

Our passion for quality doesn't end the moment you purchase one of our products, instead we want to ensure you continue to love your MiGOALS products day after day. All MiGOALS products are made from quality materials and constructed with the utmost care.

Our Journals & Dated product covers are crafted from a durable material called Polyurethane (PU) that characteristically is resistant to oils, marks & abrasions. However, as our products are individually handmade - you may find slight imperfections with the finish that might need a little extra love to keep it looking it's best.

How To Care For Your Products

- Polyurethane (PU) is a vegan leather material that doesn't require creams and waterproofer to clean.
- Gently rub with a clean eraser to remove scuff marks.
- Use a makeup wipe to remove fingerprint oils.
- Take care when using your MiGOALS product and avoid placing your products on/in surfaces that may scratch or damage the exterior.

In the unlikely event that you experience an issue that can't be restored using the techniques above & relates to craftsmanship of your MiGOALS product, please contact [enquiries @migoals.com.au](mailto:enquiries@migoals.com.au).
