Nature's Antioxidant Powerhouse®

OLYXIR is a dream come true to a girl with a vision to change the world with a belief that most human ailment remedies are found within Mother Nature. Josephine A. Musco is an eco-conscious entrepreneur who has always had esteem for the olive tree. "The olive tree has always represented wealth, prosperity, longevity, peace and strength from the time of the Egyptian pharaohs to the Phoenicians, the Romans, and on to today."

Josephine was taught by her father that olive leaves have very valuable health benefits. To validate those claims, Josephine collaborated with the United States Department of Agriculture (USDA) to conduct specific scientific research on the properties of olive leaves. The relationship resulted in a rigorous evaluation and a shared patented process that enhances the safety, quality and effectiveness of the active ingredients that are the key components in the leaves' multiple medicinal health benefits. The sustainable, energy-effective process decreases the olive industry's bio waste while providing honest, healthful foods and beverages.
