BETTER IN MOTION

 **SPORLASTIC**[®]
ORTHOPAEDICS

SPORLASTIC

BETTER IN MOTION

Our mission is to help people to recover and maintain their physical mobility.
As a German, family-owned company with over 150 years of history, we represent excellent quality, cleverly designed products and innovative treatment concepts.

We have had a unique combination of textile, fashion and orthopaedic knowledge at our fingertips for generations.

Together. Better in motion.

In challenging times, you need trust, solidarity and reliability. Do you have any questions about our products or would you like some advice? Then please feel free to contact us. We are there for you, personally and digitally, Monday to Thursday 8 am – 5 pm and Friday 8 am – 4 pm.

Your SPORLASTIC Marketing and Sales Team.

Telephone: +49 7022 705181

Fax: +49 7022 705113

E-mail: info@sporlastic.de

OVER 150 YEARS DYNAMIC TEXTILE HISTORY

The success story of SPORLASTIC is based on our origins: Together with LUISA CERANO GmbH, we belong to the HAUBER Group from Nürtingen near Stuttgart.

Founded in 1870 by Ferdinand Hauber, we have stood for **the highest quality and textile expertise** in two seemingly different worlds – fashion and orthopaedics – for over 150 years.

The combination of the two worlds unites **textiles, fashion and orthopaedic knowledge** – successfully implemented in the innovative supports and braces from SPORLASTIC.

As a **family company for 5 generations**, we present ourselves to you as a competent partner to **medicine and the orthopaedics and health care supply sector**.

Working with doctors, therapists and technicians, we develop products and solutions for the holistic treatment of the human musculoskeletal system.

After all, we know that **the best results are only achieved when skills complement each other**.

Conscious handling of the environment and its resources is very important to us. In addition to measures to reduce CO₂ emissions at the Nürtingen site, we are also making our products more sustainable. Breathable 3D flat knitted fabric **with recycled yarn** was specially designed for the SUPREME series. Our ORGANIC series is characterized by its unique design, recycled materials and a **smaller carbon footprint**.

SPORLASTIC

OUR PROMISE OF QUALITY

SPORLASTIC products help to provide **optimised rehabilitation** and guide people back to **mobility more effectively**.

Carefully selected materials with **tested micro-climate values** guarantee excellent skin compatibility. The innovative **latex-free 3D flat knitted fabrics** adapt optimally to the physiological movement of the body. This allows functional compression

with a **proprioceptive mode of action** and an ideal fit.

Advanced knitting technology is used in our products – with intarsia comfort zones and 3D flat knits – **as well as seamless bonding** of various textile materials, **state-of-the-art sandwich constructions** and a wealth of sophisticated solutions in the details.

Supports and braces in dynamic quality.

Maximum wearing comfort thanks to pleasantly soft material blends

Advanced knitting technology and modern design

SPORLASTIC RESPONSIBILITY

WHAT WE STAND FOR

As a family business, we combine tradition with innovation by shaping the future with great respect for people and the environment. We are aware of our responsibility and have been working for years, beyond the legal requirements, on the great challenges of sustainable action, without loss of function in the product – both in product development as well as in the entire company.

Sustainable. Better in motion.

With supports and braces that think of tomorrow.

ORGANIC TECHNOLOGY INSPIRED BY NATURE – ENGINEERED BY SPORLASTIC

The organic structure of the **MANU-CAST® ORGANIC** wrist brace is a **real innovation** – inspired by nature. It gives the wrist brace the **necessary stability** and **also provides lightness and breathability**.

Use of
RECYCLED MATERIALS
to conserve resources

Reduction in
CO₂ EMISSIONS
through sustainable
product design

Clear
MATERIAL SAVINGS
for greater lightness –
with high stability

SPORLASTIC SUSTAINABILITY

WHERE WE'RE GOING

We also take responsibility for the supply chain and our sustainability team is continuously working on plans for further measures. This enables us to consistently guarantee the functionality and cost-effectiveness of our products.

We are already successfully implementing the following steps:

1. Climate protection by reducing CO₂ emissions
2. Resource conservation through sustainable product development
3. Fair production conditions at home and abroad
4. Social commitment through funding and donations

For a smaller ecological footprint and a humane coexistence.

SPORLASTIC

OUR HOLISTIC APPROACH

In combination with medical and physiotherapy measures, SPORLASTIC supports and braces support a **comprehensive treatment concept** that takes into account the causes of the underlying indications. This approach integrates physiotherapy exercises.

Offer your patients true additional benefits:

Patient brochures or **QR codes** on selected products take patients with a **smartphone or tablet** to important product information, as well as **guided therapeutic exercises** designed to promote a faster recovery.

Your patients have universal access to this vital information and exercises at any time and can carry them out by themselves, in keeping with our motto

Physiotherapy to go.

Physiotherapy to go
Access to therapy exercises and important patient information via QR code directly on the product

ALLENSBACH SURVEY HOW SUPPORTS AND BRACES HELP

76%

LESS PAIN-RELIEVING MEDICATION

According to a representative **Allensbach survey** on the effectiveness of orthopaedic aids, **76%** of wearers of supports/braces who previously had to regularly take pain-relieving medication were now able to **dispense with analgesics** either completely or partially as a result of using the aid.*

Functional aids and appliances

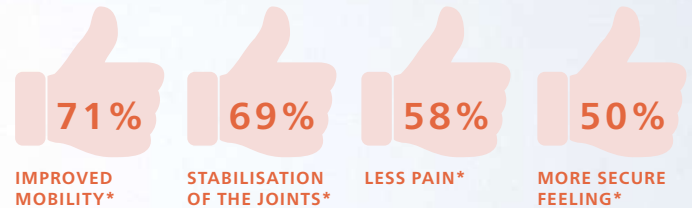

Indication-related therapeutic exercises

Helpful, tried-and-tested training equipment

POSITIVE EFFECTS

SUPPORTS AND BRACES HELP

Orthopaedic aids can specifically help to optimally support the healing process for the underlying indication, alleviate pain and provide secondary preventive protection against further injury.

* Representative survey by the Institute of Public Opinion Research in Allensbach on behalf of eurocom e.V. 2019 – European Manufacturers Federation for Compression Therapy and Orthopaedic Devices: "Use and effectiveness of medical aids".

DIGITAL HEALTH APPLICATION APP ON PRESCRIPTION

The digital health application **re.flex** as an app on prescription offers a detailed and indication-specific **training programme for patients with gonarthrosis**. This allows the guided and controlled exercises to be **carried out independently**. Using motion sensors, the app is able to provide the patient with **clear instructions and live feedback on performance of the exercise**. This provides improved exercise control, documents the course of therapy and relieves pressure on the doctor.

RE.FLEX

Digital training assistant for knee arthrosis therapy

Page 47

- ⊕ Pre-defined training programme with exercises for strengthening, balance, mobilisation, extension
- ⊕ 2-sensor technology ensures reliable angle measurement
- ⊕ Motion sequences are transferred to an app in real time and as 3D animation
- ⊕ Audiovisual correction if exercises are performed incorrectly
- ⊕ Digital documentation of the entire rehabilitation process

User interface
for therapeutic
exercises

SPORLASTIC OUR DIGITAL SUPPLY

SPORLASTIC relies on **digital treatment concepts** that promote efficient and sustainable therapy success. The **combination of orthopaedic aids, sensors and indication-related therapeutic exercises** makes a valuable contribution to supporting an optimal healing process.

3	21 - 23
4	23 - 25
5	25 - 27
6	27 - 29

- Colours: 
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Chronic capsular ligament instability
- Mild ankle sprain
- Irritation of the upper / lower ankle
- Arthrosis of the upper / lower ankle
- Rheumatological conditions
- Swelling

EFFECT

- SPORLASTIC AIR-MATRIX silicone pad: Perforated, breathable, light, anatomically shaped and nopped silicone pad for pressure relief and proprioception
- Otherwise as with **MALLEO-HIT®**

TECHNIQUE

- Breathable 3D flat knitted fabric with recycled yarn
- Three-part comfort zone for crease-free wearing
- Soft support edge with reduced pressure
- Innovative stretching zone for the perfect fit, even during movement

MALLEO-HIT®

Ankle support with nopped silicone friction pads

FIBULO-TAPE®

Functional ankle support as an alternative to tape bandaging

INDICATIONS

- Conservative / post-operative
- Chronic capsular ligament instability
- Mild ankle sprain
- Irritation of the upper / lower ankle
- Arthrosis of the upper / lower ankle
- Rheumatological conditions
- Swelling

EFFECT/TECHNIQUE

- Stabilisation, compression and relief
- Optimisation of proprioception
- Pain relief through reduced nociceptive afferences
- Friction massage
- Accelerated reabsorption of effusions
- Beneficial effects on insertion tendinopathies and bursitis typically seen with arthrosis
- Extremely elastic specialist knit for virtually crease-free wearing

4	23 - 25
5	25 - 27
6	27 - 29

- Colours:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Acute capsular ligament rupture
- Chronic capsular ligament instability
- Primary and secondary prophylaxis of sprains, especially during sport
- Ankle arthrosis
- Stabilisation of the upper ankle

