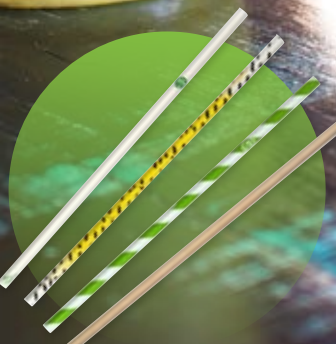

Cold Paper Cups

Cold paper cups are coated inside and out with compostable Ingeo™ plant based bioplastic.

Clear Bioplastic Cups

Clear cups made from plant-based Ingeo™ bioplastic. Certified industrially compostable.

Paper straws

Sustainably sourced FSC™ certified paper straws.

THE ONLY CERTIFIED COMPOSTABLE CUPS IN NEW ZEALAND & AUSTRALIA

Our extensive range of cold paper cups are certified industrially compostable to Australian AS4736 standards, these cups will break down to nutrient-rich compost within 120 days.

Available in 10 new sizes with matching compostable flat and dome lids, there is a solution for every occasion. Our 14oz cup is weights and measures approved for beer.

We have a variety of lids for our cold paper cups, including home compostable (AS5810) BioCane lids and industrially compostable (AS4736) clear PLA lids and paper lids with a PLA lining.

 <p>Clear Bioplastic</p> <p>Clear BioCups Clear BioBowls Salad BioBowls Clear PLA Lids (Sushi & Takeaway Lids)</p>	Ingeo™ bioplastic	 Industrially Compostable: AS4736					
 <p>Soft Bioplastic</p> <p>Bioplastic Gloves Singlet & Bin Liner Bioplastic Bags</p>	Ecopond bioplastic	 Industrially & Home Compostable: AS4736 & AS5810					
 <p>Opaque Bioplastic</p> <p>PLA BioCutlery & Opaque PLA Lids (for Paper BioCup & BioBowl Lids)</p>	Bioplastic (PLA lids are Ingeo™)	 Industrially Compostable: AS4736					
 <p>Plastic Lids</p>	PS & PP Plastic (BioCup & Takeaway Lids)	Polystyrene & polypropylene		 White Lids only			 PP is Microwave safe
	PET Lids (Takeaway Lids)	Polyethylene terephthalate			Can handle warm foods		

KNOW YOUR BIOPAK PACKAGING SYMBOLS

Disposal

Compostable

These symbols identify packaging that is independently certified as either home or industrially compostable. Industrially compostable certified products will disintegrate within 84 days and biodegrade within 180 days in industrial composting conditions. Certified home compostable products will biodegrade within 365 days in home composting conditions. We list the certification standards and our unique certificate number.

Recyclable

This packaging can be recycled through kerbside recycling collection – just make sure it's rinsed clean and free from grease and oil.

Product Materials

Responsibly Sourced Paper and Wood

We only use raw materials from responsibly managed plantations, including FSC™ certified plantations, to ensure our forests are protected forever.

Bioplastic/ Polylactic Acid (PLA)

Our plant-based bioplastic packaging is either home or industrially compostable and has a lower carbon footprint than conventional plastic packaging. It is not recyclable with conventional non-compostable plastics.

Plant Fibre

Our plastic-free plant fibre packaging is made from reclaimed and rapidly renewable sugarcane pulp – a by-product remaining after the juice has been extracted from the sugarcane refining industry (that would otherwise be burned). Plant fibre packaging can be recycled in the cardboard stream if not contaminated with food.

Conventional Plastic

We're in the process of phasing out all non-compostable plastic items. This type of plastic is well-marked so you can identify whether they're kerbside recyclable – they are **not** compostable.

Product Features

Customisable

Our experienced design team is here to assist with custom branding or bespoke mould sugarcane fibre solutions.

Hot or Cold Use

Our hot food friendly packaging is grease-proof and sturdy, and will retain its structural integrity whilst holding hot food. Our clear bioplastic cups and bowls are cold use only.

Microwave & Oven Friendly

We have noted which packaging is microwave and/or oven safe. Our sugarcane takeaway range can go in the oven at temperatures of up to 220°C for a maximum duration of 20 minutes.

Freezer Friendly

This symbol means the packaging is freezer friendly, however the structural integrity will vary depending on the food contained when frozen and thawed. We can supply samples for you to conduct testing.
