SafeRacks®

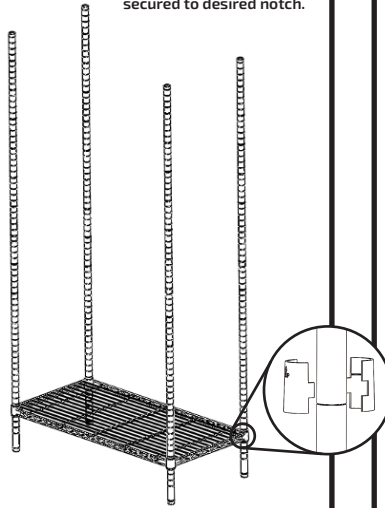

1.

Assemble post by using threaded insert to connect upper post to lower post. Place top cap on upper post and threaded foot on lower post. Repeat for all 4 posts.

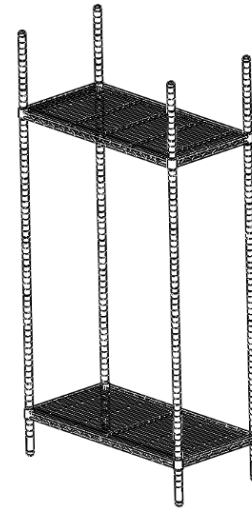

2.

*Position sleeves slightly above the notch, then compress and lower until secured to desired notch.

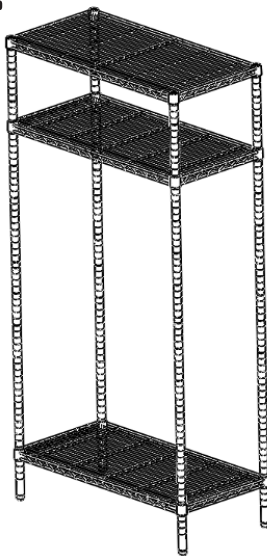

Connect sleeve pairs to the bottom of each post and ensure they are of equal height. Slide lower shelf over post and secure to a snug fit. (NOTE: A rubber mallet can be used to ensure the shelves are tight.)

3.

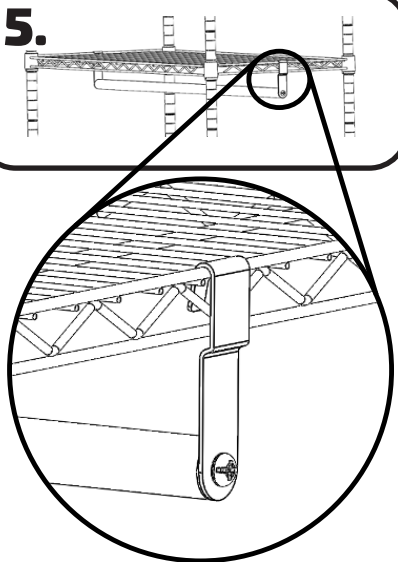

Repeat for second shelf at desired height. (Note: The second shelf will be used to secure the hangar rod.)

4.

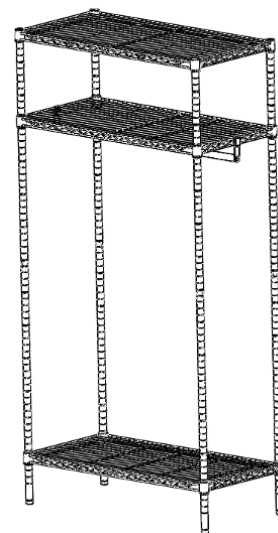

Connect sleeve pairs to the top of each post and ensure they are of equal height. Slide top shelf over post and secure to a snug fit.

5.

Position hanger rod hooks at desired location and secure by hooking to the outside of the shelf. (NOTE: It may be easier to assemble the hanger rod hooks to the hanger rod beforehand.)

6.

NOTE: The second shelf can be installed in a number of configurations (i.e. towards the top or the bottom of the garment rack) based on your preference.