EFFECT/TECHNIQUE

- Protective effect like with tape bandaging
- Stabilisation of the anterior talo-fibular ligament and fibulo-calcaneal ligament
- Reduction of the risk of supination trauma
- Optimisation of proprioception
- Gentle on the skin
- 8 strap
- Non-elasticated lateral strap

ARTHROFIX® AIR

Ankle brace with air cushioning based on the pneumatic principle

ARTICLE NUMBER

07840

SIZE

- One size only
- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- All conditions requiring stabilisation of the ankle with restriction of pronation and/or supination, such as:
 - Protection following ligament suturing / reconstruction
 - Acute capsular ligament rupture
 - Functional treatment of ligament ruptures
 - Ankle fractures (Weber A)
 - Ankle sprains
 - Chronic capsular ligament instability
- Primary and recurrence prophylaxis

EFFECT

- Stabilisation of the ankle joint with limitation of pronation and supination
- Avoidance of oedema and reduction of pain

TECHNIQUE

- Air cushion based on the pneumatic principle, 2-chamber system
- Anatomically moulded side shells
- Right and left version for the perfect fit

MALLEO-CAST®

Ankle brace for stabilisation in one plane, with air, foam or gel padding

Optimum stabilisation and support
due to anatomical shell construction

Fixation using two steplessly
adjustable straps

ARTICLE NUMBER

INDICATIONS

- Conservative / post-operative
- All conditions requiring stabilisation of the ankle with restriction of pronation and/or supination, such as:
 - Protection following ligament suturing / reconstruction
 - Acute capsular ligament rupture
 - Functional treatment of ligament ruptures
 - Ankle fractures (Weber A)
 - Ankle sprains
 - Chronic capsular ligament instability
 - Primary and recurrence prophylaxis

EFFECT

- Stabilisation of the ankle joint with limitation of pronation and supination
- Swelling reduction / prevention of oedema
- Optimum tension regulation with guide loops
- Acute care thanks to simple application and high stabilisation

TECHNIQUE

- AIR: Two-chamber system for optimum pressure regulation
- FOAM: Multilayer foam system for optimum pressure regulation
- GEL: Gel chambers with cooling system

INDICATIONS

- Conservative / post-operative
- Ankle sprains
- Acute capsular ligament rupture
- Chronic capsular ligament instability
- Primary and recurrence prophylaxis
- Arthrosis of the upper / lower ankle

EFFECT/TECHNIQUE

- Stabilisation of the ankle
- Limitation of talar prolapse and inversion
- Insole-like design with lacing and integrated spiral springs
- Medial and lateral reinforcement inlays, removable and thermally mouldable
- Stretching insert on the Achilles tendon

ARTICLE NUMBER

- Ankle sprains
- Acute capsular ligament rupture
- Chronic capsular ligament instability
- Primary and recurrence prophylaxis
- Arthrosis of the upper / lower ankle

EFFECT/TECHNIQUE

- Stabilisation of the ankle in inversion and eversion
- Limitation of talar prolapse and inversion
- Insole-like design with lacing and 8 strap
- Medial and lateral reinforcement inlays, removable and thermally mouldable
- Stretching insert on the Achilles tendon

MALLEODYN® S3

Dismountable ankle brace for dynamic mobilisation

Physiotherapy to go
Access to therapy exercises and application instructions via QR code in the product packaging

Removable 8 strap

Anatomically shaped side brace – easy to remove with one click

Cooling pad included for therapy-appropriate positioning

REMOVABLE IN 3 STEPS

1. Removing the cooling pad
2. Removing the side splint
3. Removing the 8 strap

ARTICLE NUMBER

07841

SIZE

Shoe sizes

1	35 - 40
2	41 - 47

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- All indications for which stabilisation or limitation of movement of the ankle with subsequent functional mobilisation of the injured or damaged structures is required
- Acute ankle injuries
- Acute capsular ligament instabilities and ruptures
- Limitation of talar prolapse and inversion
- Chronic capsular ligament instability
- Supination trauma
- Ankle sprains
- Prevention for ligament instabilities

EFFECT

- Limitation against talar prolapse and inversion using 8 straps and distal click fastener
- Stabilisation of the ankle in inversion and eversion
- Stabilisation of the ankle via the 3-point principle
- Stabilisation and prevention of supination trauma
- Therapy-appropriate positioning according to the RICE rule (integrated cooling pad)
- Prevention of window oedema due to closed brace construction

TECHNIQUE

- Thanks to its very flat construction, can be worn in almost any shoe
- Heel width adjustable via plantar strap: optimum hold on the heel
- High wearing comfort: Anatomical 3D shell construction combined with bi-elastic spacer fabric
- Click fasteners: Single setting of the straps and quick to put on with two clicks
- Guideline-compliant care: Removable in 3 steps

- Maximum breathability: Hydrophilic bi-elastic spacer fabric with Carbon Finish absorbs moisture and transports it outwards
- Y strap: Individual adjustment of stabilisation and compression according to the course of therapy
- Bi-elastic inner padding for pressure-free ankles
- Antibacterial effect of the inner padding with Carbon Finish

ACHILLODYN®

Achilles tendon support with septate friction pads and insulated heel wedge

Septate pads gently massage the oedema away from the paratenon during movement and encourage blood flow

Easier to put on thanks to two Velcro fastenings, steplessly adjustable

SPORLASTIC AIR-MATRIX silicone pads

Physiotherapy to go

Access to therapy exercises and application instructions via QR code in the product packaging

INDICATIONS

- Conservative / post-operative
- Achillodynia (tendinopathy) with/without partial rupture
- Paratendinitis, paratendinopathy
- Bursitis subachillea
- Bursitis calcanea

EFFECT/TECHNIQUE

- Temporary reduction of tension in the Achilles tendon
- Massage effect to reduce oedema and promote circulation
- Increased stability thanks to proprioception
- Avoidance of pelvic misalignment through additional heel wedge
- Two heel wedges made from shock-absorbent material
- Para-Achilles, septate silicone cushioning

ARTICLE NUMBER

07804

18 Distal tibia circumference

1	17 - 19
2	19 - 21
3	21 - 23
4	23 - 25
5	25 - 27
6	27 - 29

- Colours:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Impairment of walking/standing in the event of damage to the distal Achilles tendon or Achilles tendon insertion (as a result of injury, after surgery, in the case of degeneration, e.g. irritation in Haglund's deformity)
- For soft tissue compression/elastic support and pressure relief on ligament/fascial attachments
- Achillodynia (tendinopathy) with/without partial rupture
- Paratendinitis, paratendinopathy
- Bursitis subachillea
- Bursitis calcanea

EFFECT/TECHNIQUE

- Restoration of function, compression and massage of the Achilles tendon and the paratenon
- Functional guidance of the rear foot
- Reduction of non-physiological stress on the Achilles tendon
- SPORLASTIC AIR-MATRIX silicone pads are breathable, light, anatomically shaped:
 - Trigger point at the sustentaculum tali
 - Large pad for stimulation along the posterior tibial muscle
 - Asymmetrical, anatomical pad shape
- Three-part comfort zone for crease-free wearing

SP AIR WALKER

Lower limb and foot brace for immobilisation

SP AIR WALKER SHORT

Lower limb and foot brace for immobilisation, short version

Integrated air chamber system with pump for adjustment of the ideal fit

Excellent wearing comfort thanks to low weight and air-permeable frame construction

INDICATIONS

- Conservative / post-operative
- Distal fibular fracture
- Ankle fracture
- Tarsal bone and mid-foot fracture
- Stress fracture
- Achilles tendon rupture
- Severe ligament and soft tissue injury
- Severe ankle sprains

EFFECT/TECHNIQUE

- Inflating air chamber inside the shoe ensures secure hold and stabilisation
- The custom-adjustable pressure in the air chamber generates compression and has a swelling-reducing effect
- Shell construction for secure immobilisation of the lower leg and foot area at a 90° position
- Possibility of plantar flexion adjustment by means of optionally available heel wedges, e.g. in the event of rupture of the Achilles tendon (Article No. 27966)
- Shock-absorbing and slip-preventing sole with rolling aid

INDICATIONS

- Conservative / post-operative
- Plantar fasciitis with/without calcaneal spur

EFFECT/TECHNIQUE

- Reduction in tone of the surrounding soft tissue
- Stimulation of afferences
- Reduction of pain around the inflamed tendon insertion at the calcaneum
- Free dorsal extension
- Para-Achilles pads
- Custom-positionable partially elasticated pressure straps with silicone nops

CALCALASTIC®

Visco-elastic heel cushion made from silicone with "soft spot"

Medial soft spot for calcaneal spur relief

CALCALASTIC® LONG

Visco-elastic inlays made from silicone with "soft spots"

Soft spots in the area of the heel and metatarsal heads

NEURODYN® CLASSIC

Textile foot flexor brace for the dynamic compensation of flaccid paralysis

Semi-elastic 8 strap

ARTICLE NUMBER

07077

SIZE IN CM

18 Distal tibia circumference

1	17 - 19
2	19 - 21
3	21 - 23
4	23 - 25
5	25 - 27

- Colours:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Peroneal paralysis, all severities, especially for mild to moderate foot and toe flexor paresis (strength score 2–4)

EFFECT

- Supports foot flexion and improvement of gait
- Improves foot positioning thanks to proprioceptive effect
- Stabilisation of the ankle and avoidance of twisting

