

Steering Wheel Remote Installation Guide for the M9900CDS Receiver

1. Attach the remote holder base to the inside edge of the steering wheel using the strap supplied as shown in Figure 1. Make certain that the arrow engraved into the remote holder base is facing the driver. Secure one end of the strap to the outer edge of the remote holder base as shown in Figure 1. Pull the strap snug around the steering wheel and secure the strap to the cleats on the holder base. Some stretching of the strap will be required but do not over-stretch the strap.

2. Cut the extra portion of the strap near the center of the remote holder as shown in Figure 2.

3. Attach the remote holder cover loosely to the holder base using the screws supplied as shown in Figure 3. Adjust/rotate the remote holder assembly to the desired position and tighten the screws.

4. Attach the **Remote Control** unit to the Holder as shown in Figure 4 until a "click" sound is heard. To remove the Remote Control unit from the Holder, press the **Ribbed Switch** toward the steering wheel, then slide the Remote Control off the Holder.

WARNINGS

- Do not install this Steering Wheel Remote in a location where it prevents the proper operation of safety devices such as air bags.
- Do not install this unit in a location where it prevents the proper operation of the steering wheel or gearshift lever.
- Do not install this Steering Wheel Remote in a location that may obstruct the driver's view.
- Do not install this unit to the outer edge of the steering wheel, it may interfere with driver's ability to steer the vehicle which could result in a traffic accident. Always attach this unit to the inside edge of the steering wheel as shown in Figure 5.
- Mount this unit securely to the steering wheel. If this unit is loose, it may interfere with driver's ability to properly steer the vehicle.
- Installation of this unit requires special skills and experience and should be entrusted to a trained technician.
- Install this unit using only the parts supplied. If other parts are used the unit may be damaged or could dismount itself, which could result in a traffic accident.
- Only install this unit as illustrated in this manual.
