10. Loading Parameter Specification ............................................................................. 11
11. Precaution .................................................................................................................. 11
1. Scope:

This Product Specification covers the requirement of Mechanical Keyboard switch on product performance, test methods and quality assurance provisions.

2. Product Application:

Mainly applied on computer keyboards, cash registers, industrial equipment and Man-Machine interface.

3. Technology Parameters:

Ambient Humidity: 45 ~ 85% RH  
Operating Temperature Range: -10°C ~ +70°C  
Storage Temperature Range: -20°C ~ +70°C  
Suggested storage period: about 6 months  
Require the tin part on the switch terminals should keep good after storage guarantee date

Normal Condition:

Ambient temperature: 20±2°C  
Relative humidity: 65%±5%RH  
Air pressure: 86~101KPa  
Solder Ability: Lead-tin soldering: 245°C±5°C  5±0.5s  
Lead free soldering: 255°C±5°C  5±0.5s

Withstand Soldering Temperature: Wave soldering: 260±5°C  5±0.5s

4. Ratings

Rating: 12V AC/DC max. 2V DC min  
10mA AC/DC max. 10μA DC min  
Insulation Resistance: ≥100MΩ/DC 100V  
Withstand Voltage: 100 AC 1 Minute  
Mechanical Life: 100,000,000 Cycles

5. Profile Dimensions
### 6. Electrical Performance

| 8.7     | Salt Spray  | Apply the following environment to test (Only for contact test):  
(1) Temperature: 35±5°C  
(2) Salt water density: 5±1%  
(3) Duration: 12 hours  
(4) After test, the salt deposit shall be removed by running water.  
Appearance:  
No corrosion spot, no crack, no base plate naked.  
Contact Resistance:  
200 mΩ Max |
| 8.8     | Protection Against ingress of dust (IP5X)  
The switches are placed in a position of normal use inside the test chamber.  
The test is carried out according to the second enclosure of IEC60529/GB4208.  
The test shall be continued for a period of 8h.  
After test:  
Operating is normal.  
Between terminals, terminal and surface of the crust, Dielectric withstand in voltage ≥100V |
| 8.9     | Protection against ingress of water (IPX4)  
The switches are placed in a position of normal use inside the test table.  
The test is carried out according to the second enclosure of IEC60529/GB4208.  
After test:  
Operating is normal.  
Water don't enter electric parts of the switch inside.  
Between terminals, terminal and surface of the crust, Dielectric withstand in voltage ≥100V |
| 8.10    | Noise Test  
1. Decibel meter model: BK2250-L  
2. Background noise: 10 dB Max  
3. Metal strip to click product 3 times per second for 10 seconds, to maximize the noise test results by dB  
35 dB MAX |

</tbody>
</table>

(1) After switches were soldered, please be careful not to clean switches with solvent.
(2) Under the condition of using soldering iron, soldering temperature shall be 350°C ± 5 °C with 3±0.5s

11.2 Notes

(1) Please be cautious not to give excessive static load or shock to switches.
(2) Please be careful not to stack up P.W. B. after switches were soldered.
(3) Preservation under high temperature and high humidity or corrosive gas should be avoided. Especially, when you need to preserve for a long period, do not open the carton.
(4) The standard storage period is 3 months, with maximum up to 6 months, preferably to be used as soon as possible. After opening the package, you should put the remaining switches in a plastic bag to prevent from damp and corrosive gas.
(5) This Product Specification is considered as the technical agreement on product between the receiving customer and Kailh. Any information on Product Catalogue which is in conflict with or different from the corresponding information of this document is considered as invalid.
(6) If customer issue purchase orders without confirmation by signature of this specification after receipt, such confirmation will be considered as granted upon receipt of the first purchase order.
(7) If there is no order or no request for new specification after 1 year upon this specification is issued, the specification will be regarded as invalid.
(8) Products meet the ROHS & REACH environmental management substances control standards.