TECHNIQUE

- Step in with Velcro fastener
- Easy to put on with one hand thanks to finger sling
- 8 strap
- Non-elasticated lateral strap

NEURODYN® COMFORT

Foot flexor brace with single-handed closing

Semi-elastic 8 strap

THE TRICK WITH THE CLICK

1. Single-handed application
2. Simple readjustment with Y strap
3. Semi-elastic 8 strap with flexible inlay sole

18	L	24 - 28	46 - 47

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Flaccid and spastic foot flexor paresis e.g. following stroke, in multiple sclerosis, peroneal paresis, other neurological / muscular diseases

EFFECT

- Support of foot flexion
- Reduction in the risk of falls
- Wider step width and normalisation of gait
- More physiological gait
- Adjustable effect on pronation and supination

TECHNIQUE

- Ankle buckle with innovative single-handed closure
- Single-handed application with self-closing cuff
- Thermoplastically mouldable flexible inlay sole
- Semi-elastic 8 strap with powerful lifting effect
- Comfortable cushioning of the ankle area
- Closure straps with stop function
- High wearing comfort

NEURODYN® DYNAM-X FLEX

Dynamic foot flexor brace with innovative magnetic closure

SPORLASTIC
NEURO
ORTHOPAEDICS

NEURODYN® DYNAM-X ACTIVE

Dynamic foot flexor brace with innovative magnetic closure

SPORLASTIC
NEURO
ORTHOPAEDICS

Height-adjustable and thermo-plastically mouldable front shell

Dynamic support of toe separation through the return of energy from carbon springs

Carbon sole with heel pitch for better adjustment to the shoe

Single-handed operation with magnetic closure

Comfortable closure of the straps via easy-grab D-ring

ARTICLE NUMBER

SIZE

Shoe sizes

S	35 - 38
M	39 - 42
L	43 - 46

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Complete and partial flaccid foot flexor paresis
- Lumbar nerve root damage

EFFECT/TECHNIQUE

- Support of foot flexion
- Foot is held in 90° dorsal extension
- Ball roll pulled forward extends the forefoot lever
- Harmonious transition to the foot separation phase through ball roll
- More physiological gait and rolling behaviour
- High-quality orthopaedic inlay
- Low weight thanks to lightweight construction
- Optimised climate control thanks to openings in the front shell
- Breathable cushioning with pressure-minimising effect on tibial area
- Plastic shell can be shortened

INDICATIONS

- Conservative / post-operative
- Flaccid and (moderate) spastic foot flexor paresis e.g. following stroke, in multiple sclerosis, peroneal paresis, other neurological/muscular diseases
- Lumbar nerve root damage
- Quadriceps weakness
- Forefoot amputation (partial)

EFFECT/TECHNIQUE

- Knee-extending effect
- Plastic shell can be shortened
- Otherwise as with **NEURODYN® DYNAM-X FLEX**

SOLUTIONS FOR THE KNEE AND HIP

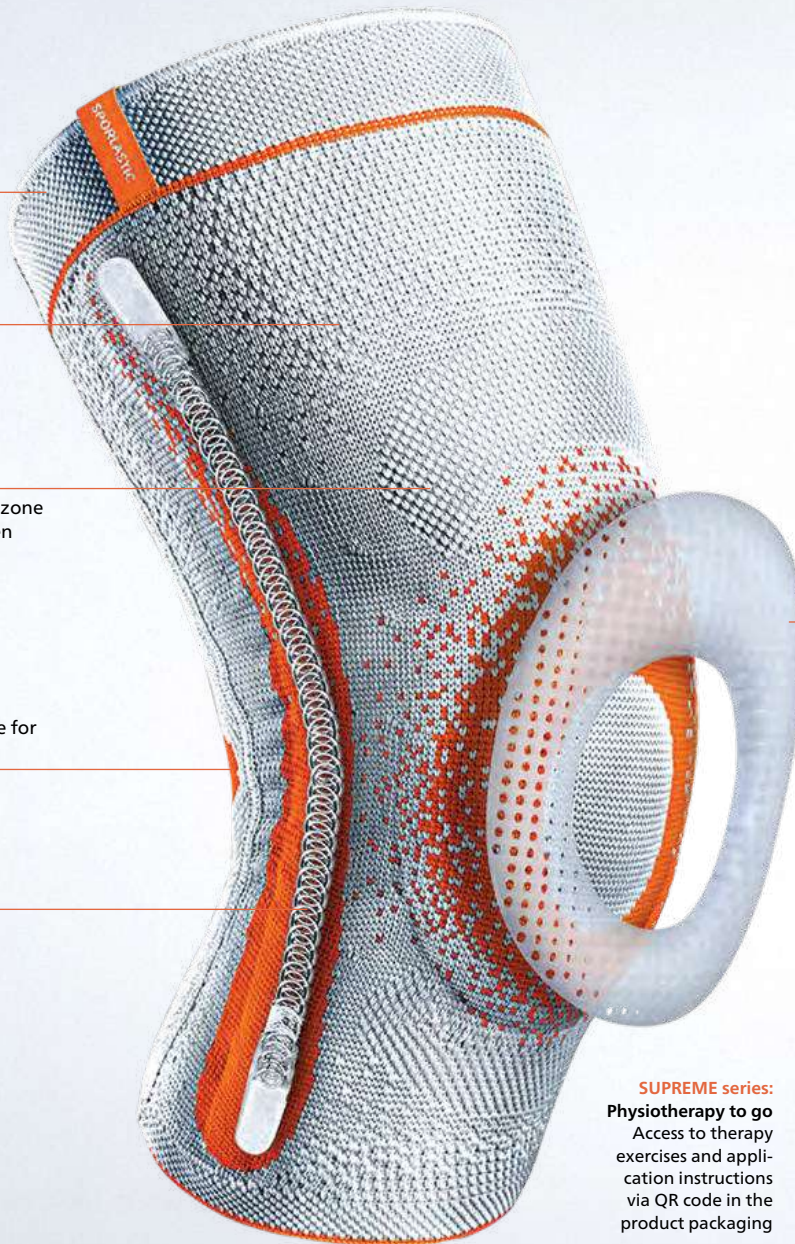

Soft support edge
with reduced
pressure

Breathable 3D flat
knitted fabric
with recycled yarn

Innovative stretching zone
for the perfect fit, even
during movement

Intarsia comfort zone for
crease-free wearing

Lateral, stabilising
spiral springs

MORBUS SCHLATTER KNEE SUPPORT

Local pressure relief for the tibial tuberosity with relaxation of the patellar tendon

Combined pad effect

ARTICLE NUMBER

07084

SIZE IN CM

	17 "d" measure- ment	15 "f" measure- ment
0	22 - 25	32 - 35
1	25 - 28	35 - 38
2	28 - 31	38 - 41
3	31 - 34	41 - 44
4	34 - 37	44 - 47
5	37 - 40	47 - 50
6	40 - 43	50 - 53
7	43 - 46	53 - 56

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Osgood-Schlatter syndrome
- Traction apophysitis of other cause
- Prominence of the tibial tuberosity caused by bone malformation
- Insertion tendinosis at the tibial tuberosity

EFFECT

- Finely adjustable pad pressure on the patella with relaxation of the patellar tendon
- Local pressure relief for the tibial tuberosity

TECHNIK

- Silicone pad, cut out at precisely the tendon insertion
- U-shaped pad, open at the distal end, with correction strap

MENISCUS KNEE SUPPORT

Compression support with variable positionable pressure pads and friction half-ring

GENU-HIT® WING

Knee support with nopped special pad to reduce ventro-medial knee pain

Friction pad with custom-positionable pressure pads

Symmetrical pad wings for bilateral wearing and optimised fit

ARTICLE NUMBER

07730

SIZE IN CM

	17 "d" measurement	15 "f" measurement
1	25 - 28	35 - 38
2	28 - 31	38 - 41
3	31 - 34	41 - 44
4	34 - 37	44 - 47
5	37 - 40	47 - 50
6	40 - 43	50 - 53
7	43 - 46	53 - 56

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Degenerative meniscal damage
- Meniscus compression
- Meniscal tear
- For residual swelling in the area of the suprapatellar recess
- Meniscal ganglion
- Tendency towards swelling
- Inflammatory effusions
- Baker's cysts

EFFECT/TECHNIQUE

- Relief of the meniscus through an increase in intra-articular pressure via the pressure pads medial and lateral to the patellar tendon
- Friction massage to reduce swelling in the area of the suprapatellar recess of the articular capsule of the knee during movement

ARTICLE NUMBER

07089

INDICATIONS

- Conservative / post-operative
- Ventro-medial knee pain
- Knee arthrosis
- Meniscal damage
- Chondropathia patellae
- Plica syndrome
- Baker's cysts

EFFECT/TECHNIQUE

- Friction pad with massage effect for improvement of proprioception
- Reduction of ventro-medial knee pain through pressure on the medial joint space
- Symmetrical pad wings for bilateral wearing and optimised fit
- Lateral, stabilising spiral springs
- Flat padded construction in the thigh area for better wearing comfort

PATELLADYN®

Knee support for active muscular and passive patellar medialisation

Lateral half-ring with pull straps and medial pad

Medialising straps

ARTICLE NUMBER

07085

SIZE IN CM

	17 "d" measurement	15 "f" measurement
1	25 - 28	35 - 38
2	28 - 31	38 - 41
3	31 - 34	41 - 44
4	34 - 37	44 - 47
5	37 - 40	47 - 50
6	40 - 43	50 - 53
7	43 - 46	53 - 56

