

Gaming Products/Accessories

By RBCRE8IVE

Hello, we're Ralene and Bill from RBCre8ive, and we're reaching out about our ever expanding line of gaming accessories and gaming products.

We do laser engraving and cutting and have a line of table top gaming accessories and products. Mostly geared towards the D&D genre, we can create products and accessories for most table top dice based or card based game systems. We feature hand drawn original artwork on all of our dice rolling towers, have leatherette "budget" snap-trays for rolling, a fantastic Mimic chest of holding dice stash in our lineup already.

Coming in the next few weeks and months will be an entire line of dice rolling trays - custom made with 100% original artwork by our artists. These will include full-grain leather that's laser engraved on the rolling surfaces, magnetic lids so the dice and a miniature or two, paper and pens can all travel in one tidy, beautifully crafted carry case, where the

lid is removed to double as a writing surface for a character sheet, and reveals the leather and hardwood ply interior.

Building upon co-owner Bill's long tradition of gaming (his first D&D experience was at 8 years old on the AD&D 2nd edition), his step-son's artistic talent and a love of all things laser, this product line is available several ways.

1 - We are happy to offer all of our gaming products at a wholesale cost, with small minimum orders - we get it being a small gaming shop sometimes means ordering case quantities may not be feasible, especially for a higher end product that's hand drawn, hand crafted, uses real full-grain veg-tanned leather that's been laser engraved.

2 - We are happy to offer all of our gaming products on a consignment basis - where in we set the retail price, enter into an agreement with your business and determine what percentage of sales you will receive. We are fair and honest with all pricing and percentage of sales shared to ensure it's worth your store's time and effort as well as ours.

If you have another idea as to how you would like to offer our products - maybe online only drop ship, we're happy to work with you on that. Please do keep in mind, we do have our pricing structure fairly set and do have MSRP and MAP (Minimum Advertised Pricing) policies to ensure you neither over charge or undercharge for our products, ensuring they are a success - while we have these if you or we notice price adjustments would move more product for your shop, we're happy to work with your business and specific geographic area.

Most of our rolling trays, dice towers and chests are made from USA sourced hardwood MDF core plywood - Maple, Sapele, Mahogany, Walnut, Cherry, Cedar and more are all available. We also have access to 100% hardwood, although we've noticed on thinner material it's not as stable as the veneered plywood in various climate testing. Our leather is USA sourced, and we manufacture, laser cut & engrave and assemble all wood and acrylic products here in the USA.

We have swatch photos on our website on our Mimic Chest that you can view to see what we currently offer as wood availability can fluctuate during the different seasons. Some products, such as the leatherette rolling trays are imported. We also use USA sourced acrylic, PatternPly and PatternPly Acrylic to create one of a kind items.

If you have any questions do not to hesitate to contact us.