• Colour:

• Please specify R or L

INDICATIONS

- Conservative / post-operative
- Patella lateralisation
- Chondropathia patellae
- Knee arthrosis
- Hypermobility patella
- Recurrent or habitual patella luxation
- Laxity of the anterior cruciate ligament

EFFECT/TECHNIQUE

- Generation of infra-patellar pressure stimulating proprioception
- Active muscular medialisation and supportive passive centring of the patella in the slide bearing
- Lateral silicone half-ring and medialising straps
- Customisable effective forces
- Lateral stabilising bars made from metal

SUPER-GENUPLUS

Knee support with combined proprioception and friction pad

Bi-functional pad with pull strap

ARTICLE NUMBER

07097

SIZE IN CM

	17 "d" measurement	15 "f" measurement
1	25 - 28	35 - 38
2	28 - 31	38 - 41
3	31 - 34	41 - 44

5	37 - 40	47 - 50
6	40 - 43	50 - 53
7	43 - 46	53 - 56

• Colour:

• Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Universal knee arthrosis
- Chondromalacia patellae and knee arthrosis with insertion tendinopathies
- Rheumatological conditions
- Patellar tendinitis

EFFECT/TECHNIQUE

- Generation of infra-patellar pressure stimulating proprioception
- Faster and more powerful muscle toning of the quadriceps muscle with balancing in favour of the vastus medialis muscle
- Encouragement of perfusion for the interior joint space and in cases of insertion tendinopathy
- Lateral stabilising bars

KASSELER PATELLAR TENDON SUPPORT

Highly effective proprioception support for professional and everyday use

Finely nopped proprioception pad with cut-out for the patellar tip

Excellent wearing comfort thanks to anatomically shaped strap

ARTICLE NUMBER

07229

SIZE

One size only, adjustable to a circumference from at least 27 cm to a maximum of 46 cm

- Colours:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Anterior knee pain:
 - Patellar tendinitis
 - Chondropathia patellae
 - Femoro-patellar arthrosis
- ACL laxity
- Rehab training
- Quadriceps weakness
- Muscular dystrophy

EFFECT

- Generation of infra-patellar pressure stimulating proprioception
- Toning of the quadriceps muscle with medialising effect on the patella
- Improved coordination and neuromuscular joint protection
- Pain relief

TECHNIQUE

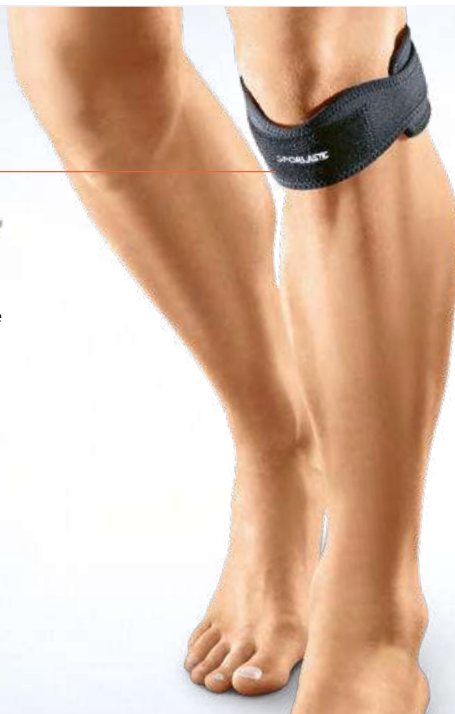

- Steplessly adjustable pad pressure
- Nopped pad with cut-out for the patellar tip to improve proprioception
- Strap can be individually shortened

KASSELER PATELLAR TENDON SUPPORT AKTIV

Highly effective proprioception support for therapy and sport

Finely nopped proprioception pad with cut-out for the patellar tip

ARTICLE NUMBER

07706

SIZE IN CM

16 Knee joint circumference

1	30 - 36
2	36 - 40

- Colour: 
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Anterior knee pain:
 - Patellar tendinitis
 - Chondropathia patellae
 - Femoro-patellar arthrosis
- ACL laxity
- Rehab training
- Quadriceps weakness
- Muscular dystrophy

EFFECT

- Generation of infra-patellar pressure stimulating proprioception
- Pain relief
- Toning of the quadriceps muscle with medialising effect on the patella

TECHNIQUE

- Anatomically adjustable popliteal fossa cushion
- Finely nopped proprioception pad with cut-out for the patellar tip
- Highly elastic, durable, coated neoprene with water-repellent plastic fibre
- Without deflection eyelet

GENU-HIT® GS

Knee brace with mouldable lateral joint bars

Monocentric joint bars

GENU-TEX®

Dynamic textile knee brace with polycentric joints

Adjustable polycentric four-axis joint

ARTICLE NUMBER

7	43 - 46	53 - 56

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Lateral ligament lesion
- Mild instability
- Arthritic conditions
- Knee arthrosis
- Inflammatory conditions
- Baker's cysts

EFFECT/TECHNIQUE

- Improvement of passive stability and guidance of the knee
- Avoidance of hyperextension through hyperextension limiter
- Unhindered drainage of blood and lymph fluid in the popliteal fossa area
- Reduction of inflammation of the ischio-crural tendon insertions
- Massage effect on Baker's cysts
- Silicone pad
- Circular strap system

INDICATIONS

- Conservative / post-operative
- ACL rupture
- Lateral ligament lesion
- Meniscal reconstruction
- Knee arthrosis
- Rheumatoid arthritis
- Instability
- Prophylaxis

EFFECT/TECHNIQUE

- Stabilisation and guidance of the knee joint
- Activation of muscle work through proprioceptive stimuli
- Controlled limitation of flexion (20°, 30°, 50°, 60°, 85°, 90°, open) and extension (0°, 5°, 10°)
- Anatomically pre-moulded medial / lateral joint bars
- Subdivided ventral and dorsal strap system
- Silicone ring for guidance of the patella

INDICATIONS

- Conservative / post-operative
- Ligament lesions (ACL, PCL, lateral ligaments)
- Ligament ruptures (ACL, PCL, lateral ligaments)
- Instability of the ACL, PCL, lateral ligament ruptures
- Meniscal injuries
- Combination injuries
- Patella fracture

EFFECT

- Additional strapping to control the posterior drawer
- Stabilisation of both the posterior and anterior drawer
- Functional knee guidance and stabilisation

TECHNIQUE

- Adjustment of flexion and extension
- Mouldable brace frame
- Ventral frame – simply position without stepping in
- Incongruent joints support the knee's physiological movements
- Extension: 0°, 10°, 20°, 30°
- Flexion: 0°, 10°, 20°, 45°, 60°, 75°, 90°
- Immobilisation is possible at 0°, 10°, 20°, 30°
- Living Hinge: Compensation of frame movements
- Single, permanent setting of the straps

M	44 - 50
L	50 - 56
XL	56 - 63
XXL	63 - 70

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- For pain reduction and relief of the medial or lateral compartment in cases of knee arthrosis
- Mild varus / valgus deformities
- All indications and symptoms requiring unicompartamental reduction in weight-bearing (e.g. pre and post-operatively for degenerative meniscal tears, stable tibial head fractures, lateral ligament injuries)

EFFECT

- Dynamic relief of the medial or lateral compartment with a 3-point principle
- Bilateral brace frame for physiological guidance and stabilisation of the knee with a 4-point principle
- Individual adjustment and relief: The correction pressure can be easily adjusted to individual requirements by means of a rotary wheel

TECHNIQUE

- Living Hinge: Maximum relief is achieved with full extension and slight flexion. The brace adjusts automatically during sitting and the swing phase and no correction pressure is applied
- Mouldable brace frame
- Ventral frame: Simply position without stepping in
- Extension: 0°, 20°, 30°, 40°
- Flexion: 45°, 60°, 75°, 90°

RE.FLEX

Digital training assistant with 2 motion sensors and training programme for gonarthrosis therapy

NEW

Can be combined
with the

GENUDYN® OA

Further
information via
digital@sporlastic.de

SIZE

One size only

- Colour: 
- Can be worn on the R and L

INDICATIONS

- Bilateral primary osteoarthritis of the knee
- Unilateral primary arthrosis of the knee
- Bilateral post-traumatic arthrosis of the knee
- Unilateral post-traumatic arthrosis of the knee
- Other bilateral secondary osteoarthritis of the knee
- Other unilateral secondary arthrosis of the knee
- Osteoarthritis of the knee, not specified

EFFECT

- Pain reduction
- Improvement of arthrosis-specific symptoms
- Strengthening of the quadriceps femoris

TECHNIQUE

- Detailed and pre-defined training programme
- Option for the patient to train independently
- Documentation of training activity, pain progression and overview of the perceived effort of the individual exercises
- Motion sensors provide the patient with clear instructions and live, direct audible and visual feedback in 3D on correct and incorrect performance of the exercise

V-FORCE®

Knee relief (OA) brace for the medial or lateral compartment

Adaptable corrective pressure thanks to adjustable varus / valgus positioning

Silicone adhesive strips prevent the brace from slipping

Partially elastic plastic shells for pleasant wearing comfort

Wrap for better adhesion and targeted rotation inhibition

KNEO

Over-ankle joint knee brace for unicompartamental relief

Partially elastic strap for high wearing comfort. Strap can be individually shortened and adjusted

Living Hinge: Permanent anatomical adaptation of the brace during movement

Finely adjustable correction pressure through moulding of the foot bar

INDICATIONS

- Conservative / post-operative
- Pre-operative
- Knee arthrosis
- Uni-compartmental relief before HTO (brace test)
- Bone bruising (post-traumatic bone marrow oedema)

SIZE

One size only

- Colour:

EFFECT/TECHNIQUE

- Monolateral brace frame for relief of the medial or lateral compartment
- Corrective influence on the joint axis in the standing and swing phase
- Pain relief
- Delay of joint wear
- Increased mobility
- Polycentric joint, adjustable varus / valgus angle as well as extension and flexion
- Extension: 0°, 5°, 10°, 15°, 20°, 25°
- Flexion: 45°, 60°, 75°, 90°

valgising mode
of action

07791

Lateral version:

Lateral relief, lateral/
valgus gonarthrosis,
genu valgum, X-leg,
varising mode of
action

INDICATIONS

- All indications and symptoms for which unicompartamental relief is indicated, e.g. gonarthrosis

SIZE IN CM

	22 Height of ankle joint	21 Height of fibular head
1	6.5 - 7.5	35 - 38
2	6.5 - 7.5	38.5 - 41.5
3	6.5 - 7.5	42 - 45
4	7.5 - 8.5	39.5 - 42.5
5	7.5 - 8.5	43 - 46
6	8.5 - 9.5	44 - 47

- Colour:
- Please specify R or L

EFFECT/TECHNIQUE

- The ground reaction force is transferred to the lateral splint and, depending on the design, the load line running through the knee is shifted in a medial or lateral direction. Relief of the medial or lateral compartment is the result
- Anatomically pre-shaped side brace, can be optimally adapted to the contour of the lower leg
- Flat construction for excellent wearing comfort: An optimised fit, even under clothing
- Brace sole can be individually cut to size

SIZE IN CM

Body size

1	150 - 174
2	175 - 200

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- All indications requiring immobilisation of the knee joint in an extended position, such as:
 - Damage to muscle/ bone/capsule/ligament structures in the knee joint
- For time-limited stabilisation in:
 - an extended position (applies to 07765)
 - a flexed position (applies to 07767)
- Pre-operative
- Post-traumatic
- Painful conditions
- Patella fracture
- Following patellar luxation

EFFECT/TECHNIQUE

- Immobilisation of the knee joint
 - In an extended position, approx. 0° (applies to 07765)
 - In a flexed position, approx. 20° (applies to 07767)
- Three-part system enables stepless adjustment to leg circumference
- Mouldable lateral and dorsal reinforcement bars for optimised fit
- Individually positionable/removable foam cushioning in the popliteal fossa
- Freely positionable straps to facilitate putting on
- Recess for the kneecap

INDICATIONS

- Conservative / post-operative
- Following total hip replacement (including revision)
- Following arthroscopy of the hip
- For arthrosis and arthritis

EFFECT/TECHNIQUE

- Compression to reduce the risk of post-operative haematoma formation
- Stabilisation of the hip joint
- Improved coordination and perception of the hip muscles (proprioception)
- Slight abducting effect on the hip joint
- Cold/hot pad to support physiotherapy
- Control strips to indicate correct compression
- Elasticated, breathable material
- Steplessly adjustable with Velcro fasteners

INDICATIONS

- Conservative
- Lumbar pain
- Muscular imbalances
- Radicular irritation syndromes
- Spinal canal stenosis
- Preventive stabilisation

EFFECT

Causal lumbar pain therapy with:

- SPORLASTIC AIR-MATRIX silicone pad: Anatomically shaped for proprioception
- Facilitation of reduction in lordosis, physiological muscle work and increased strength
- Reduction in lordosis through pressure build-up in the abdominal area
- Widening of the spinal canal
- Tone stimulation through friction massage

TECHNIQUE

- Breathable 3D flat knitted fabric with recycled yarn
- Soft support edge with reduced pressure
- Innovative stretching and comfort zone in the hip flexor area
- Perforated closure for excellent breathability
- Hand straps to make the brace easy to put on

XXL	120 - 130

- Front height: 19 cm
- Back height:
XS - S 34 cm
M - XXL 37 cm
- Colour:

INDICATIONS

- Damage in the lumbar spine region
 - Relief of the lumbar spine through reduction in lordosis
- All indications requiring relief of the lumbar spine by reducing lordosis, such as:
 - Severe lumbosciatica with muscular deficits occurring with significant disc protrusions/prolapse without absolute indication for surgery
 - Severe radicular, pseudoradicular lumbar syndrome (resistant to conservative therapy)
 - Spondylolisthesis with recurrent lumbosciatica
- Severe lumbar deformity with facet joint syndrome/arthritis
- Condition following intervertebral disc surgery without remaining paresis with cleared intervertebral disc, single-level spinal decompression without deformity, single-level intervertebral disc surgery
- Spinal canal stenosis with short walking distance without significant paresis
- Inflammatory conditions
- Degeneration
- Minor post-traumatic vertebral fractures

EFFECT

- Reduction in lordosis
- Movement and weight load of the upper body is transferred to the pelvis
- Rotational movements are reduced

TECHNIQUE

- Breathable 3D flat knitted fabric
- High air circulation with spacer fabric
- Pleasant transfer of force with self-aligning pelvis and trunk support straps
- Strength-saving application with 4-way pulley principle

VERTEBRADYN® STRONG

Lumbar support brace with reinforcing bars and traction elements

VERTEBRADYN® X.STRONG

Lumbar spine brace for mobilisation

Spring steel bars integrated into the back

The brace can be removed quickly and easily along with the abdominal plate and back shell

- Severe lumbosciatica
- Severe lumbar syndrome
- Spondylolisthesis
- Severe lumbar deformity with hypermobility
- Post-lumbar spine and vertebral disc surgery
- Lumbar instability
- Spinal canal stenosis
- Vertebral body fractures of L1-L5

EFFECT/TECHNIQUE

- Relief and reduction in lordosis through build-up of intra-abdominal pressure, forward tilt of the trunk and pelvic tilt
- Bridging function through integrated spring steel bars and semi-rigid back shell
- Limitation of rotation in the lumbar spine area through trunk shell
- Functional mobilisation through the option of removal for a bridging and lumbar support brace
- 4 lumbar spine-bridging spring steel bars

VERTEBRADYN® OSTEO

Dynamic back brace for active straightening and stabilisation

Backpack principle: Comfortable to put on thanks to maximum extension of arm slings

Easy to use: Only one strap for each side of the body

Arrester and parking position: Straps are always to hand

THE INTIMATE FIT PRINCIPLE

The VERTEBRADYN® OSTEO, the original with patented sliding element

DYNAMIC RECLINING EFFECT

Elastic reclining splint for continuous straightening effect

AUTOMATIC LENGTH ADJUSTMENT

Telescopic splint follows the movements of the body. This prevents the brace from sliding up

• Colour:

INDICATIONS

- Osteoporosis
- Stable vertebral fractures in the thoracic / lumbar spine area
- Conservative treatment of secondary kyphoses
- Painful hunchback
- Muscular laxity
- Ankylosing spondylitis (Bechterew's disease)
- Scheuermann's disease

The sizes marked in grey can be ordered as complete braces.

EFFECT

- Active straightening, relief and stabilisation of the entire back
- Dynamic reclining effect: Elastic reclining splint for continuous straightening effect
- Automatic length adjustment: Telescopic splint follows the movements of the body. This prevents the brace from sliding up
- Continuous adjustment of the corrective pressure

TECHNIQUE

- Anatomically pre-moulded and customisable reclining splint
- Comfortable to put on thanks to maximum extension of arm slings
- Straps are fed through guide loops to minimise the amount of force required
- Hand slings for easy closing
- Individual strap adjustment
- Custom-positionable shoulder pads
- Excellent wearing comfort thanks to elastic textile

VERTEBRADYN® ISG

Pelvic brace for stabilisation and relief

Physiotherapy to go
Access to therapy exercises
and important patient

INDICATIONS

- SIJ syndrome
- SIJ instability
- SIJ immobility
- Preventive stabilisation
- Myofascial pain syndrome
- Tendinopathies of the pelvic region
- Pelvic ring instability
- Symphyseal rupture
- Symphyseal separation
- Conservative treatment of sacral insufficiency fracture

EFFECT

- Stabilisation and relief of the entire pelvic region
- Stabilising pushing effect towards the middle of the body
- Permanent, targeted massage effect on the sacroiliac joints

TECHNIQUE

- Straps are fed through two guide loops to minimise the amount of force required when putting the brace on
- High wearing comfort thanks to optimised contour in the groin area
- Narrow construction: Can be worn perfectly under clothing
- Hand slings for easy closing
- Individual strap adjustment
- Excellent breathability

CERVILASTIC®

Anatomical cervical collar for day and night use

CERVI-HiT®

Anatomical cervical collar with reinforcement for day and night use

Air-permeable reinforcing inlay

ARTICLE NUMBER

OMO-HiT®

Shoulder and upper arm fixation for early functional treatment

Nipped silicone pad

Arm fixed with forearm sling, removable

ARTICLE NUMBER

07262

SIZE IN CM

9 Chest circumference

S	80 - 92
M	92 - 102
L	102 - 115
XL	115 - 125

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Shoulder luxation / subluxation
- Sprain, contusion
- Upper arm fractures
- Scapula fracture
- Rotator cuff injury
- Subacromial bursitis

EFFECT/TECHNIQUE

- Stabilisation and functional guidance of the shoulder
- Immobilisation / relief of the shoulder with forearm sling
- For early functional follow-up treatment during post-operative physiotherapy
- Silicone pad
- Cold / hot pad for pain and oedema reduction
- Quick and gentle to put on
- Removable forearm sling
- Axilla kept free to optimise personal hygiene and wearing comfort

OMO-LUX®

Shoulder luxation brace with fixed guidance yet free function

Anatomical shell guidance at the shoulder and neck

Three-dimensional joint

ARTICLE NUMBER

07245

SIZE

One size only, can be customised

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Habitual shoulder luxation
- Injury to acromioclavicular joint I and II Tossy grades
- Post-operative treatment follow-up with Tossy III ligament rupture
- Post-operative treatment follow-up after resection of the distal end of the clavicle
- Inflammatory conditions in arthrosis

Contraindication:

- No direct treatment following Tossy III injuries

EFFECT/TECHNIQUE

- Stabilisation and functional guidance of the shoulder joint
- Physiological joint movement – can be restricted with frontal strap
- Avoidance of secondary frozen shoulder
- Plastic shell linked with torsion joint
- Anatomically predetermined shell guidance in the shoulder area
- Thermally mouldable, extremely lightweight material
- Secure fixation through strap connections
- Axilla strap

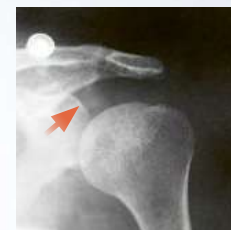

NEURO-LUX® II

Functional brace for stabilisation of the shoulder joint in cases of flaccid paralysis

Diagonal strap guidance encourages external rotation

Without NEURO-LUX® II

With NEURO-LUX® II:
Appropriate raising of the humeral head towards the articular cavity can be achieved via the lifting straps

ARTICLE NUMBER

07261

SIZE IN CM

Arm section			Shoulder section		
		4 Arm circumference			9 Chest circumference
1	S	21 - 25	S		75 - 90
2	S	21 - 25	M		90 - 105
3	S	21 - 25	L		105 - 125
4	M	25 - 29	S		75 - 90
5	M	25 - 29	M		90 - 105
6	M	25 - 29	L		105 - 125
7	L	29 - 35	S		75 - 90
8	L	29 - 35	M		90 - 105
9	L	29 - 35	L		105 - 125

- Colour:
- Please specify R or L

INDICATIONS

- Conservative
- Shoulder-hand syndrome
- Subluxation
- Weak and painfully restricted movement of the shoulder and arm muscles following:
 - Hemiplegia
 - Plexus injuries
 - Craniocerebral trauma
 - Trauma to the cervical spine
 - Peripheral nerve damage

EFFECT

- Repositioning of the humeral head in the shoulder joint with correction of subluxation and internal rotation
- Securing of the shoulder joint with free arm function
- Pain relief
- Avoidance of secondary damage to the capsule, tendons, muscles and nerves
- Improved gait thanks to guided arm swing movement
- Significant correction of pathological internal rotation through enclosure of the elbow and corresponding angled strap guidance causing external rotation

TECHNIQUE

- Correction of pathological internal rotation through angled strap guidance causing external rotation with enclosure of the elbow
- Shoulder section: Excellent fit
- Arm element: Easily adaptable, flat positioning, nopped adhesive strip
- Chest strap: Easy handling when closing and opening
- Arm element can be closed with one hand

OMO-HiT® SUPPORT

Shoulder joint brace for immobilisation

OMO-HiT® IMMOBIL

Shoulder joint brace for immobilisation

For bilateral use,
customisable

Special closure technique
allows single-handed
putting-on and taking-off

Optimised fit
thanks to anatomically
shaped arm support

Body strap for
fixation

ARTICLE NUMBER

07290

SIZE IN CM

5 Forearm length

S	21 - 27
M	27 - 33
L	33 - 38
XL	38 - 42

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- In cases of laxity or injury to the capsule and ligament apparatus of the shoulder
- Paralysis of the arm
- Stable subcapital humeral fracture
- Post-traumatic symptoms
- Indications that require relief of the shoulder and/or elbow joint

EFFECT/TECHNIQUE

- Limitation of shoulder joint mobility
- Arm sling made from open-meshed, breathable material for pleasant wearing comfort
- Relief of the shoulder, upper arm and elbow
- Thumb sling for greater stability
- Custom-adjustable straps and forearm position
- Quick fasteners to facilitate putting on and taking off
- Arm and hand fixation with Velcro fasteners

ARTICLE NUMBER

07292

SIZE IN CM

5 Forearm length

S	21 - 27
M	27 - 33
L	33 - 38
XL	38 - 42

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- In cases of laxity or injury to the capsule and ligament apparatus of the shoulder
- Paralysis of the arm
- Subcapital humeral fracture
- Post-traumatic symptoms
- Indications that require immobilisation of the shoulder and/or elbow joint

EFFECT/TECHNIQUE

- Immobilisation of the shoulder joint
- Fixation of the entire arm in a defined position
- Intuitive closure system: Even easier to wear on the left and right
- Otherwise as with **OMO-HiT® SUPPORT**

OMO-HiT® ABDUCTION

Shoulder joint brace for abduction positioning

Includes additional body strap for fixation

Anatomically shaped cushion for abduction and ball as hand support

ARTICLE NUMBER

07294

SIZE IN CM

5 Forearm length

S	21 - 27
M	27 - 33
L	33 - 38
XL	38 - 42

- Colour:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Subacromial bursitis/impingement
- Frozen shoulder
- For pre- and post-operative use in joint replacement
- Injuries to the shoulder and/or arm, especially with injury / tears of the rotator cuff
- All conditions requiring fixation of the arm in an abduction position

EFFECT

- Positioning and fixation in 30° abduction
- Anatomically shaped support for precise and secure arm positioning
- Anatomical neck cushion
- Thumb sling for greater stability
- Ball for hand positioning and training

TECHNIQUE

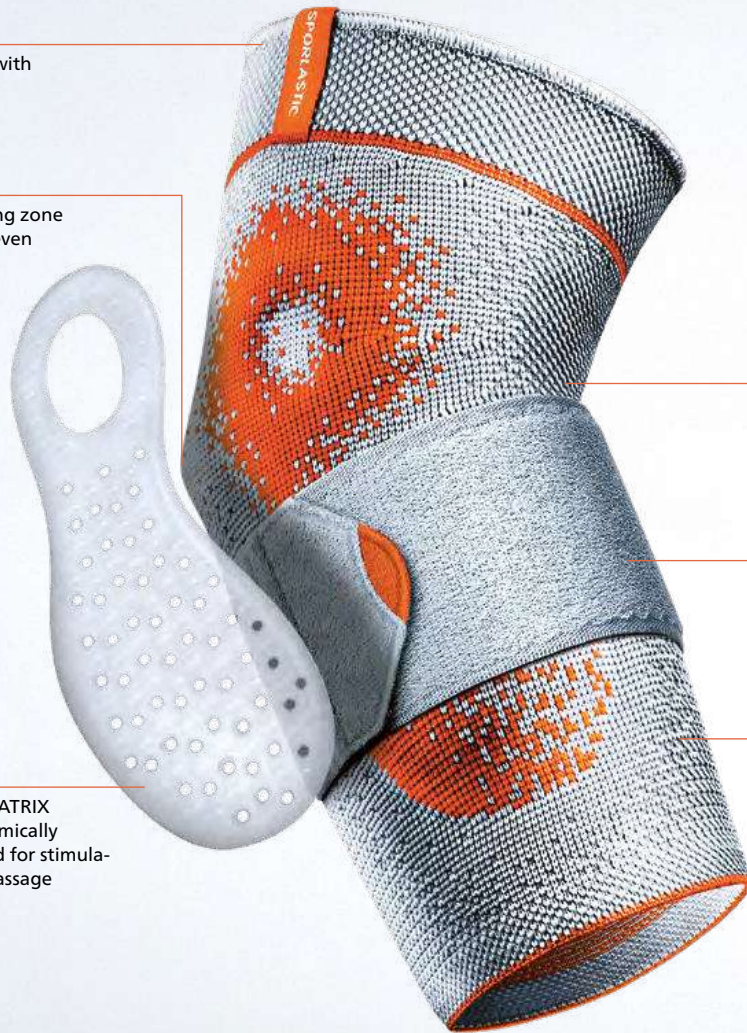

- Rapid closure of the shoulder strap, especially designed for single-handed operation
- Custom-adjustable belt system
- Arm sling made from open-meshed, breathable material
- Intuitive closure system: Even easier to wear on the left and right

SOLUTIONS FOR THE ELBOW

Soft support edge with reduced pressure

Innovative stretching zone for the perfect fit, even during movement

SPORLASTIC AIR-MATRIX silicone pad: Anatomically shaped and nopped for stimulation and friction massage

Highly elastic comfort zone for crease-free wearing

Elastic band for individual stabilisation

Breathable 3D flat knitted fabric with recycled yarn

- Epicondylitis humeri radialis/ulnaris (tennis elbow, golfer's elbow)
- Arthrosis
- Ligament laxity
- Elbow sprain
- Inflammatory conditions (e.g. after fractures and operations)
- Rheumatological conditions

EFFECT/TECHNIQUE

- Strain relief of tendon tissue altered by inflammation at the epicondyles
- Relief of the elbow joint
- Friction massage
- Pain relief
- Accelerated reabsorption of effusions through hyperaemia
- Improved nutritional situation for cartilage
- Finely adjustable, circular Velcro strap
- Correction of pathological traction direction at the muscle insertion

EPIDYN® STABIL

Elbow support with silicone friction pads and lateral reinforcement

INDICATIONS

- Conservative / post-operative
- Epicondylitis humeri radialis/ulnaris (tennis elbow, golfer's elbow)
- Lateral ligament instabilities
- Arthrosis, arthritis

EFFECT/TECHNIQUE

- Relief and stabilisation of the elbow joint through compression
- Improvement of proprioception and metabolism
- Decongestion and regeneration of damaged tissue
- Reduction of irritation at the origin of the tendon
- Correction of pathological traction direction at the muscle insertion
- Comfortable to put on thanks to Velcro fastener
- Compression of the upper arm can be controlled with Velcro fastener

EPI-HiT®

Epicondylitis support band with laterally and medially nopped friction pad and wrist support

ARTICLE NUMBER

07505

SIZE

One size only, adjustable to an arm circumference from at least 21 cm to a maximum of 36 cm

- Colours: Support strap: Support: Support strap/support:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Epicondylitis humeri radialis/ulnaris (tennis elbow, golfer's elbow)

EPI-HiT® is included in therapy set:

- Epicondylitis support band
 - Wrist support
- The wrist support is included free of charge.

EFFECT/TECHNIQUE

- Relief of the affected muscle at the tendon insertion through specific pressure build-up
- Activation of intramuscular metabolism through frictional massage
- Stabilisation of the wrist (wrist support) reduces pain-triggering activity of the extensor muscles
- Nopped inner pad
- Simple pressure regulation
- Anatomical fit
- Straps can be shortened
- Closure straps with slip stop

EPI-HiT® CLASSIC

Epicondylitis support band with laterally and medially nopped friction pad and wrist support

Reduces pain-triggering activity of the extensor muscles

Nopped friction pad

CUBIDYN

Epicondylitis support band with friction pad

Silicone friction pad

ARTICLE NUMBER

INDICATIONS

- Conservative / post-operative
- Epicondylitis humeri radialis/ulnaris (tennis elbow, golfer's elbow)

EPI-HiT® CLASSIC included in therapy set:

- Epicondylitis support band
 - Wrist support
- The wrist support is included free of charge.

EFFECT/TECHNIQUE

- Relief of the affected muscle at the tendon insertion through specific pressure build-up
- Activation of intramuscular metabolism through friction massage
- Stabilisation of the wrist (wrist support) reduces pain-triggering activity of the extensor muscles
- Simple pressure regulation
- Anatomical fit
- Nopped padding
- Straps can be shortened

ARTICLE NUMBER

07236

SIZE

One size only, for all arm circumferences (maximum 37 cm)

- Colours:  
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Epicondylitis humeri radialis/ulnaris (tennis elbow, golfer's elbow)

EFFECT/TECHNIQUE

- Correction of pathological traction direction at the muscle insertion
- Proprioceptive effect of the band pressure with reflexive reduction of muscular hypertension
- Friction massage
- Pain relief
- Stepless pressure control

OLECRANON-SUPPORT

Elbow support with silicone profile inlay around the olecranon

Silicone profile inlay for extensive protection

ARTICLE NUMBER

07235

SIZE IN CM

3 Elbow circumference

S	24 - 26
M	26 - 28
L	28 - 30
XL	30 - 32

- Colour: 
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Olecranon bursitis
- Following contusion with persistent inflammation in the area of the olecranon
- Insertion tendinopathy of the triceps tendon
- Previous surgery (bursectomy)
- Sulcus ulnaris syndrome

EFFECT

- Extensive protection for the entire elbow area
- Pressure relief when resting the elbow
- Relief and compression of the elbow joint
- Regeneration of damaged tissue

TECHNIQUE

- Silicone profile inlay surrounds the olecranon

SP ELBOW-HAND-BRACE

SPORLASTIC
CLINIC
ORTHOPAEDICS

Elbow brace for mobilisation

Adjustable flexion at the elbow in 30° steps – from full extension and flexion to immobilisation in a 90° position

ROM ELBOW BRACE

With control of forearm rotation (supination/pronation) and limitation of flexion/extension

Adjustable position of the retaining grip

ARTICLE NUMBER

INDICATIONS

- Conservative / post-operative
- TFCC injury
- Luxation or fracture of the distal radio-ulnar joint (DRUJ)
- Forearm fracture
- Radial head fracture
- Elbow fracture
- Injury to the membrana interossea
- Luxation and ligament injury of the elbow
- Luxation and ligament injury of the proximal radio-ulnar joint (PRUJ)

EFFECT/TECHNIQUE

- Customisable to individual arm length
- Optimised fit thanks to modular system
- Fast and simple adjustment of the ROM joint in 30° increments
- Custom length-adjustable wrist cantilever
- Preservation of finger and thumb mobility
- Additional Velcro straps for hand stabilisation
- Immediate mobilisation of the wrist possible

INDICATIONS

- Conservative / post-operative
- Elbow luxations with accompanying injuries
- Fractures
- Soft tissue injuries

EFFECT/TECHNIQUE

- Immobilisation of the elbow joint
- Movement control through treatment-guided, adjustable range of movement
- Early passive mobilisation
- Rapid progress with active mobilisation
- Hand grip with supination/pronation and flexion/extension settings
- Movement-restricting ROM joint, adjustable without a tool from 0° to 150° in 30° increments

- Conservative / post-operative
- Sprains
- Tendon sheath inflammation
- Wrist strain symptoms
- Following fractures
- Following removal of plaster casts
- Inflammatory conditions (post-traumatic, post-operative, rheumatism-related)

EFFECT

- SPORLASTIC AIR-MATRIX silicone pad: Anatomically shaped for relief of the ulnar head
- Stabilisation in a functional position
- Stress reduction
- Activation of the venous and lymphatic system through compression
- Reduction of swelling and improved reabsorption of effusions
- Reduction of pain and restoration of hand function

TECHNIQUE

- Breathable 3D flat knitted fabric with recycled yarn
- Soft support edge with reduced pressure
- Innovative stretching zone to facilitate putting on and for optimum stabilisation
- Highly elastic comfort zone in the thumb area
- Removable circular strap for individual relief
- Thermoplastically mouldable and removable volar reinforcement bar

INDICATIONS

- Conservative / post-operative
- Carpal tunnel syndrome/ CTS
- Tendon sheath inflammation
- Arthrosis of the wrist
- Peripheral irritation of the ulnar nerve in the Guyon canal
- Post-operative immobilisation
- Post-operative residual symptoms

EFFECT

- Relief of carpal tunnel
- Fixation in functional position
- Avoidance of further narrowing of the carpal tunnel cross-section
- Protection against pressure irritation in the area of the carpal tunnel
- Stimulation of oedema drainage in the wrist and vascular system

TECHNIQUE

- CTS RELIEF PAD: anatomically shaped with exposure of the carpal tunnel, the median nerve, one-piece, individually positionable via micro-Velcro and removable
- Closure system: Three supple micro-Velcro fasteners and slip stop
- Optimum anatomical fit, also possible with conical forearm shapes
- Custom-adjustable thumb fastener
- Custom-mouldable volar and dorsal reinforcement bars

• Length: 18 cm

• Colours:

• Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Arthrosis of the wrist
- Severe sprains
- Early functional post-operative follow-up treatment after the first dressing change
- Strain arthropathies
- Interim care following plaster casts
- Conservative treatment of the early stages of aseptic bony necrosis of the carpus
- Drop hand

EFFECT

- Stabilising and movement-restricting
- Reduction of strain on the carpal bones, joint capsule and ligaments
- Fixation of the carpus, free mobility of the thumbs and fingers

TECHNIQUE

- Self-aligning, supple Y strap with elastic and inelastic components for optimum stabilisation, even at high activity levels
- Volar micro-Velcro enables pretensioning of the circular Y strap
- Breathable, open design
- Right and left marking for intuitive replacement of the reinforcement bar
- Custom-mouldable volar and dorsal reinforcement bar

MANU-CAST® ORGANIC

Wrist brace for immobilisation

Self-aligning
thumb bridge

High breathability
due to the organic
structure of the
ORGANIC FRAME and
the spacer fabric of the
3D SPACE KNIT

ARTICLE NUMBER

07059

SIZE IN CM

6 Wrist circumference

1	13 - 18
2	18 - 21

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Injury to the hand in the area of the wrist and the middle of the hand
- For immobilisation of the wrist with free movement of the thumb and fingers
- All indications requiring immobilisation of the wrist in at least two movement directions with free finger mobility, such as:
 - Pre-operative
 - Post-traumatic
 - Carpal tunnel syndrome/CTS
 - Inflammatory conditions
 - Degeneration
 - Rheumatological conditions

EFFECT

- Relief, immobilisation of the wrist
- Positioning in the physiological or therapeutically necessary hand/forearm position
- Thumb and fingers remain freely mobile

TECHNIQUE

- Excellent breathability due to the organic structure of the ORGANIC FRAME and the spacer fabric of the 3D SPACE KNIT
- QUICK CLICK SYSTEM offers intuitive handling and positioning after changing or washing
- Optimised fit thanks to excellent adaptability
- Low brace weight due to optimised use of material
- Made from recycled materials

Accessories:

3D SPACE KNIT

MANU-HIT® AIR T

SPORLASTIC
NEURO
ORTHOPAEDICS

WRIST SUPPORT

Wrist brace with integrated air chamber system for mobilising the wrist, fingers and thumb

7.5 cm wide, with stabilisation strap and Velcro fastener

ARTICLE NUMBER

07356

SIZE IN CM

7 Width of the hand over the metacarpophalangeal joints

1	8 - 12
2	10 - 13

- Colour:
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Post-traumatic
- Chronic PCP
- For flaccid and spastic paralysis of the wrist, fingers and thumb

EFFECT/TECHNIQUE

- To prevent malpositions of the wrist, fingers and thumb
- To avoid hand, finger and thumb flexion contractures in the case of neurological diseases
- Additional guidance and stabilisation of the thumb
- Air chamber can be regulated via the air pump for dynamic positioning of the wrist, fingers and thumb
- Breathable padding for excellent comfort while wearing
- Easy to put on with circular Velcro fasteners
- Replacement cover is included

Accessories:

FOR EPI HIT® AND EPI HiT® CLASSIC
NO INSURANCE FUND COVERAGE

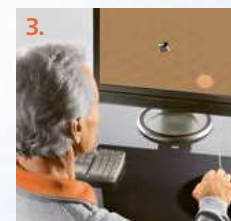

Article No. 01125

SIZE

- One size only
- Colours:
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Sprains
- Mild instability

3-PILLAR CONCEPT

1. Hand in functional position
2. Mobilisation and self-led training
3. Computer-assisted, motor repetition training for individual, group and self-led therapy

ARTICLE NUMBER

02810

SIZE

- One size only
- Colour:
- Can be used on both sides

INDICATIONS

- Conservative / post-operative
- Pareses requiring positioning assistance, e.g. following a stroke
- Plegia of the hand
- Central movement limitations and spasticity of the arm and hand region

EFFECT

- Reduction of oedema
- Passive and active contracture prophylaxis
- Tone regulation
- Improved tactile perception
- Early self-led training
- Improved amenability to therapy

TECHNIQUE

- Positioning system with anatomical hand support
- Velcro fastening disc can be secured with press studs
- Surface can be wiped with disinfectant
- Includes two textile hygiene covers
- Accessory for passive and dynamic positioning
- Recess for computer mouse (computer mouse not included)
- Can be used for extensive therapeutic exercises, including at home
- Includes exercise manual

SOLUTIONS FOR THUMBS AND FINGERS

Ideal adaptation to the wearer's anatomy

SPORLASTIC Spaceframe for maximum stability

Easy to use, excellent breathability

Closure features slip stop and high-quality micro-Velcro

Soft edges for excellent comfort while wearing

RHIZO-HiT®

Textile brace for the metacarpo-phalangeal and carpo-metacarpal joint

ARTICLE NUMBER

07610

SIZE IN CM

6 Wrist circumference

XS	13 - 15
S	15 - 17
M	17 - 19
L	19 - 21

- Colours:  
- Can be worn on the R and L

INDICATIONS

- Conservative / post-operative
- Injuries, tendon instabilities in the area of the metacarpo-phalangeal and carpo-metacarpal joint (e.g. skier's thumb)
- Arthrosis of the radial carpus and MCP 1
- Moderate to severe rhizarthrosis with marked subluxation with/without hypermobility of the carpo-metacarpal joint
- De Quervain's tendovaginitis stenosans
- Mobile phone thumb
- Following fractures

EFFECT

- Stabilisation of the metacarpo-phalangeal and carpo-metacarpal joint
- Restriction of wrist movement
- Preservation of grip function

TECHNIQUE

- Anatomically mouldable aluminium inlay
- Circular strap with forearm sling and block to prevent sliding out

Textile brace for the metacarpo-phalangeal and carpo-metacarpal joint

Brace for fixation of the metacarpo-phalangeal and carpo-metacarpal joint

ARTICLE NUMBER

INDICATIONS

- Conservative / post-operative
- Ulnar lateral ligament lesion of MCP 1 (e.g. skier's thumb)
- Partial immobilisation of the radial carpus, metacarpo-phalangeal and carpo-metacarpal joint in cases of saddle joint arthrosis
- Arthrosis of the radial carpus and MCP 1
- Navicular pseudoarthrosis

EFFECT/TECHNIQUE

- Partial immobilisation of the metacarpo-phalangeal and carpo-metacarpal joint as well as the carpus
- Preservation of grip function
- Wrist remains freely mobile
- Prevention of waterlogging
- Excellent breathability
- Enables air circulation
- Thermally mouldable

ELASTIC THUMB SUPPORT

Elastic wrist support for thumb stabilisation

Integrated
thumb
stabilisers

INDICATIONS

- Conservative / post-operative
- Moderate rhizarthrosis with marked subluxation
- Arthrosis of the metacarpo-phalangeal joint
- Ligament instability
- Tendon inflammation in the area of the thumb
- Previous fracture in the area of the metacarpo-phalangeal joint, 1st metacarpal, carpo-metacarpal joint
- Immobilisation of arthrotic and unstable carpo-metacarpal joint in the functional position
- Immobilisation of hypermobile metacarpo-phalangeal joint
- Free mobility of the wrist
- Counteraction of subluxation
- Sweat-absorbing lining stocking
- Thermally mouldable material

RHIZO-RING® SOFT

Rhizarthrosis brace for stabilisation of the carpo-metacarpal joint

SPORLASTIC
CLINIC
ORTHOPAEDICS

Firm material for high stabilisation

Soft material for high and pleasant wearing comfort

ARTICLE NUMBER

07601

SIZE IN CM

6 Wrist circumference

S	15 - 17
M	17 - 19
L	19 - 21

- Colours: 
- Please specify R or L

INDICATIONS

- Conservative / post-operative
- Post-traumatic
- Degenerative inflammation
- Early-onset to slightly advanced rhizarthrosis with tendency towards subluxation
- Functional symptoms in the carpo-metacarpal joint caused by recurrent joint misalignment

EFFECT/TECHNIQUE

- Dynamic stabilisation of the carpo-metacarpal joint in slight abduction position
- Largely functional preservation of thumb mobility and pain reduction
- Ring brace made from plastic
- Thermoplastically mouldable
- Grindable material
- Excellent for everyday use
- Firm material for high stabilisation

ARTICLE NUMBER

07603

SIZE IN CM

6 Wrist circumference

S	15 - 17

INDICATIONS

- Conservative / post-operative
- Post-traumatic
- Degenerative inflammation
- Early-onset to slightly advanced rhizarthrosis with tendency towards subluxation
- Functional symptoms in the carpo-metacarpal joint caused by recurrent joint misalignment
- Inflammation of the carpo-metacarpal joint

EFFECT/TECHNIQUE

- Soft material for high and pleasant wearing comfort
- Otherwise as with RHIZO-RING®

HOW TO MEASURE CORRECTLY

 Platinum	 Platinum/orange
 Black	 Orange/blue
 Beige	 Black/colour
 White	 Transparent/orange
 Grey	 Black/grey

- 1 Neck height**
Distance between the prominence of the occipital bone and the forward-protruding spinous process of the 7th cervical vertebra
- 1a Neck circumference**
Measured over the larynx
- 1b Height of the cervical collar**
Face forwards, lower edge of the chin down to the sternoclavicular
- 2 Circumference of the middle of the biceps**
- 3 Elbow circumference**
Circumference around the elbow joint space (extended)
- 4 Arm circumference**
Largest circumference of the forearm
- 5 Forearm length**
Length from the middle of the elbow to the knuckle of the index finger
- 6 Wrist circumference**
- 7 Width of the hand over the metacarpo-phalangeal joints**
- 8 Hand length**
Length from the wrist to the tip of the finger measured on the inside of the hand
- 9 Chest circumference**
Above the chest below the axillae
- 10 Waist circumference**
- 11 Body circumference**
- 12 Pelvis circumference**
- 13 Back length**
While seated from C7 (vertebra prominens) to the chair seat
- 14 Circumference 15 cm above the knee joint space**
- 15 "f" measurement**
14 cm above the knee joint space
- 16 Knee joint circumference**
Extended
- 17 "d" measurement**
14 cm below the knee joint space
- 18 Distal tibia circumference**
- 19 Ankle circumference**
- 20 Circumference of the forefoot**
behind the pad
- 21 Height of fibular head**
The height from the floor to the head of the fibula
- 22 Height of ankle joint**
The outer ankle height from the floor to the middle of the ankle
- 23 Circumference of the middle of the forearm**
